Senior Class History

ANY (four) years ago, as the story runs, Lehigh opened its portals. A group of intelligent men stopping off in Bethlehem at the time, saw the beautiful vista beyond the portals. The group was pleased and announced its pleasure to the Dean, expressing at the same time their desire to enjoy the visit for several years. The Dean, very pleased with the announcements, offered a very pleasant stay. As added inducements, he reduced Sophomore hazing to nil, openly frowned on banquet frays and lent some of the group much needed funds.

The group decided to continue the Dean's reforms to such an extent that when portals should be opened in the future, the vistas to be viewed would be even more pleasing. The class of '33 as we shall now designate the group, began its reform activities by defeating the Sophomores in the Founders Day sports in '29, and the Freshmen in '30. In '33 members of the class as representatives in Arcadia, abolished all Freshmen regulations with the exception of the dink. The Arcadia also abolished Sword and Crescent, and decried the policy of the Athletic Board of Control. The class is the first to see the establishment of a new Athletic policy, a new blazer policy, and a new Prom Committee policy. It is the first to see the continued operation of the Browsing Room and to enjoy the renovated lounging room in Brown Hall.

Needless to say, financial stress and scholastic requirements have discouraged not a few members of the original group. But, regardless, we graduate at least the wealthiest class in the history of the University. We now go to blaze a path of greater glory, in the hope that some one will appreciate our inestimable aid to the University and the Universe at large.

CLASS OF 1933

ARTS AND SCIENCE

Faculty of the Departments of Languages

PHILIP MASON PALMER, A.B.	<i>Professor and Head of the Department of German and Director of the College of Arts and Sciences.</i>

Bethlehem

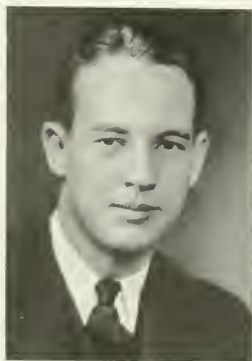

Four years ago there came to these halls of learning a young man from Pittsburgh. Anderson was the name, and after settling down to the routine life of a college man of leisure, he proceeded to astound his teachers and friends (not that his teachers were not his friends) with the remarkable wit and good humor that has made his path through Lehigh such a pleasant one.

Don entered heartily into the things that held his interest and once he started a task, he finished it. This even applies to the task of winning the hearts of a few well chosen "sweet young things" before he finally decided to settle down to the life of—no, not a bachelor, but a settled and serious family man; at least we hope he marries her.

We have all enjoyed knowing him, and send him our most heartfelt well wishes. May he succeed.

Sophomore Honors, International Relations Club, (2, 3, 4); President, International Relations Club (4); Pre-Legal Society (3, 4); Vice-President, Pre-Legal Society (4); Delegate to Model League of Nations, Syracuse (3); Delegate to Model Disarmament Conference, Bucknell (3); Member, Continuation Committee, Middle Atlantic States (3, 4); Secretary-General, Model League of Nations Assembly, Lehigh (4); Phi Beta Kappa.

ALTHOUGH Jim came to Lehigh to study engineering, he soon discovered that his temperament directed him to investigate the field of political science. The legal profession appeared far more appalling than chemistry. So Jim entered the arts college in his second year and substituted political philosophy for technical formulas. By the time he became a senior he had gained a prominent position in all student activities relative to his chosen field. Even though these activities kept him very busy, he was able, at the same time, to present a very good account of himself scholastically. Three more years of study, probably at Harvard, are still ahead of Jim before he has the opportunity to test in actual practice the theories which he so readily absorbed in the classroom. If his apparent "dag" with his professors can be transformed into the ability to sway juries his success is unquestionably assured.

Phi Gamma Delta

"OUR BOY ARTIE" comes from Dover, Del., Easton, Md., or from somewhere down in the Southern sticks. He had ideas about being a big Lehigh engineer; so he studied engineering his first two years. He says he did rather well and he even had a slide rule all his own. But one day his mother sent him a big crate of apples and he started to make friends in the upper stories of Christmas Saucon. Apparently his success went to his head, for he sold his room mate his slide rule and changed to Arts and Science. It must have been a good idea, because that same year he was awarded the Williams Junior Composition Prize.

Artie writes fairly well; so with the help of some more apples and an authoritative tone of voice, he became second in command of the Brown and White, a small so-called student publication appearing here and there fairly regularly.

Considering everything "Our Boy" will get by.

Arts

Manager of Debate (3), Debating Team (2, 3, 4), Special Honors in Economics, Delta Omicron Theta (2, 3, 4), Vice-President (4).

Bethlehem

HERE is a person of genial and quiet ways, but of great energy and untiring industry, whose chief ambition in life is to help those who need help. This, perhaps, explains his broad range of interest and intense study into such humanistic subjects as sociology and labor problems, which could attract only the individual who concerns himself with the welfare of people. No one will ever forget his generosity and numerous extensions of beneficences.

The stress and strain of the depression days with its depleted worker's Saturday night brown envelope have drawn his thoughtful attention. Thus we are not surprised to learn that he believes in such progressive social measures as Unemployment Insurance and Old Age Pensions.

Everyone who knows Maurice is glad to have him as a friend. We know he will become a great lawyer, for his constant arguing and debating should prove good experience.

Arts

Fencing Team (3, 4), Captain (4), Freshman Honors, Sophomore Honors, R. W. Blake Society; Deutscher Verein; Fencing Club President, (4); Orchestra (1), R. W. Hall Pre Medical Society President, (4); Phi Beta Kappa.

FRANK is an unusual chap, you know. Quiet, reserved, he is often remembered for his look (real or assumed, who can say?) of owl-like sagacity. Sometimes, when he gazed across the vast expanse of the circulation desk at the library, he looked as if he were monarch of all the tomes he surveyed. At times such as these, too, he toyed absently with intricate formulæ concerned with organic elements, the while his mind was far away. Perhaps then he wondered whether or not he could construct, after the manner of Frankenstein, a human organism as easily as he, naturally curious, had taken one apart to see what made it tick. His apparent preference for dark clothing, his somber eyes and his dark brown hair all contribute to the cloud of solemnity which seem to engulf him. It is even whispered—in deserted corners and behind locked doors—that he plans to be a doctor. What chance will Death have when Frank the medico fences with it?

STUDENTS know Bill as a smooth ball-player, girls know him as a smooth dancer, and the pros know him as a smooth course-crabber. Bill has managed to pick and successfully complete in four years one of the easiest Art Courses known at Lehigh. Bill knows this business of education pretty well for he comes from a family of teachers and someday hopes to be one himself.

Despite his lure for women, his taste for beer and the injuries that beset him during his Freshman and Sophomore years, Bill has "kept charging" through thick and thin to become the star of varsity basket-ball for the last two years. Bill's likeable nature and far famed proficiency as a Mexican athlete have done much to make him popular while at Lehigh. It is encouraging to note that Bill has a younger brother now a Freshman at Lehigh who promises to maintain the Bray tradition thus far so nobly advanced.

Burr, Managing Editor (4), Editorial Staff (1, 2, 3); Manager, Football (4); Arcadia (4); Lehigh Union; Pi Delta Epsilon (4). Cyanide, Sword and Crescent (4); Omicron Delta Kappa (4).

SINCE this is autobiographical, the writer will have to take it easy. But taking it easy is very easy for him, at least in the opinion of three or four of Lehigh's most noted professors.

By the end of three years on South mounting, a popular roommate and a little bit of campus politics placed this young man from the wilds of western Pennsylvania, in a position where he was able to become the owner of several heavy pieces of imitation gold to be worn on the watch chain. And after neglecting his studies for three years in the pursuit of the aforementioned dangles—he asks himself WHY?

But he has enjoyed his four years at Lehigh like all get-out, a pleasant mixture of social life, extra-curricular activities and managerial work having made it possible.

He wants you all to stop when you get to Johnstown.

Arts

Pi Kappa Alpha

Band (2, 3, 4); Mining and Geological Society (3, 4), President (4).

THREE years ago there came to our fair college a youthful M.E., full of smoke and fire, and determined to make his name shine in the hazy air of modern industrialism. One semester went by, and our hero found that the engines of commerce had lost their glamour, and that he pined more for the open air and pure bosom of mother earth. He delved more deeply into Geological Science, meanwhile gaining popularity with his fellow students by the agency of wild cycle flights donated frequently to all who cared to dare the perilous "romble seat." He is becoming one of the geologists of America, and, let us hope, the world. Johnny's prowess with the fair sex is famed, and he led his fraternity brothers a merry dance trying to follow his intrigues. Lehigh is losing one of her attractions, and there will be a void here which will never be filled by one like the smiling good-natured Johnny.

Reviews, Editor-in-Chief (4); Managing Editor (3); Editorial Board (2, 3, 4); Brown and White, Editorial Council (3, 4); News Editor (2); Columnist (2, 3, 4); Editorial Board (2, 3, 4); Burr Competition (1); Varsity Debating Team (1, 2, 3); Williams Freshman English Prize; Wilbur Sophomore English Prize; Delta Omicron Theta, President (3); Vice-President (2); Corresponding Secretary; Deutscher Verein; Pre-Legal Society; Pi Delta Epsilon, President (4); Arcadia; Sword and Crescent; Omicron Delta Kappa.

EDDIE "Ivy Clad and Chestnut" Fleischer has two distinguishing talents—the gift of smooth and convincing gab and a genuine talent for writing. Through indiscriminate use of these two attributes, alternately and together, he ascended the gilded stairway to campus fame, and became, in his senior year, one of the outstanding and most popular personalities in the student body.

There is nothing Ed can't write his way into, and equally little that he can't talk his way out of. For example, he wrote his way into the editorship of the Lehigh Review; and, in spite of great handicaps, talked his way out of the stigmatic aspects of the job. Not to mention, of course, his campus columns.

Then there are any number of interesting anecdotes which might be set forth here concerning Ed's car and his gallery of women. The car has earned for itself a definite place in Lehigh history, and as for the women—!

His collegiate life has been colorful and successful; so, let's have one on the house to more color and to more success.

"WANT now let's see, Lem, it was back in '29, if I reckon right, that Charlie begun to break track records, or maybe it was along about '30. Ennehow he busted them a plenty during the four years he was at Lehigh."

"I recollect one afternoon in particular. That was a bit of pole vaultin' goin' on. Charlie was pushin' the bar up so fast the boys had to stand on the gym roof to see the goin's on. He shore had wings. Good natured cuss he was too; always smilin' 'cept when he was bouncin' over them hurdles or a galloppin' down a broadjump runway. I ain't seen him now in many years Lem; in fact, not since I came up here to the farm."

"Charlie used to be pretty sweet on some gal from up around Mt. Vernon. I wonder if— O, uh! There's Mirandy callin' agin. Guess I'd better rustle these here groceries home. So long, Lem."

ELMER came to Lehigh from Liberty High School incognito, but is leaving with a host of friends, and a much coveted "L," and seasoned with scholastic honors.

The odor of the Chemical Lab, and the smell of dissected animals in the Biology Lab irritated his sensitive nostrils, so Elmer took to Business like a duck to water.

Elmer's biggest fun is baseball, and this through no fault of his own, for someone handed him the home-side at high school. Since then he learned to breeze "curves" over the home-plate at Lehigh. He pretends to take his baseball straight. Hence, his failure to engage in such popular extra-curricular activities as beer drinking, and expeditions to Cedar Crest.

Quiet and modest by nature and possessing qualities which make friendship wherever he goes, he will doubtless meet with success in the business world.

GORDON's the lad who introduced a new course to Lehigh. He wanted to become a chemist without getting gray hair in the process—hence he remarked to Dr. Ullman that they should have a course in chemical sales, and, lo and behold, Lester got a chemical education on an Att's man's time. Les has another happy faculty; that is, the ability to study German with his German book on one knee and a certain lovely young Allentown bunnet on the other. All of which goes to prove that man learns best when his environment is most pleasant. Les didn't confine all his time to studies and brunettes. He captained the Varsity Soccer team and broke the college record in the javelin throw. And, believe it or not, he didn't get his pep from eating Fleischman's Yeast or by using Lifebuoy, but owes his numerous abilities to good old Catawqua beer.

Intramural Football Shooting (First Place): Review, Board of Editors (3, 4); Robert W. Blake Society (1, 2, 3, 4); Secretary-Treasurer (3); President (4); Freshman Honors; Sophomore Honors; First Prize, Sophomore English; Second Prize Junior English; Phi Beta Kappa.

Lo, the dreamer cometh. Army Alphas under his arm, a mass of statistics in his head, and a ready desire to give anyone a psychological examination at any time, anywhere. For four long years A. E. has endeavored to emulate the mighty Spinoza and brilliant Will James—and has actually succeeded. At least he has acquired that well-known Philosophical absentmindedness. At times he even forgets that he is going to Lehigh, oversleeping his classes or reading through them in the library.

Seriously, though, Abe has attained marked success in his chosen field. Honors and prizes came naturally. Gifted with an uncanny ability to do much work in little time, he has mingled scholarly attainments with a host of interesting experiences. But now 'tis rumored he has reformed.

The Psychology as well as the English department, will certainly miss the tall, broad-boned figure with a closely cropped head of hair; but we hope that some day A.E. will return to dear old South Mountain with his ambition a reality—The Grudinian School of Psychology.

A GLANCE at the picture attached hereto will show the cynical smile and the tired expression that have combined to make Gerry an intriguing figure to girls and professors alike—with different results. The professor, gave him good marks; and the ladies, God bless them, find him a good mark.

On the theory that absence makes the heart grow fonder, a great friendship grew up between our Gerry and Dr. Curtis—but, sad to relate, towards the end, Gerry was cut to the quick; and, in fact, almost out of the picture.

Gerry has a soft voice and a veneer of polite polish that never cracks. Assuredly, among the things that Gerry never cracked, in addition to his polish, were his books and the hursar's safe. The last was indeed a temptation. Raffles had nothing on Gentleman Gerry when it came to combinations. All doors open for Mr. Halbreich, including ours.

Armed with his diploma, and his major in French, Gerry enters the world ready for business. Four years of cutting, including his liquor, classes, and wisdom teeth, have taught "Hock" the greatest of economic principles. Gerry will get his cut no matter what the price.

Leonard Hall

Band (1, 2), Blake Society (3, 4).

1929 was unique in some 400 points, and Herb was one of them. He came as the pride of the family from the coal region of Pennsylvania, laden with pipes and tobacco which led to the fact that during his Freshman year he was able to wear a string of tobacco cans about his neck when the Sophomore Council deemed it necessary. As a sophomore he got "wisdom" and joined the cult of philosophers, and became an ardent supporter of the Culbertson forcing system. Herb's Junior year found him in the toils of Nietzsche, Kant, and Schopenhauer. As an out and out rebel, there seems that—there is little reason to doubt—that soon after graduation the world will see him either wipe convention, morality, and government from the face of the earth, or settle down quietly at Philadelphia Divinity School as a prospective Theolog. What ever it will be, we'll remember you.

WHEN one goes to college, changes are expected. Jerry was no exception. Jerry strolled leisurely into Bethlehem in his Freshman year with the least possible idea of going anywhere, and slowly sauntered to his place of abode. The first morning at school he was up with the sun (now that inevitable "can't get him up") and the interest in hand finally drove him to college where he meandered from History to English, thence to Philosophy, and finally to Fine Arts in which he has made an enviable record. Other interests, in spite of himself, drove him forth and he strayed one day with idle steps to the hospital. The great moment arrived. Since then he has rambled around these main points of interest. His slow step will be missed, but it will grace Cambridge Theological Seminary, we feel most certain. Good luck and happiness, Jerry.

THE heroes of saga and myth lived on danger and adventure. They laughed in the jaws of dragons and lopped off the heads of giants. They are gone, but their daring spirit still lives in men. You doubt it? Look!

A figure creeps stealthily through the steaming muck of a Jersey swamp in August, his eyes fixed on a mysterious object ahead. Suddenly, he arises and rushes at it, gun in hand. He pumps the gun—once, twice, and as the spray of "Flit" settles over the rusty, water-filled can, the souls of a million mosquitoes rise to meet their maker. Sol Leibowitz, the Ace Exterminator of the Monmouth County Commission of Mosquito Extermination, has conquered again!

Winter brings him back to the dull routine of scholarship and activities—Robert Blake, Debating, President of D. O. T., International Relations Society, etc. How flat and stale it must be, for like Tennyson's Ulysses, he has known adventure, and when Spring comes he must seek it again.

Quick, Henry, the "Flit"!

IN spite of his flame-colored hair, Jerry is loved and venerated by his classmates. In case you don't quite remember, he is that popular fraternity man who always drives around town in a Ford coupe. What price popularity?

Among his many campus activities may be mentioned Deutsche Verein and the golf team. Jerry was the most dependable man on the entire team—when they lost, he always won his match; and when they were victorious, he was the blushing, good natured loser (the most dependable man on the team). And speaking of "blushing," the slightest mention of the word is always sure to bring forth one of those warm red glows that suffuse his face, matching so well that striking red hair. A handsome man, truly!

Jerry is one of the chosen few that have jobs awaiting them. He admits, however, that he's getting it through pull his father owns the place.

Leonard Hall

GOTH'S GHOST! Here's bonny Ben of Belleville a la McCaa, and how the swaddling has grown since Pop first passed the cigars. The journalist, business manager, soccerite, measures six feet two of mildness, humor, and scholastic ability. To Lehigh and its environment he owes much. Bethlehem belles, bull sessions and Deutsche produced a humorous Frosh; soccer and journalism created a lanky Sophomore, Proms, offices, studies, and "one who understands" brought into being the suave and swanky Junior, while the serious affairs of life and the influence of many friends have developed a model Senior.

Moravian influence has been great on this neo-seminarian as even Dotty will admit, but through it all Ben has been an efficient and capable student and a loyal member of the House Potential Bishops. Ben combines the delightful traits of matured business sense and practical ability with aesthetic sensitivity and puerile wistfulness.

In February, 1932, the bitter winds from the North brought to our midst one by the name of George Pedrick. He had found the going a little too hard at Hamilton College and decided to take a vacation at Lehigh University. Ever since then he has not had the leisure for this vacation.

Few people know to what a great extent Lehigh has been benefitted by George's presence. Even though all of us know that he is a fire expert, few know of the immense savings the University has had in its fire insurance due to George's influence.

Between fires George has found time for the "better things" in life, but he has kept their names and phone numbers a secret from the rest of us. But after all, what better preparation would a fire chief have than an Arts course?

Brown and White, Editor-in-Chief (4), News Manager (3), Sports Editor (2, 3), Burr, Editorial Board (3, 4); Lehigh Pictorial, Editor (4); President, Arcadia; Executive Committee, Athletic Board of Control; Faculty Discipline Committee; Director, Intramural Sports; Secretary, Pi Delta Epsilon; Delta Omicron Theta; Treasurer, Eta Sigma Phi; International Relations Club; Robert Blake Society; President (4), Secretary (3), Pre-Legal Society; Freshman Honors.

"BROWN AND WHITE" editor Martin Reed setting out to promote student authority in the management of student affairs, succeeded. His disregard of public opinion made him unpopular with some (administration, many faculty members, some students), admired by as many more; respected by all. He worked tirelessly to build projects he considered right, as tirelessly to demolish those he deemed wrong. His exposes of Lehigh's athletic situation ("So Brown Says to White", various issues, "Brown and White", Sept., 1932—June, 1933) were sensationally true. They brought improvement. He is considered the most outstanding product of under-graduate journalism at the University in many years.

No fanatical reformer, he found time for an occasional beer, usually accompanying a round-table discussion of campus problems.

His election to the Arcadia Presidency (February, 1933, upon the resignation from college of Football Captain Halsted) was a true index of student opinion and the ultimate recognition and acclaim of his abilities.

In the words of a classmate, "He caused more hell, did more good, than anyone else in '33."

DEVISING from the customary biographical anodyne, it shall be an endeavor to create from a none too comely physique, a correspondingly strong extirpious form of man.

James Jackson Roessle succumbed to a direful fate as a college man for limpid reasons too numerous to mention. The sublime qualities of an over-taxed smoothie, however, have been constantly radiating until the fusion point is in immediate danger. The very attitude of the "Blonde Brute" exemplifies a misinterpreted Calhoun in quest of the "Woolly Calf". The winning consciousness peeking from a BURRED mind has perpetuated, stilled and warped the context of his make up so profoundly, that every expression reveals to the casual hypocrite a silent "Cantor." His climatic observation powers will always extend into the category of disadvantages. The artificiality, prevailing as the Trade Winds, viciously merrings various and sundry models, both material and immaterial. He shall eventually become a heterogeneous artist. (Oh yeah!)

Joe got his first taste of Lehigh at the summer session here following his sophomore year at Hamilton College. During the summer he developed a liking for Bethlehem or for certain of the inhabitants of Bethlehem—and decided to continue at this institution.

Know this man by these presents.

He is the Senior who has recently attained immunity to chicken-pox, dislikes walking to classes with engineers because of their more rapid gait, is quite fastidious about his toilet, is the living proof of the falsity of the old saying that "nobody loves a fat man, starts for eight o'clock, close at a quarter of eight, manages to refrain from smoking and drinking, possesses the typical jovial disposition commonly attributed to those of his Joe, and utters peculiar noises when moved to excessive laughter. And as Joe might say in the language he expects to teach, "Satis!"

Epitome (3, 3, 4), Faculty and Classes Editor (1), Editor-in-chief (4), Arcadia, Board of Publications, Chairman, Freshman and Sophomore Honors, Phi Beta Kappa; Omicron Delta Kappa; Pi Delta Epsilon; Robert Blake Society (3, 4), Vice-President (4); Sword and Crescent; Phi Alpha Society, President (1); Pi Mu Epsilon (3, 4), Treasurer (4).

JIM came to us with a silk shirt and an impressive background. Time took from him the silk shirt, but Silky is leaving with a still more impressive background. Nature dealt lavishly with Silky and gave him the where-withal and merit to organize and head the Phi Alpha Society, probably the most exclusive and inclusive organization on the campus. No one doubts that he merits the distinction implied. He has indeed done his best to uphold the honor of his foster child, and Walter-at-the-key-hole reports that he is at his best in upholding the said honor in a little known rendezvous near Bethlehem. (He will unconditionally recommend the malt beverages to all applicants).

They say that Big Chief has succeeded because of his characteristic philanthropy—passing out cigars and depression cigarettes. They say further that Tammany has its one cross eye fixed on the Chief. Be that as it may we must still raise the stein in honor of impressive backgrounds, congenial philosophers, honest politicians and Big Chief.

BEN MIXIE won't be able to tell this one to his grandchildren. It seems that way back when Ben was a sophomore they conducted Founders Day Sports. Seeing how unevenly matched the Sophs were, Ben stepped in to lend his hand—to embarrass the Frosh. In the process, Ben lost his trousers and having left the extra pair at home, he was left with nought but that which nature blessed him. Several brothers, seeing his plight, generously offered him a slicker the wearing of which the weather had made imperative. Praying lustily to himself, he donned the slicker and marched through town to the Hall. The trip, Ben reports, was made safely. In fact, no one even suspected—then imagine Martin Reed, Editor of the Brown and White, running into his dormitory at 4 a. m., yelling at the top of his voice, "The British are coming—giddap, giddap!" A Friday night dance at Trinity Church without Charles Fuller. Elmer (Phi Beta) Glick when Capt. Clay asked which hoof appeared on a slide to be more clearly imprinted, saying, "the other one" The same E. P. B. Glick worrying about the rottenness in Congress At a showing of a Russian Revolution picture: Aggie: "Listen, they're singing 'Hail Pennsylvania'!"—Eddie: "What's the use?"

BILL is Lehigh's well-known citizen from New Rochelle. Whether on the gridiron, the lacrosse field, the classroom, or on the drill field, Bill always turned in a job well done. His voluminous correspondence, always followed up by a weekend trip to the New York suburb, has contributed substantially toward averting a disastrous postal deficit. He did spend a number of weekends in Bethlehem, however—that was at house party time when his calls were returned by "that certain party."

As for Bill's future, we harbor no fears. Well-stocked with knowledge gleaned from his courses in Business Administration plus the aggressiveness he developed at right tackle, we expect to see Bill fight Ol' Man Depression to a standstill and help to inject life into business once more. He has little regard for theorizing over matters and follows T.R.'s famous motto "Speak softly and carry a big stick."

Carry on, Bill, as you have in college and it will be a job well done.

Business Administration

Taylor Hall E

CHARLES A. BENNETT entered Lehigh with the idea of becoming an engineer. However, in a few weeks college had its effect on him and he discovered the only way of saving humanity was in taking the course in Business Administration. In his four years of ardent study, Ginsberg has acquired great proficiency in tuning radios. In fact, he is in a class with the best of the electrical engineers in this art. Though many know of his success in the business department, few know of his "double life." Charlie is the "Dr. Jekyll and Mr. Hyde" of the class. All of us wonder about those long, mysterious calls he receives some afternoons. Moreover, 'tis said that he stays up late at night not to study, but rather to go out on secret dates. If Charlie can fool the business world as well as this, he is bound to be successful.

AND so, Dear Children, after blowing Pittsburgh's smoke out of his nostrils, Chuck settled himself down to the task of becoming a Lehigh Man in every sense of the word. And did he succeed? Well I guess! his cheerful nature and his inherent abilities soon won him numerous friends on the campus. His flying trips to Reading and his activities in Bethlehem resulted in his entrenchment as The Woman's Home Companion in both towns. Who was this guy Romeo anyway?

Perhaps it was the business training that developed his ability as a financier. We are told that as a result of one of his trips to Philadelphia, the Hotel Pennsylvania was able to pay its dividends. Treacherous things these covert charges!

Four years have slipped by and Chuck has made the grade socially and scholastically. We who know you salute you! Stout Fellow!

TED coming from a family of business men, decided to follow their footsteps. He started his studies at the University of Nebraska, but because it was rather distant from New York and the many haunts which Ted liked and frequently visited, he decided to finish his education in dear old Bethlehem.

In his two and a half years on Old South Mountain Ted not only made a fine scholastic record, but also was interested in many outside activities. During his first year we see him singing in the Glee Club, and throwing the javelin for the track team. Football stole his interest his last year and a half, and we see Ted on the varsity in his senior year.

In the spring of his junior year Ted began to do a good deal of visiting across town and although many suspected El Maennerchor, we are not sure now, for since his graduation he has been back almost every other week.

By a fortunate removal from a small middle western town to the great state of New Jersey, a farmer lad became a polished Easterner. Jim has benefited much from the advantage of Lehigh, and we feel that Lehigh will benefit also from such a good alumnus.

Jim liked the business end of sports so much that he became a manager and certainly made a good job of it too. As a photographer there is none more interested, and few who can take so many pictures in such a short time. He has been known to handle the feminine side of the picture with as much ease and it is the general opinion that with such all-around ability Jim may be expected to go far and in many ways do big things; so here's luck to you, Jim, in all your endeavors.

Now Karl claims to come from Hamburg (a suburb of Reading you know), but those who have kept track of his goings and comings say that Reading's the place. But with trips to Wellesley, Boston, and points north we're not quite sure which of these is his rendezvous.

Among his many other talents Karl has always exhibited a flair for music. For several seasons he stepped high and drilled faithfully, adding the wail of his sax to the blare of the band. But he must have discovered that business was interfering with pleasure, or else some traitor to humanity told him he could sing. Anyway, he deserted the band for the glee club.

Two years at Mercersburg brought the diamond out of the rough, two years at the "Lodge" cut its many facets, and now that Ronald Coleman effect adds the final polish. Thus was perfected a "Gentleman from Lehigh."

Nor often have Alabamians departed from their native state to come north in search of knowledge, but four years ago Chip decided that he'd give Lehigh a trial.

Consequently we have a real southern gentleman among us. Chip brought along his baseball technique, which he began picking up at an early age on the sandlots of Alabama.

Nervous, busy, anxious, ambitious, kind, thoughtful and wandering, all of these characteristics and many more only go to show that Chip is always busy with something. If we cannot find him studying, he can be located on the diamond, a place which has had a warm spot in his heart since early childhood.

And so his classmates have a warm place in their hearts for Chip, that southern lad who likes to "walk hawd." We will miss you, old fellow, and if you go home in June, give us a break and come back to the reunion meetings.

Lon entered Lehigh in that disastrous autumn of 1929 and always claimed that his unsuccessful efforts to hold down a coveted berth on the team of the well known Scotchman were due to the depression. Whereas we have a suspicion that other factors must be taken into consideration in explaining the above failure.

A good hearted fellow though, his grieving at the passing of Johnny, to whose filling station in Fountain Hill his feet had blazed a well beaten path, was a sight sad to behold. However, lately he succeeded in transferring his affections to an establishment of similar type, which had the added attraction of providing some old fashioned pre-prohibition customs.

With an eye for politics, Lon managed to mix business with pleasure by indulging in several history and government courses which he intends to use advantageously when the opportunity presents itself.

JIM's stay up here in the sauer-kraut country has been one marked not by brilliant flashes, but by a steadily increasing process of growth. When we first ran into him he seemed rather shy and quiet, but with a genuine sense of humor. Perhaps the shyness was but skin deep—at any rate it soon disappeared.

Naturally gifted with a good set of brains, Jim has made good use of his talents in soaking up the wisdom of Carothers and Co., besides doing some thinking on his own part. Like the Dean he believes that "studies are not everything;" and practicing what he preaches, he has reasonably and moderately apportioned his time between hard work and play. To sit down and talk with him is a pleasure at any time—it doesn't make any difference what is the subject. His sense of humor has increased and multiplied since his coming to Lehigh and to hear his laugh means that you cannot help laughing yourself. To sum up, Jim seems to be a pretty level-headed fellow, likeable, serious, but nevertheless willing to play just as hard as he works.

If you should hear someone say, "Did you hear Edison Jones last night?", without a doubt you would know it was Harry.

With saxophone in hand, this lad invaded Lehigh's campus with the hopes of becoming an Engineer or was is an orchestra leader? He found out, after one year of battling the elements, that Chemistry had nothing to do with hot licks for the saxophone; so he changed to business, with the expectation of managing Paul Whiteman's orchestra.

During his stay at Lehigh, Harry has not been idle. He was the founder of the "Long Island Commuters Club." This club, although it has only one member, has been very aggressive since Harry never misses a weekend on Long Island. All the local bands clamor for his services, so he has to return and give them a break. More powerful week-ends to you Harry.

ONE summer morning, a black Chrysler rolled up to the house, and out stepped the flower of Swarthmore—our Sammy. In these trying days, the Chrysler is no more, but Sam is still very much in evidence, tumbling over, through, and around his study obstacles. No one knows how he has succeeded so far, but he is now due to graduate—sooner or later. He has tried various branches of athletics, and even though the breaks didn't come his way, he has acquired many acquaintances and friends in his years at Lehigh.

During the last year, we have noticed a vast change in Bud. We suspect, in fact we know, the spur of his interest—a woman, and we say, a lucky woman.

And regardless what vocation Bud enters, he will make a name for himself, and we sure wish him luck.

OVER the river and up the hill

To college he does go,

"Asthma" knows the way, and her motor obeys

Through rain or ice or snow.

Oh yes, we mean Tom Harleman. Tom hails from good, old Bethlehem, but if you ever want to find him it would be advisable to start looking somewhere in New York, New Jersey, or maybe even in Philadelphia.

Tom has spent a lot of time chasing Jack's baseballs around Taylor Field, and for this act has been justly rewarded. If Tom ever gets really hard up for a job it is certain that he could combine his diamond pursuits as an umpire. Can't you imagine his stentorian bellow announcing "Batteries for today's game—"

In spite of all we might say there are sterling traits in this budding young business man, the bird who is always on the verge of study, and who has never been caught at it.

"BERG," a quiet and unassuming chap, hailing from the wooded hills of Hopewell, came into our midst after completing two years of a course in Business Administration at N. Y. U. He was led to believe by Dean McConn, that the better things resulting from college life did not come from books. Ergo, Berg started to look for them. He found the Maentechor Tea Club to be a fine opportunity to develop those better things. Women have never bothered him—he absolutely refuses to take them seriously.

Berg has lightened our academic struggle with "charms that soothe the savage beast." His favorite selections are:—"Moan You Meaners," "Where Is My Wandering Boy Tonight?" and "After the B (r) all Is Over."

Berg has a hankering for politics—a splendid opportunity for a lot of "Hokum." We think our edition of Mahatma Ghandi has a great future ahead of him.

ARISING from the depths of Bangor's slate district came forth "Woody," a freshman, green as usual and needless to say he knew all about slate and a great many other things of no importance. Dressed in a plaid suit, further ornamented by a flashy tie, and with hair plastered down, he gave without a doubt his best interpretation of "one of them city slickers." But four years have passed since then—four pleasant years of merry making, sleep

may we emphasize the latter, and possibly by stretching the point a bit we might add study. Last we forget, we must introduce to the unsuspecting members of the weaker sex, their hearts desire, none other than Woodrow himself. And incidentally since telephones, banking, and women are closely associated, may we say that he is an undisputed authority on the aforementioned subjects.

No biography can adequately describe the actions, desires, and the ambitions of a Lehigh senior. The trials and tribulations are innumerable—the thrills indescribable. I have observed and have been observed, but no impression will ever be so lasting than the facts:

That the Business School does not know its own Business.

That educators have no practical education.

That the price of a Lehigh diploma is 6 "red apples" per semester.

That we are examined for that which we do not know instead of that which we know.

That the only practical subjects are Accounting and a course in Moral and Religious Philosophy.

That Curtis's cut notices are only "friendly" (?) warnings."

That Carother's first name should be "Bull."

That it takes the faculty four years to tell the students they know nothing.

And so, after having received twenty-one cut notices during my four years, and having spent forty-five hundred dollars in the process of being discouraged, disillusioned, and demoralized, I am now ready to depart into the outer world.

WHEN "Jamp," as he was always called by those who knew him well, first made his appearance in these parts, he was the very personification of those qualities of shyness and reticence which usually typify freshmen. Today, we find in him no vestige of the shrinking boy of four summers ago. In truth, it is difficult for us to even think of the time when Jamp was anything but the suave man-about-town that we now know him to be.

Jamp has not missed his calling in life if we are to trust the validity of an incident which happened about three years ago. It was at the time when the phenologist was making his memorable tour of the campus. The room was blue with smoke and the clairvoyant was assiduously massaging someone's scalp when Jamp chanced upon the scene. There was a brief moment of silence following the unexpected intrusion, after which the phenologist exploded "That man's a money-lopper!" Exactly what the phenologist meant is difficult to say. Perhaps it was merely his way of saying that Jamp is slated to do big things in the world of finance.

PICTURE, if you will, a tall, crinning, curly-haired example of young America hiking out the Easton Pike () or standing immaculate in his uniform in front of Company C. Such a boy is Fritz. Yet women and R. O. T. C. are not his only specialties. Fritz has taken the campus activities by storm, and, adding honor to honor, has gathered a string of charms across his vest from pocket to pocket. After spending three years in the Broad Street Castle, he forsook the quiet of fraternity life and secluded himself within the walls of an apartment.

Feeling that there was more to be gained in college than that acquired from books, he took in a New York convention (he didn't see much of the Convention), and returned a sadder, but wiser man. Fritz makes his exodus from Lehigh with a flourish, leaving behind him a host of friends and an enviable record.

"WILS," having been born in the wilds of western North Carolina, moved to the tall timber in Stroudsburg, Penna., and likes it, too. However, that weakness for the South is much in evidence, and we will not be surprised if he leaves the Keystone State in favor of the "Carolina Moon."

Wils broke down and decided to become an officer in the "King's army." Sometimes we wonder,—but at any rate he now has a darn nice riding habit. But how about the pretty sabre?

We could never understand why this curly headed blonde from the South ignored the girls—Oh Yeah? He will surely agree with you that Swarthmore is the *only* girls school.

After spending four years in the Business department at Lehigh, Wils is impatient to be off. Just where, he knows not, but he has the will to go and we wish him lots of luck.

It is often said that it is easier to find fault with people than to commend them. It is also said that there is an exception to every rule and Frank (familiarily known as "Bunny") is the exception in this case.

He hails from N. Y. M. A. as all who live with him soon find out, he lives in Summit and he has a very powerful interest in Shawnee (also known as Stroudsburg).

During Bunny's freshman and sophomore years he enjoyed life. Most Sunday mornings were spent in swapping stirring tales of Saturday night adventures. On becoming a junior, however, he turned to subjects of a more serious nature and during the last two years of college, he was initiated into the honorary Business Society, elected Business Manager of the Epitome and elected Captain of Lacrosse.

Now, he graduates (as the Lehigh Diploma puts it) "a competent business man." "So Good Luck Bunny!"

Gus came to us from the cloistered haunts of Storm King and has been haunting us ever since. He brought with him some of the rugged beauty of the Palisades and a sweet aethereal nature which has made him the delight of his associates.

His child-like faith allowed him to fall among rude, companions, and, his early years here found him an all-to-frequent visitor at local institutions where he wasted his substance on malt-liquors. But his better nature asserted itself and with the help of a good woman he triumphed over evil and rose from the gutter.

We can't imagine what Gus will do when he gets out, but we are certain that he will be prominent in some way. And to phrase our last parting words in his own courtly vernacular we urge him "Git it up!"

"M, here comes that street whistler." The mother sticks her head out the window and says, "It's that Kresge boy who's forever whistling, and one of these days I'll—"

Yes, that's Warren always whistling. Even the mocking birds try to imitate him. If anybody has an untrained singing canary, bring it to the Kresge mansion and he'll have it singing for you within a week.

Whistling is not Warren's only accomplishment. Passing quibs with the rest of the "400" Warren succeeded in being graduated from Bethlehem High. Stepping on to a higher level Warren matriculated at Moravian College for a year. After his success of weathering a stormy year at the Moravian institution, Warren's eye fell upon this, "Our Lehigh," Warren decided to give the business world access to his talents, so he quietly registered as an aspirant of Business Administration.

Warren has no inclination whatsoever to establish his igloo in Bethlehem. Why? No one knows, but one should think a Lehigh student is the best judge.

B, a K.A., hails from Alabama. These two qualifications unquestionably brand him as a southern gentleman. Unlike the typical southerner, however, he prefers his "corn" on the cob. Ambition, coupled with a seemingly inherent ability to do all things well has enabled him to attain the heights in three distinct fields of college activity.

Endurance and the ability to sprint in a pinch first evidenced itself during Bill's frequent races against the closing doors of our chapel. In later years this ability was utilized in earning a varsity letter in cross country.

Bill was admitted to the honorary business fraternity and further distinguished himself socially by being elected to Arcadia. While not engaged in one of these strenuous activities he held positions on two publications.

Because of his sunny disposition and ever-ready smile, Bill has become one of the best liked men on the campus. We, his friends, deeply regret the arrival of this final day of parting. "So long and best luck to you Bill."

INTRODUCING, his Honor, the Mayor of Troy. In the course of four short years, we have seen "Lippy" grow from a typical freshman to a serious senior. It is possible to write his biography in a few words describing him as a student, but not as a course crabber, and statesman, but not a politician, a sophisticated, but not a rove. Beside these deeper qualities, he has won the respect of his friends for his choice in neat neckwear and his ability to write "billet-doux." Though he still believes that the smooth women are grown back home, nevertheless the heart of many a local "deb" has skipped a beat because of "Lip."

Describing Lip, we find his most serious defect is a stale sense of humor and habit of repeating the most stupid jokes which bring a laugh to only one person—himself.

Never known to arrive on time at class, he believes that there ought to be a law against early classes. He further believes that good things come in small packages and we agree with him in both.

NICHOLAS wended his way to college by way of Frankford High School. He arrived at this institution with many ideas concerning the advantages of a scientific education, but certain Mathematicians employed by Professor Fort took great pains to separate our friend from his ideals and succeeded in convincing him of the great value of a diploma from the school of Business.

This alteration in his pursuit of knowledge allotted him more time for extra curricular activities and he took up traveling. He has since become somewhat of an authority on the Indian life of Carlisle, but his able assistant and companion is not one of the proverbial Dickenson Squaws.

Nick having been convinced of the value of a business training has concentrated on Banking and high finances and could probably solve the present financial crisis, but for some reason or other has left the problems to President Roosevelt and his staff.

IN the last two years we've nominated Bob for the title of the "Best Dressed Man We Know" and our choice has never been questioned, so we hereby bestow on him that title! He was a subdued and attentive Freshman when he first arrived from Cleveland, and even though he's lost that quiet attitude, he still swears by the Middle West and Middle Western dance bands.

When the postal rates were raised to three cents Bob put an extra twenty dollars in his yearly budget, because his mailing list was tremendous—and mostly feminine. New Jersey seemed to have the inside of the track as far as affections were concerned, but there seem to be others now that are in the running.

"The Schweitzer" is famed for his well-timed and dry humor, and all the boys at A. X. P. will never forget the thing "that hangs in the butcher shop window and whistles."

FROM out of the "Smoky City" emerged this little puff. As the puff of smoke whisked away by the breeze expands, so do John's interpretations of incidents assume gigantic proportions.

Calculating calculus culminated in victory for the disciples of the indeterminable integral. Retirement to the Business School provided time for political maneuvering. To the political germ was soon added that of the "Beerio-Gobulus"; retiring to "the banks of the old Monocacy," John achieved a profitable combination of these two germs. The "Beerio-Gobulus" infects John so strongly at festive times that his blind house-party dates are always met blindly.

Contrary to the theory that red-headed people are quick-tempered, John is a friend of everyone and always has a ready smile. After four years, Lehigh returns the little puff, with interest added, again to the "Smoky City."

One look at the accompanying picture I believe, is quite sufficient to describe Johnny's physical characteristics. As to a description of his mental and moral characteristics, I am quite sure the phrase, "Johnny is a local (possibly the word should be spelled "loco") boy" is adequate. This is merely the belief of a fellow friend - I am not prepared to give the girls' or GIRLS' opinion.

It took a little longer for the fact, that Lehigh is a better university than Moravian is a college, to impress itself on Johnny's mind than it did for the majority of his fellow classmates. He finally discovered his mistake, however, and acted accordingly. I'm sure he has no regrets. The only regret we, his classmates, have is that he included a trombone in the transfer. This instrument later became a thorn in the side of peace.

Anyway, here's to success as a husband and business man, or as a trombone player—take your choice, Johnny.

BILL came to Lehigh from Staten Island, but he overcame this handicap after spending four years at Lehigh. He surprised everyone by going on pro twice, but still graduating on time. (Dean Curtis please note).

Bill was one of Lehigh's famous "week-enders." He rambled to the wilds of Jersey every week until the answer was "yes." Temporarily they are living in Bethlehem.

Economics and running are Bill's pet subjects. He was ready to call economics "Lehigh's snap course," but changed his mind after taking Business 108 under Diamond. The Upper Field has often felt the pounding of Bill's feet. One season of cross-country produced "ankleitis," but he is still hobbling about looking for a letter in the mile.

Bill's ambition is to be a second Morgan. Then, with millions of tax-exempt bonds, he will leave the dirt of financial districts behind and become a gentleman farmer in Canada.

SIGMA Phi's man about town. You can't tell us that wavy blonde hair is not an asset to a man. Having limited space, we will not try to make a list of his haunts; anyway, the really shady side of his life lies in Washington. Goodness knows how many thousands he spent to keep out of "Washington Merry-Go-Round!"

For two and a half years Chuck plowed through engineering, but he couldn't express himself sufficiently by just memorizing formulas. After taking several of Dr. Carothers' business courses, he recognized his calling.

A member of that Central High School Clan that has plagued our fair campus for so these many years, Chuck can at least say that he got out with a sheepskin within the scheduled time. His favorite pastime is philosophizing on deep and worldly topics. Although one of the best clarinet players Lehigh has had in many years, Chuck's unusual record is that he never annoyed anyone by practicing.

In that well remembered year of 1929, Whitey, having completed his course at Pingry Prep, landed in Bethlehem to continue his quest for knowledge. During his first year, Potter confined his efforts to studying and acclimating himself to the true Lehigh life. His first year passed quickly and the first we see of him in his sophomore year is outside the dispensary selling Burr's. During his next year he became interested in Intramural Athletics and tried his hand in a little of everything. In his past two years Whitey spent most of his spare time hunting and fishing, but the most he ever brought back was a couple of black pheasants and a few miniature trout. Next year, if he is lucky, he will probably be found reading gas meters around Elizabeth, but it is more than likely that he will be found tramping through the New Jersey woods hunting cottontails.

The woody hills of West Point and rows of brass buttons sent Rosy to Bethlehem fired with the all conquering zeal of the scholar and athlete. A deaf ear and a cold shoulder were his only answers to all the wily temptations waiting to engulf him.

Somehow, during a year spent in the proximity of the "Chor", conditions changed. The scholastic zeal abated, becoming the toy of peculiar coffee-consuming methods of study; while even the gentle art of walking became too laboriously athletic. His spirit not prone to idleness (?) projected his powers into other fields; our modern Rosy is the result.

A psychic contract player, an ideal ladies man, (what can't artificial preparation achieve?), an accomplished bull thrower, especially after the twentieth, and the czar of the Chor, yet withall a patron of the arts and from midnight to dawn a student.

LITTLE did Lehigh University realize what lay in store for her when four short years ago this mighty man of diminutive stature entered her portals with fond memories of his fruitful years at preparatory school and dreams of even greater accomplishments during his college career. Not content to await opportunity's knocks at his door, he sought them out and subsequently reaped a rich harvest from the seeds he planted. As a consequence, he found himself overwhelmed with work; but belonging to that class of individuals who are particularly adept at proportioning their business with pleasure, he still found ample time to devote to his social activities and would not deny his long and growing list of female admirers the pleasure of his companionship. Dynamic, energetic, he gives of his utmost to life and takes as much in return.

They say Napoleon was a great man, too.

HAL SILVER, of the Hudson-on-the-Hudson Silvers, is well known to all of us. If, by chance, you don't recognize the face or the name, surely you remember the feet. You know, those huge anchors which have the unearthly aptitude for being in your path—Remember?

In spite of the fact that he is a business man, we have a sneaking suspicion that he is going to end up as a crooner. It's years since we have heard so beautiful a nasal tone.

In view of his work as under-cover man for the Brown and White, he may even end up as "Winchell" for Hudson (one man) Police Department. Can't you just see him telling his chief why Zeke Brown didn't lunch at home yesterday?

AFTER spending a few months at practically every high and prep school in Trenton and New York City, Milt entered Lehigh and dared the University to graduate him. His dare was taken (he was always lucky), and he is now ready for his sheepskin either because of his effort or lack of effort—a point we do not care to delve into too deeply.

His air of reserved sophistication, coupled with a fine sense of humor and ready wit won him numerous friends on and off the campus. His personal charm was his "ticket of admission" to places where others could not tread.

The future of Mealey's is at stake now that graduation pulls this dashing Romeo from the ranks. Recent reports from Winchell have it that the management is willing to pay a large bounty in order to get Milt to prolong his stay in this vicinity.

P. S. He can tap dance and has a girl friend.

If it could not be said that Johnny is the most phenomenal business mind and stock speculator that ever broke even in a market transaction or slept through an investment lecture it could not be said of him that his taste in the matter of campus automobiles is the most sumptuous and luxurious ever manifested at Lehigh, then there is one undisputable superlative which we can claim for him. The pianist never lived who could put forth such a soul stirring and masterful rendition of "Titina." Ah! to think that with his departure into the turmoil of big business the rapture of that grand allegro will no longer cause the blood to quicken in our veins.

Although at Cedar Crest, a certain college for young women, Johnny is considered to be somewhat of a card, he is known to us as a genial and entirely capable person.

In saying goodbye to Herb, Lehigh takes leave of, probably, the laziest individual (barring profs.) That ever graced the halls of (alleged) learning. Herb is big. He does things in a big way. When he decided to sleep through the depression it was useless for anyone to attempt to change his mind. Just as it was useless for anyone to attempt to wake him once he hibernated.

But Herb is talented. Sit him at a piano (but carefully, lest you awaken him) and he will perform miracles before your very ears. His favorite is "Sleep, Come on And Take Me."

Bethlehem was no surprise to this New Yorker. Previous to attending college he had put in some time managing a luggage shop in the big city. Asked his impression of Bethlehem on his second day up here Herb smiled: "Shucks, fellers," he answered, "This baggage business is old stuff."

Time changes and heals all, say the sages. And how true their words! 1933 finds Herb a one-man dog, and on a pretty strong leash at that. His falling in love has been a boon to the profs, too. No longer need they watch him sleep through eight o'clock on Saturday. Nor nines either; nor even tens. The truth is he's not been in Bethlehem on a Saturday for the last two years. And was he missed! You've no idea. Isn't that Fein, Pauline?

AFTER four years at Lehigh we leave Charlie just as we found him—with his heart in Allentown.

Not content with being a private in State Forestry School, Van transferred to Lehigh where he waged a battle on South Mountain and rose in the ranks to Major in the R. O. T. C. On Monday afternoons one can hear his basso profundo ringing out commands on the upper field.

Charlie was able to land a job in the supply bureau because he was the only one in the class able to pronounce Baderschneider.

Not satisfied with his success in the school of business, in the R. O. T. C., and in the supply bureau, Van spent many of his spare moments in the upper gym where he became an integral part of every rough-house basketball game.

IT was back in '31 that Van decided to continue his college education. He had somewhat of an inkling of what college life was when he was out in Lafayette, Ind., attending Purdue. But the lure of Jersey soil and several "sweet things" brought him back to "rest." But being an excitable chap, and not content with East Orange social life, he pulled himself away from "the one and only" and came to Bethlehem to see the world. From all reports, he has been around three times.

There are many noble traits in young college men—sometimes—and Van possesses more than the average. The most outstanding of these are a sense of humor and a firmness of character.

With these, even the depression won't stop Van from soon having a large mahogany desk on which to rest his feet.

BILL, the greasy grind, the blond Apollo, the perfect lad as he is known to his most intimate friends, hails from fine old New England stock, (bonds excluded according to Bishop, oft quoted). He has distinguished himself in athletics and scholarship as well as the gentle art of courtship. He is one of the few boys who has traversed four years of Lehigh or strenuous temptation without yielding to Old Lady Beer. He and intoxication are perfect strangers.

It is rumored that Barnum is negotiating with him to fill the bill of one of his side shows because he is the only lad who has gone through the Lehigh business school and has the desire to obtain good grades. (With the exception of Lathrop, Sykes and Kolyer).

Possessed of a peculiar sense of humor, a most disreputable Ford and a distaste for mathematics, Harry Warendorf, II came to Lehigh.

Four years have passed. Still possessed of a peculiar sense of humor, made more peculiar, perhaps, by three years of devotion to the "Town and Campus" column in the Brown and White, but now having many good reasons (the one in Baltimore alone would do), Harry is leaving Lehigh.

There is no telling what will happen in the years to come, but our principal character, whom, when he gets bigger we shall refer to as "our hero," has ideas of setting the journalistic world on its ear. As we said, he has a peculiar sense of humor.

Harry, however, has his virtues—he certainly is one of our best dressed collegians. Calling him a student would leave, we fear, too much room for argument, but well dressed he is, and Bethlehem will be sorry to see the famous "hat and gloves" disappear.

STEP, shuffle, step is the byword of this young progeny from Reading, Pa. Lehigh has been the saving grace of Charlie (just plain Yaff to you). It is a far cry from the day Yaff came among us, an innocent (?) young ingenu. Can it be possible that this is the same lad who came here in thirst of knowledge? Alas, he leaves us still in thirst. (Three cheers for Roosevelt). For the sake of all those who have just tuned in on this program, I want to say that Charlie went to Hollywood last summer with a Leslie Howard complex, (by special permission of the copyright owners), and returned much the wiser, with a new name and a marked tendency toward the shimmy. Gilda Grey liked his style of execution so well, it is alleged that Charles Travis, nee Yaffe, will be seen on Broadway this summer.

ANDY, as he is better known to us, is one of those happy-go-lucky fellows who always sees the sunny side of life. Soon after Andy left Cuba a revolution was started, which he claims was due to his departure; maybe this is why he calls himself the "Pride and Joy of Cuba." Andy has spent four years at Lehigh trying to find a restaurant that will meet with his approval, and as yet has not succeeded—his favorite actor is Michael Rodent—Mickey Mouse to you. The fair sex of Bethlehem was overjoyed when Andy had a phone installed, but he claims that his popularity would have increased appreciably if his name had been spelt correctly in the telephone directory.

Let's hope Andy that you will soon find the things you like, or at least some girl who will be able to change your ideas—we have tried four years without success.

"YEATES Yee ats," yelled with volume and gusto is a sure sign that Hen is on the job. When he entered Lehigh four years ago as an innocent Fresh little did he reck that he would be:—

Late to bed and early to rise,
Selling ice cream, cake and pies.

Working on the side at Lehigh is tough, especially when taking Ch.E., but Hen has proved himself a student superior to all obstacles. Despite his other activities, there was still time to become one of Harry Carpenter's proteges as a lanky full-back on the soccer team. He took it on the shin for three seasons.

Hen is a connoisseur of ancient chariots, his latest being a dilapidated Essex. He also had an old Dodge and before that (shall we ever forget it!) a battered, rusted Model T touring car.

We'll never forget his singing in the showers.
Best of success, Hen.

PAUL BUSYAN and Baron Munchausen have a rival at last. When Lowry gets his maciliator out and starts weaving stories about Toad Hollow Camp, and starts telling stories of the old West, the two former unexcelled tale tattlers had better look out. Please don't get the idea that all Lowry does is to put his feet up on a desk and let it flow. He has managed to find time to mix work and pleasure. His work has been rewarded by a marked ability to track down missing ions and by a 'Tau Beta Pi key' his play has been rewarded by many friendships and a berth on the swimming team.

Lowry is a person whom you can hardly get to know on first acquaintance. Given a little time you can get beneath what seems to be a shell, and discover his true merits, and given even a little more time you can get into a very editing bull session with him.

When, in the future, you are able to tear yourself away from your troop of boy scouts, drop in on a reunion and bring your maciliator.

Russ is a local boy who made good. A former student at Bethlehem High and then a graduate of Mersersburg Academy, Mr. Dean came back to his native haunts, crossed the bridge and started going to Lehigh.

His leaning toward Chemistry soon led him to a scholastic average high enough to knock anybody's eye out. At the same time his swimming ability won him a place on Pete's swimming squad and subsequently a letter. He stuck with the army through thick and thin, from the time he came 'till the end, shaping into one of the biggest little "soldiers" the local R. O. T. C. unit has had in some years.

It might not seem that such activities as those could possibly mingle, but in addition, Russ found plenty of time for social activities, as his mother will probably attest.

WEIT, well, boys! What are ya up to now?" Our paternal Decker who always calls us boys, for some unfathomable reason, steps forth from his monastical cubicle. To us it is a monastical cubicle, for once inside, the raucous noises of the twentieth century are silent. Only the oil sizzling in the midnight lamp and the silvery waves of *The Blue Danube* flowing softly from an antiquated radio are heard.

Occasionally Decker rises from his assiduous and profound study of ancient works written in a foreign lingo like $\text{H}_2\text{SO}_4 + 2\text{KCl} =$, which we never could understand, and, in remembrance of past pilgrimages to the Allentown Lyric, joyfully croons ancient romances in a student falsetto.

Ah! sadly we watch the midnight oil dwindle. Only one semester remains. Then our exemplar will from us part, to do battle with his sword tempered in the hot flame of a midnight lamp and hammered to hardened steel with the invincible works of yesterday.

MALCOLM is one Chemical Engineer who never has to worry. His record is one that speaks for itself. Malcolm prepared for Lehigh at West Chester High and here at Lehigh has created for himself an enviable record both as a student and as an all-around good fellow. For two years it was nothing but books and study. Then, under the influence of what he thought were good friends, he set out to see life. Al! this was going on unknown to everyone except the trio concerned. The rest of us learned about it only this year. Malcolm has a great habit of planning for trips months and even years in advance. All he needs is an idea, and presto a trip into some distant land has materialized. But who will go? Everyone plans to, but nothing ever happens. Anyhow, here's to k, Malcolm!

This young man came to our fair campus from the only city in Delaware. His nostrils were filled with the fumes from an industrial laboratory and he became intent upon spending his college career in dealing with the mysteries of a testube. In his Sophomore year the continuance of his schooling became a dangerously acute subject, but somehow or other he solved his financial problem and balanced the equation. An odd fellow, this man, who at the end of his college life has neither keys to flash on his breast nor Bethlehem girls to leave behind. Nowhere in all the social activities of Lehigh can mention of his name be found, yet he was always busy. The solution to this problem is merely that he was obliged to employ his spare time in profitable work, which brought no college praise, but made him a "Lehigh Man."

Here is a senior whose future seems assured to be a success, especially with the repeal of the 18th Amendment in view. Long John will then be set, for we all know of his reputation as a home brewmaster. Furthermore, the beer he makes must be good as he occasionally inhales in it himself just to professionally sample it, of course.

Johnnie has managed to keep a good scholastic average and thirty years from now we expect to see him still utilizing his chemical training as an official beer sampler for the government of his ideal land, the ever popular Nova Scotia.

KARL FISHER on entering Lehigh was just another tow headed Dutchman, but four years have produced quite a change in him. In that time he managed to soak up a lot of chemistry, and some other interesting things for which he will remember Lehigh and Bethlehem. He insists he hasn't accomplished much in that time, but we know he's done enough to make his memories of Lehigh happy ones. If all the time he's spent pursuing his studies here, as well as several others in Allentown, has been wasted we're mistaken about him. Karl spent four years playing soccer with various attempts at other activities, and he finally got a letter, if for nothing else than stubborn perseverance. He insists he's going to be a chemical engineer in spite of a depression or anything else, and we know he'll be a good one.

WE are selfish enough to be glad that chromosomers some have played Johnny false. If they had been true, he would have had his father's ability with the brush and palette. Then he probably would not have known Lehigh, and we, him; or if he had wandered into our Arts College, he might have painted us as we really are, which would be worse than never having met him at all. As it is, fortunately, we have as a friend a delightful combination—an engineer with an artist's background and point of view. He is able to enjoy and appreciate things catholically and shrewdly—from "cabbages to kings." With him chemistry alternates with a discussion of the best movies (and you can depend on his judgment of them); physics with a session immortality; bridge with tennis and track; Stokowski with Louis Armstrong. And with him women are no more a preoccupation than the cool glass, for which he has a genuine Munich-acquired taste, and over which he delights in conversationally enjoying life with you.

Look, folks, a mathematical chemist. Orlando reached the Senior year with the unheard of ability to solve differential equations and to integrate. He could still work mechanics problems and would laugh with fiendish glee at Freshmen who flunked quizzes because they did not remember that "forces up are equal to forces down." He reached Lehigh from Forli, Italy via Johnstown, Pennsylvania—a devious route. In spite of his travels he says that the Hill-to-Hill Bridge is unique. We should have missed him entirely if Mussolini hadn't asked him to join the army when he last visited Italy. He came here as a result of his efforts to evade military service, and promptly paid a deposit for an R. O. T. C. uniform. He was such a good soldier that he always was excused from drill attendance on inspection days. Despite his yen for Calculus, he is still a good fellow and we like him.

"PINKNESS" came to us from Riverton (Philadelphia is just outside of it) and in the last four years has become famous as the taciturn iron man of the mountains. No one has been able to discover what, if anything goes on behind that Pepsodent tooth paste advertisement that serves him for a face and in consequence he has been rewarded for his silence by a wide-spread reputation for Sphinx-like profundity.

It has been reported, but never proven, that George has shunned liquor upon occasion, but there is enough play-boy in Haggie to balance the greasy grind propensity which tends to keep him pounding the books in the sanctity of his study at hours when sensible people are either in bed or at Bucky's.

House parties always find him happily employed although his admirers bemoan his singleness of taste in partners. However, he likes it.

Until the axe of economy fell, George was one of Charlie Lattig's crew of thugs which indicates that his benign exterior conceals an inherently brutal nature.

George hopes that the world is waiting for a Chemist (we'll call it that anyway) and we hope he is right.

JOHNNY is one of the boys who answers the question of married or single on the registration ticket with the former word. After taking "Diet's" course in Assaying, Johnny was courageous enough to tackle anything, so he went to Allentown in quest of adventure. There he found one that will last him a life-time. Johnny decided to become a chemist so he could analyze things. However, he decided, after four years of chemistry, that student chemists are more analyzed than analysts. But even so he learned it would take a good chemist to find out where Professor Simmons dug up some of his Chemical Engineering problems or where "Diet" found so many words to put in one lecture. Johnny was disappointed that after four years in the Chemistry Department he had not learned to make better beer. But cheer up Johnny, Prohibition is on its last legs, and maybe you will land a job somewhere as a beer analyst.

Blake Society; Tau Beta Pi; Cyanide; Omicron Delta Kappa, Secretary; Mustard and Cheese; Chemical Society, President.

Sigma Chi

CLIFF HARRISON has gradually gained the respect of all his associates on the Lehigh campus. Faculty members recognize his ability and mental maturity; his classmates enjoy his congeniality and forceful leadership.

At heart a sentimentalist, his devotion to his Fraternity is something to write home about. His college activities, numerous as they have been, are considered insignificant when compared to his activity (both local and national) in Sigma Chi.

But don't let us mislead you. Cliff Harrison is not of the too-serious, overly-righteous type—he is a "regular fellow." The Maennerchor is not his permanent address, but (as one of the two inseparables, Sosna and Harrison) he has been seen there at not too infrequent intervals. Nor have all his none-too frequent dates been with the daughters of Bethlehem's 400.

He remains a strong character and a fine friend; it has been a pleasure to know him.

Chemistry

Bethlehem, Pa.

Soccer (2, 3, 4); Chemical Society (1, 2, 3).

BELIEVE it or not "Johnny" was born without a hair on his head, and at the age of twenty-one his only sign of maturity is his abundant crop of unruly hair the sight of which would make any barber's hands itch. One often wonders if his color-blindness has anything to do with his off-color jokes. When "Johnny" first went out for soccer it was not unusual to see him sitting on the bench with his legs drawn through the arms of a sweater telling Harry Carpenter how the game should be played. However, Harry finally discovered that although Johnny lacked wit, he could kick a mean foot and now Johnny lives in his hard earned sweater. Up to this time Johnny has been unable to understand women and vice-versa. We expect some day to read "LOCAL BOY MAKES GOOD."

Chemical Engineering

LIFE was a very easy-going thing for "Charlie" during his underclassman days, but as his college career—we'll call it that and give him the benefit of the doubt—proceeded, his illusions were soon lost in the ever growing complicity of so-called "college life."

"Chuck" takes his future as a chemical engineer quite seriously. He makes a graphical analysis of all his grades and averages. True to Dean McConn's theories—"Charlie" finds that his efficiency varies inversely as the square of his dissipations.

In some things "Charlie" is as changeable as the seasons. For instance—one of his will-o-the-wisps is that mark of male virility—a moustache. Then, too—his vacillating affections are scattered hither and yon. Chemically speaking, however, his PH (Penn Hall) value is said to be very high.

Perhaps it is Charlie's red hair—"Auburn locks to you," says he—that adds so much to his magnetic personality.

THE "Duke of Dumont's" chief bid to fame lies in the fact that in his four years at Lehigh he set what is considered to be the all-time sleeping record. Ernie's battery of alarm clocks were self-advertising.

After his freshman year, the overworked alarms were replaced by harassed frosh who battled gallantly, but futilely to do what machinery had failed to accomplish—the colossal task of prying Ernie out of bed at seven o'clock.

During his junior year came the great awakening. A bugle replaced the alarm clocks, and a tough army sergeant took up the job where the freshmen had dropped it. Aberdeen Proving Grounds, where the "sprained arm" of the Service trains young Ordnance officers in the gentle art of "goldbricking," was the scene of the army's latest triumph.

"It all depends upon the atomic structure," says Ernie. Success, we are sure, will be his in Chemical Engineering.

WITH the exception of a few gray hairs, "Milt" is still the same sincere, good-natured fellow that entered Lehigh four years ago. He claims that he has never been in love which is probably due to the fact that he is a chemist and treats each girl as an experiment. His only regret is that his studies interfered with the advancement of this interesting research. According to Milt, he came to the wrong college—they haven't got a checker team here. In fact, it's just one jump after another so be careful girls don't make a move. Friday nights Milt could be seen making his way toward the Nativity dance where he would trip the light fantastic. No doubt the attendance will now fall off. Incidentally, ask him why he received a copy of "Mother Goose Rhymes" at the chemistry banquet.

As here we have the Paragon of Virtue, the boy who never did anything wrong except once or twice, who never cursed his profs except maybe, once or twice—to be brief, the boy who never did anything except maybe once or if he liked it—twice. The boy with a heart of virtue and a soul as driven as any snow flake, but one who will someday make good. He aims to leave this world of test tubes and strange looking apparatus for a world of sunshine and beautiful women where beach combing is still an infant industry compared to what it soon will be when endowed with the splendors of his scientifically trained mind.

As a Chemical Engineer John has found that there is really "nothing to it." The department has made every thing easy for him except for finding him a job. He has safely negotiated all of the end-points, door knobs, and frictionless pistons that the Chem. department has thrown his way. He has mastered the technique of graphite analysis to perfection. Being very bashful, he has avoided pretty girls throughout most of his college career, but he spends a good part of his time dreaming about them. John is manager of Freshman wrestling, and has guided our grappling frosh over the temptations and shoals of strange cities. If he doesn't go astray in New York City at Easter time, we will look for him in the bread lines with the rest of us in June.

FRED, an adopted son of Bethlehem, received the greater part of his preparatory education at Liberty High School. However, his parents did not wish to risk sending him to Lehigh at a tender age, so they sent him to Wyoming to mature. Upon entering Lehigh Fred seemed to be quite a mature and settled young Freshman, but he soon did an about face. He has been raising Cain in one form or another for the last four years; he is Lehigh's champion beaker-breaking, water-squirting chemist.

During the course of his four years at Lehigh, Fred has followed the beaten path to Fem Sem quite a few times. He is truly a human handbook for that feminine institution. Lately, however, he seems to have found that his own school offers fair attractions even though it is not co-ed.

It was the dark and dreary Fall of 1929, under which portentions sign, one Jack Skelly entered the gates of Lehigh University. He, fresh from four years of high school and a year at "Kiski," had a lot of bad ideas about college, some of which he yet retains. But the majority of these opinions were lost in the battle for grades and football team. Being only moderately successful in each, he was somewhat discouraged and turned to other things, some liquid, some feminine, and some philosophical. However, he did not lose sight of his guiding light, Chemistry, about which he described orbits of eccentric design. Finally, making his mark in football, but suffering setbacks in his scholastic career which necessitated mid-summer exposures in Bethlehem, he plunged blithely and blindly on after elusive wisdom, even unto graduation, his reward for perseverance.

Jack will never, we are confident, realize the difficulties of graduate work, but will go forward blissfully to success with a pipe in his mouth and a book on some "unrequired" subject in his hand.

Chemical Engineering

"To believe that we know nothing assuredly, and cannot ever know anything assuredly, is to take to much on faith." This murmured Bobby as he entered Lehigh after the depressing years at High School. And in his Freshman year he grudgingly admitted that other people did seem to know something. And in his Sophomore year he announced—so the story runs—that he thought himself capable of knowing something. Then came the halcyon days of Upper Classhood, bringing what people call wisdom. And in his Junior year he was heard to say that nobody but himself knew anything. And in his Senior year he kept his thoughts (sic!) to himself, and it was apparent to all those who watched him in class that he had become an expert horologist. And his story is called "The Making of an Anthropoid, or an Outline of Man."

Chemical Engineering

Bethlehem

Freshman and Sophomore Honors, Arcadia; Pi Mu Epsilon; Chemical Society.

AFTER four years incarceration on Birkel Alley, Bill has acquired a permanent air of injured innocence because of apologizing so often for entering the wrong house. But back of this, so he says, lies a mind humming with the problems that beset humanity. We wonder. His chief achievement was having a higher average than his brother for one semester. With his brother, Bob, and Graziani, he could be found any day in the Chem building. The three always finished Lab early and were at once the pride and the thorns in the hearts of the faculty. According to Bill, arithmetic was invented to befuddle the common people. So he never paid any attention to it until he took C. E. 6. He claimed that Simmons actually liked him and only bawled him out to see if he could make him work. Whatever happens, he'll go on his way rejoicing.

"Tony" is a born engineer, although his ears aren't shaggy, and he abominates Calculus and Anty Mach. It's quite a treat to hear him expound on the wonders of New York Harbor, the majesty of The Bridge, the mysteries of The Tunnel, or the grandeur of the New York sewage system. He's a patron of the arts (never mind which ones), and a potential All-American parent-or parent of All-American material, as you wish.

He was five years younger and much more innocent when he first walked the campus. That was before a night at Mouch's, before the days of poison ivy, and before Rosie. These and similar factors have each contributed their bit, but the result really isn't half bad. He's been a pal to everyone who knows him. Meet "Tony."

Civil Engineering

Theta Xi

Soccer (2, 3); Interfraternity Council.

ONCE upon a time, quite a while back, but not far enough, there came something up from below the Mason and Dixon Line that thought he should enjoy engineering—and he was so dumb! However, it seems he was quite a man of letters and of athletics during those early days, but since that time the hometown has been discovered and all is easily understood. So now he has become just a senior, still dumb, and trying once ever so often in athletics. And by nature he is unassuming and so quiet that as yet there has been no trace of a beautiful girl at all; but perhaps there's someone in that hometown again, for we could not find out all. So when he finally leaves us for that place down there, we hope he works no harder and can sleep all day there, too!

A "CAMEL," and a windbreaker worn by a dark, methodical, militaristic (acquired at Staunton), and—last but not least—smooth, young man! Yes, sir! That's Harry.

History? Plenty! Harry entered Lehigh several years B. C. (before the crash) and immediately began to see of what Bethlehem was made and how it worked. After three semesters of indifference he took a sojourn from school.

A year later Harry arrived from Vineland again—much more serious. Since his rejuvenation, Harry has had the Civil Engineer department digging deep—with long sighs—into their jeans for A's and B's. Of course, since he has found out how this little town works—he likes to run it! But not with as much gusto as previously.

Anyhow, Harry says, it isn't every man that can say he belonged, at one time or another, to the classes of '31, '32, and '33.

Here's luck, Harry!

Who would imagine on glancing at this serious likeness, that this young man has been a political boss and social arbitrator of the Class of '33? Although Pierce came to Lehigh heralded as a prep school athlete, his activity in the realm of sports has consisted mostly in managing the yearling basketball team. P.J.'s list of activities and honor societies is not only varied, but includes most of the worth while accomplishments in a college career. Nor have Pierce's achievements been confined solely to the activity side of college life, for he is a member of that society which is the engineer's dream—Tau Beta Pi.

We all think highly of the Irishman and expect to find him some day building bigger and better roads for the State of Maryland. If our prediction comes true, Lehigh will some day have another son in Who's Who.

Four years ago Bob came to Lehigh from Frackville with a hazy idea of college, its life and the corresponding requirements. As soon as this young man got settled, he set up two goals as his objectives—first, the Civil Engineering course was to be mastered, and second, the tennis team was to make room for his name on the line-up.

Did he reach these goals? Bob got off to such a start that at the end of the first year he was made president of Phi Eta Sigma, honorary freshmen society. Not content with this honor, Bob plunged ahead and in his Junior year became a member of Tau Beta Pi.

For two years Bob was a regular on Dr. Carothers' tennis team. At the end of his Junior year Bob had one of the best individual records of any man on the team.

Best of luck to you, Bob.

Civil Engineering

Civil Engineering Society.

Price Hall

From a military school near the northern out posts of American civilization, there came to Lehigh a prospective Civil Engineer, named Hans. Today we are congratulating him upon the completion of his course, and assuring him that he will share the success that has always come to Lehigh men in the field of engineering.

Hans has led a quiet life at Lehigh. He distinguished himself as an assiduous student, and despite a rather retiring personality he made many friends. During his senior year, some mysterious force kept drawing him in the general direction of New York, the source of his many letters. Although it is unwise to speculate about the permanent effects of this attachment, it seems unlikely that Civil Engineer Hans will be immediately available for work in some distant community.

Burr, Advertising Manager (4), Business Board (2, 3), Review, Circulation Manager (3), Business Board, (2); Newtonian Society; Cyanide; Sword and Crescent; Pi Delta Epsilon; Mustard and Cheese Club, Secretary; Civil Engineering Society, Vice-President; Interfraternity Council.

This handsome lad is universally known as Demi—because of his stature, or rather, lack of it. Four years ago he came out of the West with a reputation as a scholar and an athlete. He quickly realized that college athletics were not his forte and that studies are not everything.

Since that discovery, Jack has turned his attention to many things, and has won distinction in varied fields, including that of romance. He is well known as the dynamic advertising manager of the Burr, and the Mustard and Cheese Club owes him a debt of gratitude for his services as secretary. In addition to all his activities, Jack has managed to secure a degree in Civil Engineering—no mean feat in itself.

Such a remarkable young man cannot help but succeed in life, both as a business man and as a Casanova. He goes forth from college envied and admired by all.

Bob claims East Orange, N. J., as his own home town, and, having lived there since 1911, he thinks it is a pretty good place. Believe it or not in the near future you will surely ride over those highways built by this energetic "entrepreneur" of modern highway construction. "Geet 'em up! Geet 'em up!" Sure enough, that's Bob himself, and how he likes that expression. Bob has always had a weakness for Lehigh. As for South Bethlehem—not at all. When it comes to location, give him the rock-bound coast of Maine. During the fall, Bob always had a hard job deciding whether to spend his afternoons hunting or playing football. So he ended up with a compromise, getting both his season's game limit and his football letter.

A short character sketch of Bud? Impossible! But if you must have a glimpse of him, why not listen in, concealed near his room in the dormitories?

4.00 PM—Mars: "Hey, Bud! How about a workout?"

Bud: "OK," and the two are off to the wrestling gym.

5.10 PM—Charlie: "Yo Bud! Goin' to eat?"

Bud (descending via standpipe): "Yo."

7.00 PM—A brother Civil and a Business man simultaneously:

"Yo Bud! How about the Concrete?"

"Hey Bud! Goin' to a show?"

What a dilemma! How would Frank Merriwell have solved it? How did Bud solve it? Differently!

10.00 PM—A commotion, peals of laughter, wheezes, coughs!

The crash of overturned chairs. Fellows gather in a doorway watching Bud defending the name of Thomas with a cradle hold.

Midnite—The University Yell or "Sweet Adeline" from up yonder. Bud and MacGuffie in the shower.

Personality plus? You said it! Good luck, Bud!

"THAT sentimental gentleman" from Myerstown has brought to our Alma Mater many of the peculiarities so characteristic of the "Pennsylvania Dutch." But Morris has proved that the "dumb Dutch" are not so dumb, for at full sail with colors flying, he has been awarded some of the distinctive honors of Lehigh.

Fascinated by the intricacies of bridge construction, he decided to accept Civil Engineering as his profession. He did not wait until graduation, however, to begin his professional career, for during the last few summers he tried with utmost scrutiny to make Freshmen engineers run straight lines and drive stakes.

Many times, however, Morris has neglected his stresses to meditate on a more serious problem of corresponding with a certain some-one who is pursuing her education at Stroudsburg Normal School.

Morris' high hopes and ambitious thoughts are so resolute, that we are sure nothing can repress him, not even the depression.

SEPTEMBER, four years ago, saw "Shorty," known also as "Zah," drive up the Lehigh campus. It seems that the highway which he traversed the first day, now has suffered from the heavy traffic over week-ends, caused mostly by that green roadster. Yes, very frequently "Shorty" makes trips home (?) to the mosquito lands of Northern New Jersey.

At Lehigh, this quiet, but dexterous man busies himself with many activities. Among those is the valuable leadership that he has given to his fraternity. Managerial work for Coach Kanaly and the barriers is another of his diversions.

There is a certain finesse connected with "Shorty's" work. He is thorough and firmly believes in doing all work well. Not only that, but he also believes in doing the work on time. Promptness and thoroughness show the reasons for success.

Quite a change has come over the North Hackensackian during the past year or so. After coming to Lehigh and remaining a decided "woman-hater" for three years, Shorty has this year astounded his classmates by turning his thoughts towards the romantic ideals of life. And now he journeys home (?) as often as possible; while at Lehigh we can find him awaiting the time when Don Bestor sends his lyrics over the radio. Is it WORTH it, Shorty?

HERE is a young fellow, who almost four years ago followed his usual impulse of doing the opposite of what is accepted as standard. He did not "go West," but instead came East to engage in activities at dear old Lehigh. "Swenson" as he is more intimately known amongst his brothers and classmates, comes from the corn cluttered plains of Wisconsin, in which state is the good little town of LaCrosse, where Swedes seem to abound. He came to Lehigh as the freshest of Freshmen, his rosy countenance significant of the good corn diet and the healthy atmosphere of the West. Pleasant, unassuming, and always willing to do a good turn, he quickly made friends in spite of the fact that he was not a glorious athlete, or a campus politician. He soon found himself in the midst of a terrific headache—the Electrical Engineering course. However, he managed somehow or other to get through, and is now about to join the ranks of the unemployed.

Electrical Engineering

HAVING from Montrose, Philadelphia, and points East, Ben tore into Lehigh riding a wicked Ford coupe, and seemingly hasn't learned how to take his foot off the accelerator yet, for he has sailed through Lehigh in three years.

There is a rumor about the campus that Ben has given Dean Curtis another grey hair due to cuts, but classes are not the only things that Ben has been late for—he has regularly served as night watchman at his fraternity house as well as caring for his regular duties.

Although he has dated the weaker sex occasionally, Ben evidently has not had much time for such activities; however there have been quite a few week end excursions that will bear explanation.

If ambition and activity are indications of a man's future success, this man will not wait long for recognition. Until that time, let's have the old smile, Ben.

Football (1, 2, 3); Wrestling (1, 2); Baseball (1, 2, 3, 4); President, Lehigh Union; Vice President Interfraternity Council; Arcadia; Freshman Honors; Newtonian Society, Phi Eta Sigma, Pi Mu Epsilon; Tau Beta Pi, Vice President, Phi Club, Treasurer; Cyanide; Sword and Crescent, Omicron Delta Kappa, Vice President; Electrical Engineering Society, Vice President.

BEWILDERED and dazed he came among us in his freshman year. We thought that time and the "easy" atmosphere of college would bring him back to a normal state, and so took pity upon him. But as the years passed and improvement came not, we dubbed him "Foggy" as an explanation for his actions, and gave him up as incurable.

Clad in his grandpa's flannel shirt and pants, he loses himself in those cherished plans for cellars, or boat carving, or carpentry, and Gabriel himself might blow his horn without breaking those vacuous contemplations.

When he remembers to attend college, his efforts seem to run in queer cycles. Thinking himself a speed demon, he has become "Steamboat Bill," the snail of the base paths. Having a hankering for architecture, he studies engineering. Loving food, he is never on time for meals. But he does hold true to that German ancestor and go straight toward the 'chor.

Electrical Engineering

Taylor Hall, Sec. D

Freshman Honors; Newtonian Society, Eta Kappa Nu (3, 4), Secretary (4); Musical Clubs, Accompanists (2, 3, 4); Electrical Engineering Society (1, 2, 3, 4), Cabinet (4).

As a freshman, "Walt" was an authority on mechanics, much to the satisfaction of needy classmates. As the years rolled on, he became interested in more serious diversions, such as Swarthmore (4 years at Lehigh hasn't changed his passion for Titian blondes, either), the Musical Clubs, and young peoples' religious work. From the latter association he appropriate the title "Deak," and "Deak" he remains.

Classmates soon discovered that Walt was also an authority on the organ (cum peale)—ask him, but don't stop to listen. Many and varied are the parts thereof).

Under the guiding hand of his younger brother he developed the spirit of a loyal Lafayette rooter. Gripped Drama, organ recitals, vespers—all these and others attracted him to "Laffyet." Just between you and me, he sat in both cheering sections on November 19. No, not at the same time.

JOHNIE FRITZ came to Lehigh direct from Reading, the stronghold of the Dutch. One of the first things he became interested in was swimming, and he has been very active in that sport ever since, as witnessed by the fact he has won a set of numerals and three letters in that sport. Another of his interests was Electrical Engineering, and Johnnie spent a great deal of time in Prof. Seyfert's department. "Dutch" is a conscientious worker, not brilliant, but steady. He is a pleasant man to have around, and makes friends easily. Johnnie has always been right there where women are concerned. He doesn't go out much during the week, but whenever there is a dance or party of any kind, "Dutchie" is always sure to have a smooth girl.

"E" came to Lehigh four years ago, more or less all "steamed-up" about Electrical Engineering. His first interest in electricity was aroused on his sixth Christmas morn, when his new electric train refused to run because the reversing switch was in the neutral position. This interest was augmented, when as a Freshman in High School, he received a minor prize in the Edison Home Lighting Contest.

He chose Lehigh because an enthusiastic Old Grad convinced him that electricity was more powerful at Lehigh than at any other engineering school. After four years as a student electrical engineer, he has learned that the classroom shocks are more powerful than those received in the laboratory.

During the Spring and Fall "Ev" could usually be found on the courts at Steel Field. It has been rumored that he swings a wicked ping-pong racket during the Winter months.

He hopes in the immediate future to secure a job somewhere in the electrical field, from which he will in time be able to advance to a position along managerial lines.

His favorite, but aggravating expression—"not so bad."

Electrical Engineering

Alma Mater

Track (1); Brown and White (3); Freshman and Sophomore Honors; Newtonian Society; Pi Mu Epsilon; Eta Kappa Nu, Associate Bridge Editor (1); President and Treasurer (4); E. E. Society, Secretary (4); A. I. E. E.

Bob arrived at Lehigh fresh from Arlington; not the cemetery where they bury their dead, but Arlington, N. J., where they let them walk around.

However, it soon became apparent to his friends that Bill was not a dead one. He chose the E. E. course as his particular line of endeavor, and it was not long before several young ladies in town became aware of his magnetic qualities.

Bill's early life along the banks of the Passaic River evidently furnished the necessary training to enable him to pilot plenty of schooners across the bar, and, at the same time to collect most of the scholastic honors available. In fact, Bill is another of those knowledge etc.—thirsty men who have made Lehigh famous in the past, and it is a certainty that he will continue to succeed in the future.

We wish Bill good luck, but we doubt if he will need it—he has what it takes.

Electrical Engineering

Bethlehem

A. I. E. E. (1, 4).

PEARS the fact that Bob's Alaska account for Bob's excessive warmth. Up there men are men, we hear, and there ain't no women. Bob's chief acquisitions from Lehigh have been two very weak mustaches, a profound interest in the medical profession, and a skill in cooking his own meals which he hopes will stand him in good stead when he builds a power line across the Andes and wants to try himself some Llama chops. One suspects that when Bob finally makes his choice between night nurses and kilowatt hours, he will make his choice between fame and family. Beyond all that, Bob possesses the proverbial heart of gold, which, nevertheless, does not preclude a leaven of mischief nor a bit of tolerable density, not too frequently in evidence. A diabolical luck has often saved him from his just deserts.

Allegan

Baseball (2, 3, 4), Freshman Basketball, Electrical Engineering Society.

JERRY is a very quiet boy—when he is asleep. When awake, G. E. is one of the jokers of the class; with him, life is just one broad grin, and his smile is so infectious that gloom soon departs with his advent. During certain lecture periods, Jerry has a pondering look upon his countenance, which the professor interprets as an indication of interest in the course, but in reality Jerry is thinking of the lighter things in life. Next to women and studies, Jerry's chief trouble is keeping gasoline in his Ford. He is responsible for keeping the lives of the citizens of Allentown and Bethlehem in jeopardy during the last four years. Jerry thinks that the highways between these two cities are race tracks, and that he is trying to break Major Campbell's Daytona Beach record. Jerry is an ardent sports' lover, and after two years of hard work on the variety pitching staff, he has been promoted to "chief fungo batter."

Electrical Engineering

Omega Phi Sigma

Baseball (3, 4), Electrical Engineering Society, American Institute of Electrical Engineers.

"VAN" came to Lehigh in the days of prosperity. Being a progressive fellow he joined up with the electricals and has remained with them ever since. During his sojourn here he has acquired the strong character and high efficiency this University offers.

With all its pitfalls Bethlehem has never been able to call "Van" one of its rogues. In his four years he has been quite the gentleman, the main reason for his manly actions is a certain some one called Mabel.

His hobbies are photography and radio. The former has lead him to make many valuable photographs pertaining to his profession. The latter—well he is interested in radios, but his own favorite could hardly be called that.

He has formed quite a circle of friends, and his name has traveled from his home department to most of the departments of the college. By mixing his time with the proper proportions of study and recreation he has had a very successful college year.

We call him "Skipper," cut down to "Skippy," because he steers such a calm, even course no matter how rough the sailing is. Nothing changes the even tenor of his life. The high-spot of his Lehigh career was his hero act when, clad in pajamas, he gallantly clambered up a ladder to rescue a lady's pet dog and parrot from a burning house. Alas, there was no fair maiden waiting to be carried down. Perhaps that was for the best; the maiden wouldn't have much chance in the competition for Dick, especially since the advent of his "muzzy," as he calls that smudge on his upper lip. It's strange how that, a well fitting uniform, and the glamor of an arm in a sling attracts the girls. Yes, the "Baron" is in the army too, besides being an E. E. His electrical training comes in good stead when the fuses blow out. We'll miss his magic touch with fuse-boxes.

RICHARD LEE SNYDER, JR.
GLASSBORO, NEW JERSEY

"The Baron" "Skippy"

Epitome, Asst. Business Manager (4), Advertising Manager (1), Arcadia (4), American Institute of Electrical Engineers, Lehigh University Branch (4).

Art came to us quietly and unassumingly, but nevertheless he came here knowing the two important goals he wished to reach. The embryonic body of four years ago, then obscured by immaturity and anthracite dust, today is seen in full development—he is graduated an engineer and a lover. Gentlemen of the faculty, we suggest two diplomas, one in sheep's skin and one in silk—could you accommodate us?

Incidental to the appreciation of Art's better characteristics we have become familiar with his unusual sense of humor,—that ability to laugh at someone else's misfortune. Art, this will be a valuable asset to you if you should choose to enter the field of politics, as many of us believe you will. Break the strong arm of your opposition and laugh—that's the way of the world until the Millennium.

We are sure of one thing, Art,—you will be a great engineer. Your political ambitions? Well, remember the American people forget quickly.

Electrical Engineering

Delta Upsilon

Basketball (1, 2, 3, 4), Track (1, 2, 3, 4).

AMONG the other notables in this book, we present the famous and renowned James Willenbecher, who is daily mistaken for John Barrymore. In going to Lehigh, Jim has acquired other than a B. S. in EE, he is also qualified as a race track driver through his many thrilling races between Bethlehem and Allentown with his pal, Mintz.

When Jim entered Lehigh he had a very definite object in view. That was to get everything possible out of the University. Jim has more than kept up his studies and at the same time has retained his unquenchable humor. With this spirit we are sure Jim will succeed with any thing he undertakes.

EDGAR "Egg" Withrow from Manasquan, N. J. is 6 foot 4 inches can be viewed from the surrounding territory much like the P. P. & L. Building in Allentown. He has a peculiar aptness for assuming many and sundry positions when walking on ice that are much more comical than graceful to say the least. His outstanding athletic abilities when in college have been in dancing, basketball, and track, with emphasis on the dancing. Being an electrical engineer probably accounts for his activities in the terpsichorean art. Whether he is trying to emulate a live wire or an electron is a decision we mortals hesitate to make.

INTRUID and dauntless, Bill made his way from East Orange to Lehigh with the honest intent to become an electrical engineer. And despite the overwhelming and explicable attraction of "Ye Ice-Kist Shoppe," he seems in a fair way to succeed. But he has not let studies interfere seriously with his education; Bill has come to be a reputable connoisseur of the cinema—and other things.

His irresistible impulse to seek the arms of Morpheus during classes is counterbalanced by and attributable to his remarkable ability continually to "throw the bull" far into the night with no apparent loss of energy. For he will utter sagacious or inane remarks, as circumstances may or may not demand, at any time or place,—but particularly in his sanctum, the well-known "Ice-Kist"—and upon any topic in the whole gamut of human activity. Such vigor and enthusiasm, properly directed, cannot fail.

Engineering Physics

Bethlehem

Secretary-Treasurer, E. W. Brown Astronomical Society, (2, 3); Vice-President Lehigh Physical Society, (4).

Howard lives in the nation's Capitol and is hopelessly proud of it. He reluctantly travelled north of the Mason-Dixon line for the obvious reason that Lehigh University is not south of it. By profession he is an engineering physicist, and has sufficient special interests and hobbies to supply a dozen ordinary persons. The fellow is unshakably convinced of the inherent superiority of all engineers over the arts and business men. Yet in spite of himself, Howard has graciously "condescended" at times to present both other colleges with his beneficent presence. After graduation, the southern gentleman desires to return to his beloved city and serve a "stretch" as junior physicist at the Bureau of Standards. He says the place offers training and experience par excellence. Really, Howard ought to know what he is talking about. Then again, he is thinking seriously of pursuing graduate studies if the other idea goes awry.

Had he only lived earlier Diogenes' task might have been made simpler. His lantern's rays would have beamed upon this chap who possesses the wisdom of the owl, the curiosity of the woman, and the simplicity of the child. Though his life at Lehigh was spent without "Wine and Women," there *was* "Song." Strange as it seems Professor Shields seduced him each morning with his organ melodies for an entire extra semester.

For him there are two escapes from life. One, the week of the Bach Festival, and the other, the daily visit to the handball court that brings him home each night to a cold dinner. It will be like a stormy coast without a beacon, when he leaves his less capable fellow students to snuff for themselves in the quandry of their math courses, for heretofore, they have been guided by him and had followed in the wake of his brilliance. No longer shall their phone calls, ringing far into the night, bring them succor.

There is no need to wish him well, for it is written in the stars that he shall take his place among the supermen.

IN the fall of 1929, there wandered onto the Lehigh campus a wide-eyed boy. This boy wore a black tie, black socks and a Dink. His name—you guessed it—was John Lohse. After attending all of his Engineering Conferences, he decided that the Physics Department put on the best show and therefore proceeded to put his fate in its hands. Somehow, or other, he managed to go through three years of his College life with the mere nickname of Jack. But in his Senior year, a Sophomore, due to the influence of the Four Marx Brothers, decided to call him "Wagstaff." This name has struck, and he is probably cursing the Sophomore as well as the Four Marx Brothers. Wagstaff is a humorous, fun loving fellow, and is very fond of practical jokes. His only fault is that he is a one-woman man.

SEPTEMBER 29 brought to Lehigh a former inmate of Cheltenham High. This poor fellow, innocent (?) as he was, soon fell into the ways of all wicked Lehighites. One night Bob Myers took a glass of beer and did he wobble! The Sophomore year produced a changed man. Why? Because he fell into the hands of the physics department. Poor boy, he started to fail, so he changed to Arts and majored in math, spiced with a smattering of physics. In the Junior year all his innocence was gone. (The effect of the English department was starting to register). The fair sex of Philly attracted his attention. Really, he made some progress, he held her hand one night. And, oh, how those darn cars did break down in the country! Alas, the Senior year came around, but this was the downfall of poor Bob. Just ask the fair Sophs at Liberty High!

"Dick" or "Andy"

Industrial Engineering
Arcadia (4), Group 13.

Bethlehem

"Dick" ANDREWS hails from the far, far West, where the men are men and glad of it. Salt Lake City is his home town, and for two years, Dick attended the University of Utah, until he transferred to Lehigh. From Allentown, he travels daily to join us in the pursuit of wisdom and witticisms.

His major interests are Industrial Engineering (with omissions), movie lab, and tall stories. Well, anyway they sound so to us. He'll debate it, if you like, but remember positively no facts are allowed. He still seeks the answer to that grave problem, "How long is a piece of string?" He declines athletic honors, but fought with truly noble spirit on the Industrial football squad.

It's mighty hard to remain faithful to a lassie in far away Utah, but Dick claims it's easy. Who are we to doubt him anyway?

WILLIAM C. AUCOTT

"Bill"

Mechanical Engineering

Bethlehem

Band (1, 2, 3, 4); Musical Clubs Orchestras; Mechanical Engineering Society.

SOME twenty years ago a fellow, known to his classmates as Bill Aucott, came into the world in Philadelphia. Entirely unknown to Bill, his wagon was hitched to a star that was destined to make a stop in Bethlehem in September, 1929. Upon arriving, Bill followed in the footsteps of that famous Patron Saint of Mechanical Engineers Saint Patrick.

Bill doesn't confine his efforts to studying, however. For the past four years he has been an important figure in Prof. Shields' aggregation of trumpet players in the band. The fact that Bill spends practically all of his weekends in Philadelphia probably explains why Bethlehem girls hold no appeal for him. We have often wondered.

I don't think any of us will ever forget Bill. How many times has he put the whole class in an uproar with that laugh of his, much to the embarrassment of some wise-cracking professor?

Industrial Engineering

Delta Upsilon

JUST another indifferent, industrious (?), Industrial Engineer—born a New Englander, raised in the Garden State, and educated among the Keystones. That's his history, but I suppose I must continue.

He arrived from F. and M. Academy full of the possibilities of being one of those rare combinations of an athlete and a scholar. Of the two potentialities one has not materialized and the other still lies dormant. Running to make his eight o'clock at quarter of nine and hiking to the lookout before sunrise are the limits to his athletic prowess.

Though generally a quiet individual, Fuzzy does have his sudden, spontaneous, animated, ardent, impetuous, and unconventional outbursts of fire, fume and fury. At any ridiculous hour he has been known to go shuffling off to Buffalo, Boston, Baltimore or heaven knows where.

With his technical training and loves for travel, women and tea, Fuzzy is eligible to sit and wait for the new deal. Nuts to you, Fuzzy.

FIVE-FIVE, blue eyes, wavy-blond hair and a living example of a human dynamo, briefly describes Walter Bachman, better known as "Pete." This phenomenal product of modern education stands ready at any time to launch into an argument of any nature; and he demands that facts be used—this immediately disrupts the argument.

Although Pete is driving his way into the field of the "uncultured" engineer thru the Industrial school, he shows a strong inclination towards the stage and intricate methods of high finance.

The girls never fail to blossom forth in their best smile and pass a cheery "hello" to this diminutive giant—although Pete will argue at any length that he knows no girls. Still, the prized smiles of Bethlehem are bestowed upon his equally beaming countenance.

Perhaps, if properly approached, Pete might offer some explanation of this strange power, coveted by many and acquired by few.

THE Salem (N. J.)—Pennsgrove trolley line was recently sold to a junk dealer for \$3,000. Rumor has it that the dealer was acting as agent for Whoops Bailey, the Industrial Engineer, who proposes to re-organize the line and have it resume operations on a paying basis.

Chan—his friends are proud to call him by such familiar appellations as "Chan," "Whooper," "Oh for-sake Bailey" etc.—is really a dear little chap, but he's a deep one. He claims par example that he's never been out with a Bethlehem wench, that he doesn't drink, and that questionable words are to him harsh throat irritants. We still insist that he's a dear little chap, and we most sincerely hope that Pennsville's past-times will not corrupt his sweet nature.

Mechanical Engineering

Brown and White Board (2, 3), Brown and White Make-up Editor (3), Mechanical Engineering Society (2, 3, 4), Student Member A. S. M. E. (4).

THE only obstacle to Jerry's plan to be a real engineer was the many miles separating Lehigh and Syracuse University. However, he was determined to become an engineer and so he came to Bethlehem. Immediately the post office put several new men at work and the telephone company declared an extra dividend. After a year of writers cramps and stationery bills, Jerry became desperate and entered into that state known as matrimony. Now he was a citizen of Bethlehem and became one of the slaves of the penny-snatcher at the New Street bridge. Gradually and nonchalantly the years were tossed aside.

He has a head start on the rest of the class being a family man but he doesn't hold that against us. Now he stands with all of us proudly waving his sheepskin while his little blonde daughter chews on the worn sly stick and gurgles "Da Da"

This business of getting an education has always struck "Ken" seriously. But one may see from the list of accomplishments here credited to him, that his idea of an education is a very well rounded one.

Although he was so effectively weaned in his earlier years that he has never gone back to the bottle, Ken has found plenty of time for those lighter affairs that brighten the lives of men and give them a better perspective. In particular, he has found it necessary to devote many week ends and prolonged vacations in none other than the old home town, Collingswood, New Jersey. And the dames do not seem to be at all backward in giving him the hand either.

It is true that great success comes only to those men who are affably received by their fellows, who are able to weigh all things and keep them in good balance, and who are able to carry things once started through to a definite finish, then Ken, my erstwhile room-mate, bids well to succeed.

Wrestling (1, 2); Nonet (3); Freshman Football Managerial Competition; Soccer Managerial Competition (2); Golf (2, 3, 4); Captain (4); Arcadia, Industrial Engineering Society.

Buck's friendships are not limited to a chosen few, for wherever he goes he finds, makes, and keeps friends. Take the "Dutch Engineers" for instance. On his way over to Europe a few years ago his utter cosmopolitanism formed for him three lasting friendships with three of the Volendam's crack engineers. Since then he has spent many enjoyable hours with them, when their "ship comes in."

A glance into his room discloses evidence of his varied interests and achievements: A picture of Edith in a striking frame of her own design; innumerable trophies and prizes indicative of his successful conquests on the links; and fraternal emblems, seals, and magazines which clearly evidence his love for Sigma Chi. His major collegiate achievement was his election as Consul of his Fraternity which has earned for him the sobriquet of the "Worthy Barrel" among the brothers.

Incidentally Buck's greatest ambition is to own a Tuxedo in which the vest and the pants meet.

Tennis (1, 4), Captain (4), Fresh Basketball, Intramural Basketball and Football, Industrial Society.

One morning back in the prosperous days of 1920, the Fullerton Limited brought our boy Charlie to Bethlehem. Armed with a diploma from Catasauque High, he was looking for new worlds to conquer, or else to be conquered.

Following a long line of relatives, Charlie entered Lehigh as an embryo Industrial Engineer.

In his Sophomore year Charlie became one of the four horsemen and also helped establish the T. L. B. For the remainder of his college life he has been one of the chief mainstays of the organization.

Charlie branched out in his Senior year and added his musical talent to the church choirs. This is in addition to the piano playing he has done throughout his school life, both secondary and college.

After the completion of his term of study, commuting, and sleeping, Charlie is out to do and dare.

As though his mother had often warned him, Charley succumbed to the call of higher education with the result that four years ago, we saw a huge pile of tennis rackets and slip sticks tumble from the train from Chicago. Imagine our surprise, though, when a plaintive voice in pure Chaucerian asked us where in hell he could find a place to tune up his tennis. Since then Charley has been a model ball bouncer and slip stick slipper.

Despite the University's usual determined efforts, he has remained an engineer in more or less good standing for the complete period. His greatest vice has been women, but he has confined his love nests to the sacred region of New England and with astonishing results.

As for his private passion, poetry, we are all quite sure that some day he will be a great maestro. And with that and every thing else in mind, we wish him the best of luck.

Mechanical Engineering

Alpha Kappa Pi

Football (11), A. S. M. E.

LONG suffering Suffern breathed free at last—that Coe boy out of High School without having to burn the school down—.

After the first semester at Lehigh, plus the ravages of a dislocated elbow from football—a few cracked ribs from divan wrestling—and a bad attack of athletes foot (you see Merritt never got that weekly habit because Suffern is 80 miles from the nearest water puddle)—Merritt decided with strong McConnian influence, to grace our fair campus for five years and three summer sessions.

Before we conclude with our best wishes, we want to remind him to never, never forget to hang on to his hat—remember the Rutgers Houseparty when Coe was so occupied in the rear of sedan that his new Stetson disappeared, and wasn't found 'till five hours later—with a flock of heel marks and a Mack Truck tire impressed on it?

Mechanical Engineering

Taylor Hall Sect. E

Rifle Team (11), Sophomore Honors, Pi Tau Sigma, Mechanical Engineering Society.

KIZAR's, where the elite of Bethlehem dine and imbibe drinks (of the Volstead nature)—boasts of a lad of no little talent and ability, The Maitre d'Hotel—Frank Cook.

Returning to his residential retreat in the palatial Taylor Hall, he resumes control of the lowly vipers who scamper to hiding when his high form enters—the lord of the Hall. Twenty odd would-be aspirants to his throne “at his bidding speed, and post o'er land and sea without rest.” One young man, it there be such in the state of New Jersey, promptly supplies a “you-drive-it” for the master's Sunday drive. The alluring exotic roommate (someone suggests that Lehigh has gone co-ed) furnishes some of the better comforts for the baron.

For three years have I known this young Mussolini or Hitler, as you will, but never once have I so much as raised my hand for the brute.

Freshman Handbook, Co-Editor (3), Staff (2); Lehigh Review, Business Manager (4), Staff (3); Lehigh Union, Vice-President, (1); Scabbard and Blade, First Lieutenant (4); Pi Delta Epsilon, Treasurer (4); Mustard and Cheese (2, 3, 4); Society of Industrial Engineers (4); Delta Omega Kappa Sigma.

Bob was an innocent lad when he first reached Bethlehem, but now he occasionally goes to some "dirty old movie joint" to squander his hard earned pennies. Bob is not a real college man in the true sense of the word as he has never been drunk or even close to it and yet he is not much of a sissy.

As everyone knows Bob was engaged in all sorts of businesses ranging from the candy business in Bethlehem to the monkey business in Syracuse. He is now selecting his future bride according to the new O. D. K. point system based upon physical attraction, character and personality. Bob does not believe in marrying for love, he is picking out the one and only on a pure business basis.

All Bob's activities both in scholastic work and in extra-curricula activities have proven to his class mates that he should have been a business man rather than an engineer.

Industrial Engineering

Alpha Kappa Pi

Band (1, 2, 3, 4); Musical Clubs (1); Industrial Engineering Society (2, 3, 4).

OUT of Pennsylvania's sinking city, Shenandoah, came this budding youth destined to become one of Lehigh's never-to-be-doubted Industrial Engineers. A little desk in Alpha Kappa Pi became Bob's office, but it wasn't long before the seat became too hard—consequently after four long years the desk still looks as good as new.

Three B's, Basketball, Band and Bridge—not the Hill-to-Hill—takes most of Bob's time. The greatest of these is bridge. But then three dates a week take quite a bit of time also.

But putting all jesting aside, this alert lad is a good student and it is our opinion that he would make an expert C. P. A. providing he doesn't become a great Machine Designer. (???)

Well, "Old Coal Miner," we wish you all the success in the world and a "May" graduation.

Industrial Engineering

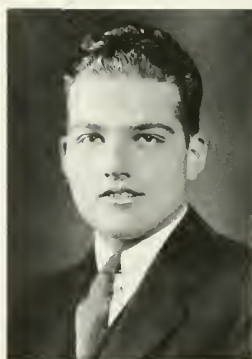

Bethlehem

Freshman Numerals, Swimsuit, Manager (1), Athletics (4), Industrial Engineering Society (3, 4).

WAS back in 1929 one of the cliff dwellers of East Orange, following the footsteps of his father, floated into Bethlehem. During his Freshman year he decided he wanted to be a business man with an engineers title so he picked Industrial Engineering. That year George won his numerals by being a fish manager for the swimming team. George spent his Sophomore year working hard, unusual for an Industrial. In his Junior year Oscar entered the picture, and George went out. Since then the Bethlehem cops have been directing traffic from nearby trees. After being mistaken for a Mr. McGuinis, he was there after known as Snork McGuinis. In his Senior year he was initiated into the T. L. B. and proved a valuable member, being a past master of the art. If Oscar could only speak, what a biography this would have been.

One of the saddest days the hamlet of East Orange ever experienced was the dark day when its favorite son, the pride and joy of the Freiday family, departed for an extended vacation in the Lehigh Valley. "Don't cry, little girls, he will be back" were the words offered by countless mothers to their broken hearted daughters. And surely enough he will, for this marks the fourth and last year of his eventful college career.

It has been a crowded four years for him, too. Freshman football as a starter, rifle competition next, Epitome board, and honorary societies—all join to keep him busy and test his ability to partake of activities and maintain scholarship at the same time, a test successfully met and passed. College has definitely developed his social tendencies as well as mental abilities, rounding out a well finished product.

So long, Don, and the best of luck to you.

Mechanical Engineering

Bethlehem

Soccer (1, 2, 3, 4).

As All-Eastern inside left in soccer, Walt has demonstrated his remarkable ability to "take it" and also "give it." Tipping the scales at 125 lbs., dripping with sweat and standing 5 ft.-5 ins. in his censie-weensie stockings, he is small, but mighty.

Having graduated from Girard College in Philadelphia with all sorts of honors, Walt proceeded into the hard, cruel world to make a name for himself. But, alas! after quite a few years of fair success, the goal seemed just as far away. A college education was obviously one of the few assets Walter lacked, and so it came to pass that Lehigh was blessed with the name of French.

One of the best educations available in mechanical engineering coupled to an industrious and forceful character should carry Walt far into that intangible land of success. Happy Days, little fellow!

Industrial Engineering

Lehigh Delta Chi

Manager Varsity Basketball, Arcadia (4); Chairman Student Clubs Committee; Brown Key, Tennis (4).

It seems that Tom was always mechanically (if not technically) inclined, so after having rated as a Senior for a year in high school he came to us as a very meek Freshman, in the E. E. Department. The work of his first semester consisted chiefly in forgetting high school traditions and getting accustomed to the procedure of, and effort demanded at, Lehigh.

He was among the first to become adapted to the antics of the Military Department, and evidenced his interest by continuing the work throughout the four years.

After two years with us Tom took unto himself a wife. Whether or not it was her influence which caused him to change his curriculum to Industrial Engineering, (the management course) we do not know.

Another event which cannot be overlooked was his acquisition of a model T Ford early in his sojourn at Lehigh. This red flier has characterized him thruout his years as an upper-classman. As it carries him both from us, we trust that it will not stop until he lands a good job.

AFTER a month of Army life in the Pennsylvania National Guard, Nels decided in the Fall of 1929 that he was better fitted for college than a life in the army. So off he came to Lehigh ostensibly to become a Mechanical Engineer. His Freshman year he spent wisely in orientating himself to the social life of this great college town, and incidentally to occasional study.

During his Sophomore year "Club" started his successful campaign for the basketball managerial position which culminated in his election as varsity manager for the season of 1932-33.

There are three factors which have proved somewhat detrimental to the college life of our hero. They are beer, pickled pigs feet, and sleep. On several occasions the first two of the above have worked together to produce new all time records in the third. In other words, he can't take it.

Nevertheless, Nels found Mechanical Engineering too easy for his brilliant and inquiring mind, and so in his Senior year he became an Industrial. This exposure to the business world and his disposition to "take a chance" developed him into a successful Stock Market operator. In the future years we visualize him as the man who had a "corner" on the hog market.

Two Dutchman personified, that is "Mike" from tip to toe. Mike is no exception to the rule of Dutch good nature and for that reason is well liked among his classmates. Mike was one of the chief contributors to Lehigh's improved baseball record last year, holding down third base very adeptly and doing a good job with the bat also. Although he never went out for football at Lehigh, Mike showed what he could do in that sport when he scored the lone touchdown for the Mechanic on the hard-fought Mechanical-Industrial battle.

It wouldn't be fair to Mike not to mention his exploits among the weaker sex because when it comes to exploiting, he does a good job. Who would think by looking at that bashful expression on his face that such a thing were possible? Nevertheless, it is true and Mike like any great lover covers a lot of territory, to be truthful, all the way from Pottstown, Pa. to Bayonne, N. J.

We, his classmates, join in wishing him the best of luck in the future.

Mechanic of Engineering

Bethlehem

Rifle Team (2); Lacrosse (1, 2, 3, 4).

Victor came down from Peekskill Military Academy, but as usual he arrived here late. Someone said he was adept, but after four years of research it has been found that he went fishing instead of matriculating. He has been carrying this extra curricula activity for four years; and although it is not recognized by the athletic policy of Lehigh, he has many yards of trophies to show for his prowess. Vic's secret ambition is to own a herd of cows, and if you cannot find him in the social register a few years hence, look under Creamery Specialists.

Mechanical Engineering

Sigma Phi Epsilon

Cross-Country (3, 4), Captain (4), Track (3, 4), Spiked Shoe Society, I. Club, Mechanical Engineering Society, Three Mile Campus Run Record, Five Mile Cross-Country Record.

Although Bill has been at Lehigh for only three years, his record is one to be envied by many of us who have spent four or five years here, as the case may be. As a transfer from Montana University he came to us with a great record as a scholar and an athlete. He has more than proved his athletic prowess when, as captain of the Cross-Country team, his long legs have carried him to many a record, and his team to an undefeated season. Pursuing his studies as a Mechanical Engineer, he has carried his triumphs into the classroom and made an enviable record as a student. In his pursuit of the fair sex, Bill has fallen hard for one of Bethlehem's fairest, and when the big event comes off along with that elusive job, we want to be right there to wish them every happiness.

FLUSHING'S loss was Lehigh's gain when Ward decided to seek the mysteries of Mechanical Engineering. With the culmination of four brilliant years at Lehigh, Ward is leaving behind him an enviable record of achievements. His scholastic average was always an asset to the house, although he did not let the studies take up all of his time. The fact that he was president and manager of the combined musical clubs during his senior year kept him pretty busy, but did not keep him from fulfilling his obligations to the fair sex at Cedar Crest and Moravian. On "Crooning Engineers'" aversion to eight o'clocks was pathetic, and it was only on rare occasions that he was seen around school at this early hour. Ward has made a host of friends while at Lehigh, all of whom will miss him when he leaves to startle the world with his theories about steam.

Pi Tau Sigma, American Society of Mechanical Engineers.

"LITTLE BOYS," remarked Mrs. Knipe when Robert was at a tender age, "should be seen but not heard." This so impressed the Philadelphia boy that he worked his way through high school and Lehigh by means of a big grin and lots of silent effort.

Bob can boast of the double honor of being a good mechanical engineer and being able to keep away from the women. For the former ability he was admitted to Pi Tau Sigma and for the latter miracle he was elected to the permanent presidency of the bachelor's club in his own fraternity.

Bob can explain a gadget on the Johnson bar at an electrical locomotive so that a child can understand it, but he still thinks that Fem-Sem is a type of tough medicine.

After graduation we do not expect to hear from Bob for several years and then somebody will suddenly tip us off that he's the head of some engineering company. Bob does things that way.

RICKARD N. LAFIMAN
BAYONNE, NEW JERSEY

"Rick" "Monk" "Swede"

Mechanical Engineering

Kappa Sigma

Wrestling (1, 2, 3), Arcadia, Booster Committee, Interfraternity Council, Scabbard and Blade; Army Ordnance Association; Mechanical Engineering Society.

A LITTLE over four years ago one of Bayonne's Swedes shook the oil from his shoes and started through the weeds on his way to Lehigh. It did not take the Mechanical Department long to learn that "Monk" had more foot-pounds of pep and energy per cubic foot than the whole class of 1933. In less than a year he was showing Prof. Luce what was wrong with Machine Design and how the fault might be corrected.

"Rick" has participated in many activities about the campus and has shown a profound interest in singing societies and all that they offer. His vivacious personality has gained him many friends and has earned him many beers.

When "Monk" gets out in the world and starts building his deluxe, three-cylinder water pump, we hope he'll find time to come back and check up on things here in Bethlehem.

Wrestling (1, 2, 3, 4); Arcadia (4); Freshman Honors, Freshman English Prize, Sophomore Honors, Sophomore Mathematics Prize, Newtonian Society, Phi Eta Sigma, Secretary-Treasurer (2), Pi Mu Epsilon, Vice-Director (4); Tau Beta Pi, Industrial Society; Phi Beta Kappa.

With an ineluctable desire for further education, this conscientious youth from the Wilds of Western Jersey appeared on Lehigh's fair campus and within a very short time broke the shackles of high school tradition.

John always believed in being precise in his calculations and was instrumental in teaching the trosh pi to 101 decimal places. While at Lehigh he participated strongly in general commutations and in bull sessions, where his sapient observations never failed during the inevitable turn of such discussions. He always believed in accomplishing the greatest results with the least effort. This is generally known as efficiency, but no one speaks to him of efficiency or stray power, for his opinion anent the E. E. Department and its courses is well known. Despite his college training, we feel that John has a liberal education.

Mechanical Engineering

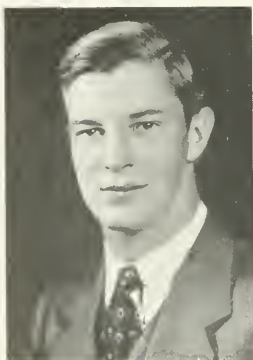

Kappa Sigma

Brown and White Staff (1), Board (2); News Editor (2); Student A. S. M. E. (1, 2, 3, 4).

THERE is an old saying among show people, "If you think you are good, go to Wilkes Barre". Well, John isn't an actor, but thinking he was pretty good, he came to Lehigh. And the records show he is pretty good—with the exception of a few "unaccountable" slips during dog days!

John might have been an athlete—not that he was or even wanted to be, but is capable of showing some mighty good leg action at times. Who can forget the "muscular right tackle" who played a fine brand of football one frosty afternoon for the Mechanical Engineers? He once burned midnight oil as News Editor of the Brown and White—and has shown a keen interest in Bethlehem Singing Societies.

He came to Lehigh with the idea of getting as much out of the four years in as many ways as possible—and hasn't done a bad job of it either. Although he probably would sell his chance to be President for a paltry sum, he may turn out to be a big shot some day. Who knows? !!!

Mechanical Engineering

Section L, Taylor Hall

Historian, Sophomore Class; Dormitory Section Head; Mechanical Engineering Society (3, 4).

From two thousand four hundred and one years ago Bustleton (Dick claims it's in Philly) came the potential Mechanical Engineer, Dick Lodge, with a desire for knowledge (1) and a craving to "taste of the fruits of life," of which, up to this time, Dick had merely heard. Since then, the man in the above cut has developed a personal knowledge of Epicurean life—namely wine, women and song (but Dick's a hell of a singer).

There is the old saying that the month of March comes in like a lion and goes out like a lamb. Dick also has his adage. He came in like a lamb and is going out like a lion. But his roar isn't so fierce—it can't be, since it is always accompanied by Dick's good-natured smile.

But, dear reader, I neglected to expound on the Senior M. E.—I. E. Football Game. This is the rugged man (thank me, Dick) who kicked the extra point which helped win the game for the M. E.'s and allowed Prof. Larkin to fall off his fence.

Here's how and lots of luck to you, Dick.

A PHILOSOPHICAL (tin-horn) cynic, a maddening fatalist, and a dyed-in-the-wool politician, are all characteristic of "McConahoeey" to those that know him well. As politician and Historian of the Sophomore Class he revealed his leaning toward the literary side of life. We think he has Packard Lab. and Cuppee Hall confused. We often wonder whether that Bessemer converter of his is a permanent fixture and if he sleeps with it. His excuse is, "All great men smoke pipes."

His relations with the fair sex are rather a mystery, but we have our suspicions; we have heard rumors after vacation periods. However, his most obvious love is on four wheels and is called "Virgin." Since few loves have four wheels, we advise him to remain true to this one thereby reach the goal of success which we are sure will be his.

Lacrosse (2, 3); Swimming (1); Rifle Team (1); Lacrosse Club (4).

THE return of Ted Mommers from the ranks of the working men, to complete his college career after a year's absence, established his claim to the title of "Old man of the mountain," or at least runner-up thereto, and gave the class of '33 an unexpected, if somewhat strange, honor.

If it were not for his propensity for beating other people with a lacrosse stick (all in fun) and the possession of a complete line of lethal weapons, one might say that he is of a peaceful and easygoing nature.

Ted is fond of Wellesley Seniors (or specifically Senior), beer, bull-sessions, comfort, and sleep. In his more serious moments he studies and acts intelligent in spots.

Now that the foregoing is written, it must be confessed that he is practical, and has a potential, or should we say hibernating, ambition, occasionally glimpsed, which will probably carry him somewhere.

ROUGH and ready Jack! Rough and ready in any battle of wits or physical prowess. It has been rumored that "Horse" (the name has been discreetly applied) rules his particular roost with an iron hand. At any rate, when he does study, the quietness of his neighbors is startling. Then again his pure, undefiled English and his fluent French entertain all his section mates.

Previous to this, his last year, his policy with women has been based upon a rather broad diversification of interests, but this year has found his interests fairly well concentrated somewhere in "God's Country." Now we are wondering if he will win that marriage bet.

Jack also has a weakness of occasionally rising early to view the dawn from a book. With such energy he has been successful here at Lehigh and will, we are sure, be successful in the future.

Pi Kappa Alpha

Manager, Lacrosse (1); Brown Key (3); Glee Club (1, 2); Industrial Society (S. I. E.)

Bob came to Lehigh in 1929, to see that his brother, George, a transferred Junior, didn't weaken and fall for any Bethlehem females, nor for "Souise" Bethlehem beer. With so much of his attention taken by his studies and the care of his brother, he himself remained immune to Bethlehem beer and women. But when his charge had left the fold, and trips to certain nearby towns had opened his guard, he resigned himself to a woman and trips in a rattletap Ford. As a butterfly, he flitted from flower to flower and city to city, until he became a one woman, Scranton man.

As an Industrial Engineer he has been successful scholastically, a great aid to his fraternity, and manager of Lacrosse.

His friends trust that a successful career awaits him, but mourn apprehensively the possible fracture of feminine hearts subjected to his fancies.

Industrial Engineering

Pi Kappa Alpha

Circulation Manager, Brown and White (3); National Advertising Manager (4); Board (2, 3, 4); Freshman Honors; Sophomore Honors; Arcadia; Pi Delta Epsilon; Pi Mu Epsilon; Newtonian Society; Society of Industrial Engineers.

The train came to an abrupt halt. From it that day stepped Ed, wide-eyed and full of anticipation and wonderment. That was four years ago. He came here thinking he would be an Arts man, but on registration day he launched forth to explore the mysteries of the Industrial Engineer Curriculum. At the end of his sophomore year he entered a fraternity and now, after a year and a half, he is head of his house.

Pog holds the record for high marks received per few hours of study. One time he dined 'till two-thirty in the morning, slept part way through the four hour exam and still got an A in the course. He has only one rival for coming late to classes. However Pog is liked by all who know him and he enjoys all forms of social life. So an revoir and good luck.

Mechanical Engineering

Sigma Chi

Assistant Manager Lehigh Valley Foundation Honors; Sophomore Honors; Tau Beta Pi Prize, Wilbur Scholarships; Pi Tau Sigma Prize; Phi Eta Sigma, Newtonian Society, Presidents Pi Mu Epsilon; Pi Tau Sigma, Treas., Scabbard and Blade, Tau Beta Pi, Presidents Omicron Delta Kappa, Orchestra (1), Mechanical Engineering Society, Phi Beta Kappa.

THE man who can be an excellent scholar without exhibiting those idiosyncrasies characteristic of the exceptional mind, is due much praise. This can be said of Jimmy Rhoads. He maintained with ease a scholastic average second to no one in his class until his senior year when Dr. Carothers' sociology course found him wanting. So Jim decided not to take any more business courses.

However, neither this, nor anything else will force Jimmy to concede that the business school presents any difficulty to the engineer.

Jimmy's engineering ability, oddly enough, extends beyond the class room. If you doubt his ability to apply engineering principles to almost any problem, ask him sometime about his pet theory.

With all his theories and keys which, incidentally, he doesn't display indiscriminately, Jim has the respect of his fellows. For like everyone else he has experienced those pleasant and unforgettable interludes which make the complete Lehigh man.

IN the pre-depression month of September, 1929, Chat slapped down his first check for tuition and Lehigh got a big break. The check was good.

By the time that everyone was shouting "Prosperity is just around the corner," we found that Chat had mastered the art of returning for his beauty sleep in the early hours of the morning, despite all disturbances. It was the overcoming of all obstacles that made for his great scholastic success at Lehigh.

Being a good M. E., Chat decided to follow the example of Saint Patrick, and spent much of his time trying to drive the mosquitoes out of Long Island.

When the Senior M. E.—I. E. football game arrived, none other than "Albie" Scharfberg was found to be calling the signals. Scharfy and his Mechanical team greased up their sliderules and ran up a 7-0 score on their arch-rivals.

HENRY CONRAD SCHEER was born on Christmas day, 1910, in Glen Ridge, N. J., but because of the hustle and bustle of the holiday season he was not noticed for a few weeks. After a few years of this he decided to commit suicide by choosing engineering as his future profession. To make the end more certain Connie chose Lehigh. After an uneventful (?) freshman year he changed from engineering to I. E., this giving him plenty of time to enjoy the better things in life. The following three years Connie perfected his technique of afternoon sleeping to such an extent that he had to give up his activities in the Glee Club. However, Connie has still had enough spare time to go to Stroudsburg every week-end. His appreciation of beautiful scenery is certainly commendable. As to the future there is no doubt that Connie will be a great success as a "big-business man" because now he can gracefully smoke a big cigar while his feet are on a desk.

"**A**ll the brothers were valiant"—Frank did his best to follow in the footsteps of his older brothers, and he had to work hard as heck to get that Tau Beta key.

Every semester he would be certain that he was going to bunk several courses—his worrying was never justified—he always crashed through with a high factor of safety.

He made too many trips to Philadelphia in his Senior year—maybe he was Soccer Manager—but there was one other better reason for those frequent visits—and can he blush?

Everybody had lots of fun with that Ford—an open job—a relic from Army camp.

He hopes to enter the field of refrigeration and try to liquidate his frozen assets—he studied Industrial Engineering while he's been in Lehigh, Industry has dropped to terrible depths—now he is all set to go out and help it rise to new heights.

Mechanical Engineering

Taylor Hall, Section D

Football (3, 4), Sophomore Honors, Tau Beta Pi, Pi Tau Sigma.

IN his first year at Lehigh, Will commuted from Catasauqua, usually spending more time running back and forth than on the campus. In the second year, however, the Catasauqua Comet settled down at Taylor Hall, Section C, and became one of their shining lights which are not easily put out (he paid his rent). Will immediately became one of their best average boosters and star athletes. In his last two years Will was a member of the varsity football and was also one of the main supports of the Senior Mechanical and Taylor Hall teams.

Will has a habit of finishing well whatever he has begun. Each year he has become more successful as a student. It is quite evident that he is best fitted for Mechanical Engineering, because he always shows his best talents in his M. E. courses. Besides his scholastic abilities, Will also shows his natural mechanical insight in settling problems in our Drawing Room bull sessions.

Industrial Engineering

Sigma Phi Epsilon

Cheerleader (3, 4), Music of Clubs (2, 3, 4), Industrial Society (2, 3, 4).

ESTIMATING this fellow is a task difficult to do justice to, for the accomplishments of this Willie "towers" above all his competitors. He has spent a very pleasant four years with his quota of triumphs, trials, and tribulations "larkin" around the Industrial Engineering Department.

Flicker!! Flicker!! appropriately introduces "our Willie" as one of Lehigh's capable cheerleaders. His lusty yells, inspiring the support of thousands of Lehigh fans, have helped to rouse many a Lehigh team to victory.

God gave you your girl and gave me mine, but He gave Bill his "pick," not only of girls, but also his guitar pick. Thus he will go picking his way through life. We hope that some day time and fortune will rob the world of this engineer and make him a radio broadcaster, where his suave complacency and syncopated melodies will make him the idol of a horde of youthful listeners.

Football (1), Asst. Manager, Basketball (2).

TUT has a practical mind so Engineering attracted him. Since he was interested in machinery, Tut chose Mechanical Engineering as his life work.

In his Sophomore and Junior years Tut thought a stop, look, and listen sign should be hung on every motorcycle, including his own. He is well educated on this subject and on the slightest provocation he would point out the relative merits of all makes, American and foreign. In his last year he decided that his Ford was more in keeping with the dignity of a Senior.

Tut is without a doubt the best gang organizer in the M. E. department. His clique was organized in his Freshman year and has remained intact with minor additions and subtractions as four years rolled by. His organizing ability became quite evident when he engineered the Senior M. E. vs. I. E. football game. We feel certain that Tut will be most successful where he can use his talents in this direction.

FRANK J. VAN HORN, class of '33 after many attempts at engineering. Back in 1929 "Van" came to us full of pep and electrons, more pep than electrons, I think, for after a year in that wonderful curriculum of Electrical Engineering we find him transferring to Industrial. Two years over in the east end of Packard Lad has made Van quite apt with the monkey wrench. After giving a roadster of ancient vintage a fling he acquired a more modern and up-to-date vehicle which likewise required a few turns with afore mentioned monkey wrench.

Van's taste, however, does not lie entirely in automobiles. Give him notice of a dance and within the week he will be found heading off to Scranton to the one and only who incidentally makes Van the envy of many.

How Bob got to Lehigh is more than anyone who knows him well can figure out, for he was a big shot at Wyoming Sem and you know where they usually go.

He is now an Industrial Engineer and has done well. Yes, he's very industrious, he does all sorts of things. He's a grand Mexican athlete and holds an all time record for asking profs questions just when the rest of the class wants to leave. Bobby has been the victim of the subtle girlish charms of women from almost every eastern school since his arrival here, but now he says "nixon" more than one. Last fall he owned a motorcycle, but his latest said "no," so he now drives a green coupe which insists on turning its nose northward at fairly frequent intervals. (If that coupe doesn't go up North within a certain time limit, it seems to develop the queerest motor trouble). But all joking aside, we like him and expect to see him get along.

A PARTICULARLY hard quiz in Sophomore Machine Design in the office. Prof. Luce presented with 70 beautiful red apples. Class presented with—it can't be true—thirty beautiful brown apple pies. N. J. Tuttle being annoyed by her trash brother “spends one hour with her” fixing the furnace. Someone should send “Snork” Enke west!—why, Willis!! “There are no rocks down along the Mississippi, so you have to throw bottles at the cats,” says Prof. Wilson explaining an important principle of hydraulics. The time Poggi came to thermo class with his comb in his hair. Poggi and Langhaar opened the two doors of the Banking class at the same instant just after a lecture on coming late. when J. C. Rhoades walked into the water at Surveying camp in his p. j.'s while doing things he shouldn't have been doing. Did Johnny Williams ever learn how to fix a broken transit with a pair of pliers? Mr. Bratt: “Now, if anyone feels insulted, please leave.” Some day we'll take him up on that. then the time “Ok” Chan Bailey took a ducking from an overflowing tank when he opened the wrong valve. Richard Branda, in Dynamo Lab., opens the field of a shunt motor while it is running. A siren-like scream—a scurry for safety. The hero, Harold Pentz (heaven only knows why it was he) throws open the switch, just in time, to save the day. Robar terribly injured after having studied the junk six hours, to see the “guy” go into a rhapsody in blue over vein deposits. Other mutterings and diverse rumblings—the Ladies Home for R. P. Lee, formerly Bishopthorpe Manor. Ned Brumbach's concern that everyone should receive their Xmas fowl. Fitzpatrick's occasional Boston accent. Hertzog, the barber, not shaving for weeks at a time. Legge and Laschober heat treating a furnace interior. Johnny Worth's “is that so” Coxie the aluminum expert, forever borrowing somebody's notes. Hazen and his motorcycle. Seminar—“Gentlemen of the Seminar”—Dr. Doan. Friday afternoon plant-visits conducted by Gene “Grace” Laschober and Charles “Schwab” Legge. Herm Moorhead's eye-open sleep in any class. The phone calls nite before Met. Problems were due Carrrr hon! and Sili conn!!!.

BOUNDS emigrated from Germantown as a part of the 1929 quota sentenced to frolic for four years, more or less, 'neath the spreading chestnuts of South Mountain. He found himself a cubicle in Price Hall and, misguided youth, diligently strove to lay the foundations for a brilliant career as a civil engineer. After winning Freshman honors A.M. saw the light, or maybe Metallurgist had a ring to it more high sounding than Civil Engineer.

Although letters frequently leave for and come from Goucher, Betsy is Ardrey's true love. A Chevy of uncertain origin, Betsy gets constant loving care and reciprocates by losing and breaking vital parts on the Philadelphia pike.

The success of this quiet, industrious chap in dragging the Brewery out of debt during his junior year was a financial accomplishment worthy of note. In his senior year his appreciative fellow inmates elected him *Brewmeister* and he conscientiously applied himself to the difficult execution of this position.

Metallurgical Engineering

Alpha Chi Rho

Varsity Baseball (2); Varsity Basketball (2); Freshmen Baseball; Freshmen Basketball; Vice-President of Class (1); Secretary of Class (2); Treasurer of Class (3); Interfraternity Council (3, 4); Interfraternity Sports Manager (3, 4); Lehigh Valley Section, American Society for Steel Treating.

It was back in '28 that Ned packed up his troubles and tore himself away from Reading Pretzels long enough to come to Lehigh for a week. For some unknown reasons he has repeated these six day visits to Bethlehem for four years. We can't blame Ned for this particular state of affairs, as we know this blond girl. He comes to college with the intention of learning a little about Metallurgy and it is revealed by Dr. Stoughton and he returns home each week-end because he says he is a home lover. We think he is.

Ned has been with us for five years and we only wish he was going to stay five more. A wonderful personality, ideal ability as a leader and organizer, fun loving, and a fine disposition are a few of the traits that Ned takes with him when he leaves Lehigh. And we are sure that he will be a grand success in life.

Secretary, Mining Society, Assistant Director, Intramural Sports.

DR. VON KROCK first came to Bethlehem in the fall of '28 disguised as one of the three original wise men. Following his star of destiny, he crept into town late one night with a notable high school scholastic record, a sheepish look, and countless principles and ideals. Sometime in February, 1933, he left the Mecca of the Lehigh Valley with only a notable high school scholastic record. Gone were the other quaint things enumerated above. Before he departed he traded them in for an E. M. degree which is scarcely worth mentioning; for, to quote from one of the Dr.'s contemporary essays, "What good is it, anyway?"

Unassuming (we almost said quiet which would have been a gross misstatement), he never aspired to become one of the campus greats; but, among his numerous friends, he was known as a great fellow. A drinker of beer, a connoisseur of demure young things, a pragmatic philosopher, and a square shooter, he had all the attributes necessary to make him the highest type of friend. More than that we can ask of no roommate.

BILL came to Lehigh from R. P. I., ascending from the lowly position of a grease-wiping M. E. to a more dignified one as a Met. As an exponent of gray cast iron "which owes its extensive use to its relative cheapness," Bill has no equal and can quote Dr. Moldenvie for hours at end.

"Cavendish" (acquired in P. Met.) became famous thru his classical experiment with a noble metal thermocouple and potentiometer. This may have caused his difficulties while trying his wings in uncharted flight!

Blue ties are his weakness, "women are a d-d noisance." We are expected to believe that the visits to the Registrars' office only concern his curriculum activities.

His nice sense of humor, willingness to lend a helping hand and hard work will carry Bill far in metallurgy.

HIBBERD R. CRISPIN looks like a very hardworking and serious young man, but we've never been able to decide about "Shorty." He can on occasion be the most industrious fellow, but until recently those occasions have been rather rare.

"Shorty" entered Lehigh sometime in the dim past, and his college career has been somewhat hectic, but now by the grace of God and "Dutchy" Stocker, who became tired of seeing him in the same calculus class, he's going to graduate. He has always insisted that he did not want to graduate with honors anyhow, but in spite of all that he has gathered more than his share of useful information, here at the University. If he ever writes it, his discourse on Bethlehem—people and places—would offer some interesting information on certain phases of college life.

"Shorty" wants to be a miner, but he'll probably end up in the elevator business, and they'll be good elevators in spite of what we say about him here.

Bethlehem

Football (1, 2, 3, 4); Freshman basketball, "L" Club; Metallurgical Society.

RALPH FITZPATRICK, or "Fitz" as he is usually called, matriculated later at Lehigh from the learned halls of old Central High in Phila. He came to Lehigh with an A.B. under one arm and a pronounced liking for "wine, women and song." However, he doesn't sing and women bore him.

By an act of Providence and the charity of the Dean, "Fitz" managed to stay in Lehigh during his freshman year without much study—during which time he contributed to the upkeep of Mealy's and Mooches.

In his Soph year, Fitz determined to be a Met, but his feelings were hurt by the department stenographer and he changed to Chem. However, Prof. Harvey smoothed things over and Fitz finally became a "pseudo—Metallurgist." Prof. Stoughton has never forgiven Harvey.

During the last year Fitz is seen about St. Luke's altho he seems perfectly healthy. To all questions on the subject he replies "you guess—I'm tired!" Fitz plans on graduating this June, surprising us all and perhaps himself. He intends at the present writing to follow Metallurgy in its application to Aviation.

In "Rudy" we have a remarkable man who, finding the scholastic requirements too easy at Moravian, transferred to Lehigh in order to whet his mental appetite. He is a student who never worries about anything, and hence he is quite immune to the "hull-throwing" tactics of his fellow metallurgical classmates. One of the other predominant characteristics of this carefree student is his versatility. He can win medals in the P. E. department, "appreciate" courses in appreciation of music, and can proceed to tell the chemists all about chemistry.

"Rudy" is a born scientist, and he seems destined to assume the role of a research worker. This statement is based on the number of "funds" he has made while a student at Lehigh. We can't imagine "Rudy" ever being very serious, but perhaps when he makes an important "fund" he will settle down like the average man.

Wrestling (1, 2, 3, 4), Captain (1), Track Team (2), Baseball (1), Freshman Honors, Sophomore Honors, Newtonian Society, Phi Club, Tau Beta Pi, Metallurgical Society.

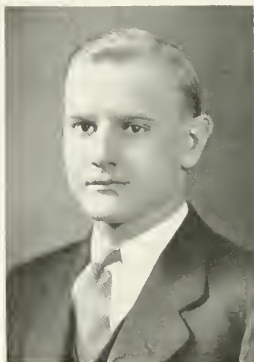

It was back in the days of twenty-nine, when a small but cocky young blond sallied forth from Belvidere High to conquer the world and finished up entering Lehigh.

Gene in his early days of college had nothing at all to do with the opposite sex. Two years of college supplemented with a trip to Germany wrought a complete change. He had become hardened to the ways of the world. In his junior year he would stroll in from a date at dawn with various parts of his wearing apparel (besides overcoat and hat) under his arm and would admit to having only a "fair" time.

Now after what might be called a checkered career Gene is again faced with the problem of conquering the world. No doubt the University will miss him after graduation. They also had an epidemic of the measles here at one time.

Basketball (1), Manager Freshman Football (4), Senior Cabinet of Lehigh Union (4); Glee Club (1, 2, 3), Metallurgical Society (2, 3, 4).

WAS back in 1929, when 1933 seemed centuries away, a young up-start from that Island City of Bound Brook came ambling down the valley to this little town of Bethlehem. His constant smile and willing (?) ways soon won him a place in the hearts of his contemporaries. Not long after his arrival, a fair young lady dropped up to see him for a week-end. That was four years ago, and believe it or not, the selfsame young lady is still coming up for the big week-ends.

His scholastic life was that of the normal student of diversified interests; nor was he negligent to the extra-curricula activities. In other words, he was just an average college man. In parting, let us wish our Ed as happy and diversified an after life as he has enjoyed here, and may the "constant young lady" become a permanent addition instead of a week-end visitor.

Mining Engineering

Bethlehem

Mining Society.

CHARLES LEIR, sometimes known as "Carolus," immigrated to Lehigh from Stockertown, Pa., during the fall of 1929 in "Lizzie", a combination of four tenders, four wheels, a means of steering, and some undetermined source of power. His main ambition seemed to center in the mining department.

The skeleton in Charlie's closet is radio. This "bug" seems to gnaw at the very roots of his imagination, playing pranks at the most unexpected times. He is quite often found on nights before quizzes making a speculuman effort to gain some knowledge of the morrow's quiz from a maize of circuit diagrams or a price list of radio supplies.

He seems to experience little difficulty with the fairer sex. Although he appears to avoid the usual controversies and entanglements of his less fortunate classmates, he never fails to arrive at the crucial moment equipped with the prime requisite—the "date."

Metallurgical Engineering

Delta Upsilon

Frosh Football Numeral- (1), Asst. Mgr. Lacrosse (2), Varsity Lacrosse (3, 4), Mustard and Cheese, (2, 3, 4), Stage Manager, (3), Metallurgical Society, Vice Pres. (3), Pres. (4).

This embryo engineer is, in all senses of the word, a unique individual. He has been awarded one of nearly everything this University has to offer; these "awards" range from flunks in freshman courses to A's in graduate courses, cut notices, fame for being an expert stage technician, and bruises picked up on the Lacrosse field. It is also of interest to note that Herm has the distinction of being the only person in the history of the school who has staged a "Fox" hunt in this immediate territory. At this point it might be well to say that Ham's favorite indoor sport is that of tying up the D.U. 'phone for long periods of time—to get assignments? Nay—to see if the "Fox" in question would go to such and such a dance!

But, after all, Herm has successfully mastered the secrets of metallurgy, the terminology of geology, and the technique of X-ray investigation to such an extent that we must admit that he is a man who is well equipped to urge metals. So with this, we'll let him pass on into the ranks of the unemployed.

HERMAN ALEXANDER MOORHEAD

Mining Engineering

Theta Delta Chi

Mining and Geology Society, Wrestling Competition (2).

Before entering college, Ed was a diligent young fellow obsessed with numerous and ever-changing ambitions. His first "design for living" was to be a guide in Canada's wilds. This was the start of a natural craving for the open country manifested by his annual hat-full of hunting and fishing licences.

When he entered Lehigh, Ed soon became an addict of the "college time." Possessing a certain debonair style, and a complete mastery of the jews harp, much admired by local society girls, he soon became the object of their advances via the telephone and the mails.

When not out on dates, he was usually to be found perusing his texts on Mining Engineering, the course he is reputed to have taken. Twenty years hence we vision Ed as owner of numerous gold mines, a big game hunter, and the social sensation of Iktogmut, Alaska.

Sigma Phi Epsilon

Football (1, 2); Freshmen Baseball, Ass't Manager (1); Scabbard and Blade; Arcadia (3, 4); Inter-fraternity Council (3, 4); Glee Club (4); Metallurgical Society.

PHILADELPHIA has been more than generous in contributing its share of green freshmen to Lehigh University, but never before has it given up one like this boy. He actually went to see Bach sing in the Bach Choir.

College atmosphere has changed him for the better, thank goodness! He has been very successful in his pursuit of Metallurgical Engineering, not because of his hard headedness I assure you, but because of his determination to show the world that there was nothing he could not accomplish.

Oh yes, Bill alias "Pres" has had his romantic moments also. All of his time was not spent with Metallurgy, as he managed to sneak away from Non-Ferrous to enjoy a southern week-end in Baltimore. What for? You ask Bill. What a saddened individual when he returned, Ah me! But then, there is the Monday mail; so this world isn't such a bad place after all.

AFTER CHewing a combination of tobacco, red pepper, alum, and pieces of burnt rubber for over a period of six to seven months, Rotty decided to give up chewing and to pour cream into his coffee from a height of two feet above his cup and not spill a drop is the high ambition of E. Gustave Kremer. Richard Olney. "How do you know? Are you sure? Who plays in the picture? Oh, she's lousy." "If you gave that rock a shove I bet it would go like h—" wagered W. Glee Club Kellsted.

Questions:

Who slapped Sam Kulp when he tried to make good?
Who is the cradle-snatcher; Johnny Hart or the girls he goes out with?

Is or isn't M. Kahn the original "shorts" dancer?
Are you taking this course seriously, Danzer?
Who was that babe I saw you with last night?

Answers:

The whole chemistry department is wrong, I'm right.
G. Merritt.

You, you horse's tail.
That was no babe, that was my wife.

Famous Remarks:

"I will not bequeath by corduroy pants to the class of '37.—E. Jenny.

"Well, you're no aspirin tablet!"—Kahn.

"I'm awfully glad you told me sooner"—"Count" de Berardinis.

"That's my natural complexion"—Bob Bachman.

"I do not know what is going to happen utter nonsense Lafayette 13, Lehigh 6"—Doc Carothers.

Regimen:

If by chance, in future years, you are walking through a stretch of woods near Norwalk, and you come upon a very large pile of very long bones, the class of '33 will, I hope, realize that good old Mathews has at last met his match.

History of the Class of 1934

THE Fall of 1930 saw a group of ambitious, vigorous fellows arrive at Bethlehem, determined to leave their mark among the famous sons of Lehigh. Although that class has only partially realized that aim, it has certainly left behind it three years of worthwhile achievement, hard work, and good times as well.

Although unaccustomed to the ways of University life at first, we had little trouble getting into the swing of things, and when our first year had ended, the class of 1934 had registered quite a list of victories in all phases of college activity. Several of our number already showed promise of becoming leaders in sports and studies. Others, however, found it impossible to keep pace, and our number divided considerably.

Our enthusiastic energy of the first year continued throughout our Sophomore and Junior years, during which time, members of our class have advanced to a higher plane and have become outstanding in scholarship, sports and other University activities. As Sophomores, we saw the passing of the Phi Club as a recognized college society, then turned our efforts toward Cyanide and its progress.

In retrospect, we recall times when the going was hard. Founders Day sports resulted in quite a set back and friends and class mates dropping by the way only added to our sorrow. However, the memories of numerous pleasant occasions, and many lasting friendships we have found here, easily overshadow any feeling of regret we have experienced. As Juniors, we look forward to graduation next year, and a pleasant continuation of past achievements. Our stay here is rapidly approaching its close, but we sincerely feel that the time we passed were well spent. Truly we have learned to love Lehigh!

SOPHOMORES

PAUL F. PRESTON
President

Sophomore Class History

As we round the final turn and come into the second lap of our college career, we find our spikes biting more firmly into the ground with each step. Our momentary glance backwards leaves us with a clear mental picture of a race well run, and with confidence in our ability to successfully negotiate the half of our journey.

Two short years ago Lehigh swung wide its portals, accepted us as potential Lehigh men, and began the process of grooming us for the battles of life.

It is with mingled pride and modesty that we point to those two Autumn afternoons set aside for the festivities of Founder's Day when we met worthy opponents on the historic greensward of Taylor Field, and sent them away a sadder and wiser lot.

A Sophomore class president stranded in nearby Jersey, adorned with the mysteries of a mercurochrome bottle, was our reply to the first (and final) outburst of attempted Sophomore domination.

In the field of intercollegiate athletics our members have acquitted themselves notably both in number and ability.

Equally auspicious has been the success of our representatives in the arts of literature, oratory and histrionics.

Scholastically our mortality has been kept at a low level, and our success punctuated by marked achievements of men who have brought well-deserved honor both to themselves and to their class.

As we look to the future we hope to further our achievements to an even higher degree than in the past so that both we and Lehigh will have been proud that we were here.

Class of 1935

CLASS OFFICERS

President, P. F. PRESTON

Secretary-Treasurer, J. A. GILMORE

FRATERNITIES

AXP

THE Phi Mu Chapter of Alpha Chi Rho originated as the result of a local fraternity, Theta Delta Psi, petitioning the national of the Alpha Chi Rho fraternity. The petition was granted and the chapter was installed at Lehigh in 1918.

The Alpha Chi Rho fraternity had its beginning at Trinity College, in Hartford, Connecticut, by the Rev. Paul Ziegler, H. T. Sheriff, Wm. A. Eardeley, C. G. Ziegler, and Wm. H. Rouse. The date was June 4, 1895. There were 22 active chapters and the fraternity has a total membership of 3,529.

The Lehigh Chapter has, as have the 21 other chapters in Alpha Chi Rho, a distinctive alumni organization. The graduates of the chapters are linked together into an alumni chapter which is governed by a committee, one of whom lives at the chapter house if possible, and acts as an adviser to the active members.

The first chapter house was located at 454 Vine Street, but three years later the lack of space and proper facilities made a change necessary; so a larger house was obtained at Third and Wyandotte Streets. In 1923 an opportunity was presented to purchase the property known as the Skeer's Mansion at Third and Cherokee Streets, and this has served as the chapter house for the last six years.

ΑΚΠ

IN February 1927 nine men, who had previously been living and eating together, secured a larger home and took as their associates nine other men for the purpose of organizing a living group.

That Spring their petition to the University for recognition as a living group was granted and their president admitted to Arcadia. The members chose Howard Hall as their name and existed as such until installed as the Nu chapter of Alpha Kappa Pi on February 1, 1930.

Alpha Kappa Pi was organized at the Newark College of Engineering, Newark, New Jersey, on January 1, 1921, and remained a local until March 23, 1926, when the Beta Chapter was placed at Wagner College, Staten Island.

ΑΤΩ

THE birthplace of the Alpha Tau Omega fraternity was at Richmond, Virginia, where it was founded on September 11, 1865, by Otis Glazebrook, Erskine Mayo Ross, and Alfred Marshall. The first chapter was established at Virginia Military Institute at Lexington, Virginia, but was destroyed later by anti-fraternity rules.

The first congress of the new fraternity was held in July of 1870, and a general body of delegates and officers was formed, in which the executive and legislative powers of the fraternity were vested. The organization was incorporated under the laws of Maryland in 1879.

The first Northern chapter of Alpha Tau Omega was installed at the University of Pennsylvania on April 8, 1881. The provost of the University, Dr. Edgar F. Smith, was instrumental in the establishment of this chapter although he was a member of another fraternity. The first initiate of the new Tau Chapter, N. Wiley Thomas, installed a chapter at Muhlenburg College in 1881, and the first Alpha Rho of Lehigh in 1882.

Alpha Rho chapter of Alpha Tau Omega was the second fraternity to be installed at Lehigh University. Its life was short, however, and after five years the charter was withdrawn. In 1890, Otis Glazebrook, one of the founders of A. T. O., revived the chapter and though the charter was withdrawn again the chapter was permanently revived in 1903.

ΒΘΠ

IN 1837 John Reilly Knox, with seven other undergraduate students, organized the national fraternity, Beta Theta Pi, at Miami University, Oxford, Ohio. This fraternity was the first of the Miami Triad and was also the first established west of the Alleghenies at a time when the fraternity system was gaining prominence in the East. Since its organization the fraternity has experienced a steady growth so that it now has more than eighty active chapters.

For eight years after its founding the parent chapter was the governing body of the fraternity. In 1879 the government was vested in a board of directors of nine men.

The Beta Chi Chapter was organized at Lehigh University in 1891 by Peyton B. Winfree, a transfer from a now defunct chapter of Randolph-Macon. Winfree was assisted by two other Beta transfers. With eleven associated students these men petitioned the national convention for a charter which was granted in 1891.

The first house of Beta Chi was a small, ramshackle building on West Fourth Street. The chapter house changed frequently in the earlier days when membership was small and funds few. From 1902 until 1918 the Betas occupied a house on Wyandotte Street. From this house they moved temporarily to East Church Street in 1923 and considered building a new house on the campus. This house was completed in 1926.

XΦ

THE present Chi Phi fraternity was formed as the result of three earlier orders. The first of these, called the Princeton Order, was a revival of the Chi Phi Society, which had been founded at the College of New Jersey in 1824. Each of these orders established several chapters which became inactive during the Civil War. After the war some of these chapters were reorganized and the Chi Phi of the North and the Chi Phi of the South were formed. A union was effected between the two orders in 1874; since then the fraternity has undergone a conservative growth, now having thirty-three chapters and a membership of 12,000.

Psi Chapter of Chi Phi was the first fraternity at Lehigh and was founded in 1872 by S. V. Wilson, G. C. Haldeman, F. A. Watkins, W. M. Reese, W. W. Cross, and J. P. Meyer. This chapter has had a continuous existence since its founding although it has been reduced to two or three members at times.

In its early existence the chapter maintained only a lodge room and formed an eating club which was called at different times the Calumet Club and the Hefty Club. The home of the chapter has been at many different places, including the present location of the Moravian Book Store, the Washington Republican Club, the Post Office, and the Wilbur Trust Company. The present chapter house was erected on the campus and formally opened by the alumni in the fall of 1923.

XΨ

THE CHI PSI fraternity was founded at Union College in 1841. The purpose of the founding was the desire of the nine original brothers to cultivate a more elevated and refined mutual friendship than the routine of undergraduate life afforded. The policy adopted was one of conservatism in growth; hence there are now but twenty-five closely-knit alphas throughout the country, from the Atlantic to the Pacific, from Maine to Florida. The aims and ideals of the founders form the ultimate good of each alpha and the one word "gentleman" is the all-important requisite for membership. There are alumni associations in the principal cities of the United States and the fraternity is famous for the cooperation and assistance furnished by the alumni members of these organizations.

Alpha Beta Delta of Chi Psi was founded at Lehigh in 1894 by nine prominent undergraduates who were desirous of membership in a conservative national fraternity. Their petition for a charter was granted by the annual convention of alpha representatives and they were formerly initiated, on May 18, at Alpha Rho of Chi Psi at Rutgers.

The first meetings of Alpha Beta Delta were held in the rooms of the various brothers and concerned scholastic matters. The first lodge, on Seneca Street, was later procured, and, in 1915, the present lodge on the University Campus was built by the alumni. In the fall of 1930 a very elaborate enclosed sun porch was added.

The national policy of Chi Psi specifies the use of "Alpha" for "chapter" and "lodge" for "house," which is not affectation to the esoterics.

$\Delta\Phi$

DELTA PHI, third in the order of establishment of American college fraternities, was founded November 17, 1827, at Union College, by nine students of the class of 1828. Delta Phi, with the two older fraternities established at Union, have become known as the Union Triad.

The objects and purposes of the founders were "to consolidate their interests and at the same time mutually benefit each other, to maintain high standing as students and gentlemen, and to foster cordial and fraternal relations." Delta Phi has been conservative in its establishment of chapters and has not sought to expand generally throughout institutions of learning in the country, remaining essentially an eastern fraternity.

The fourth fraternity at Lehigh was the Nu Chapter of Delta Phi. It was founded in 1884 by the charter members Henry B. Douglas, John A. Jardine, William A. Cooke, Joseph K. Sarls, Mignel R. Sauraz, and Harry S. Meily. Through a continuous existence the chapter has built up an enrollment of about two hundred.

At first the chapter used clubrooms near the campus, then a house far out on Delaware Avenue and shortly after that a house at Delaware Avenue and Mohican Street. A fire in 1915 razed this house and in 1920 they took possession of the present house on Warren Square.

ON December 10, 1899, the Alpha chapter of Delta Sigma Phi was founded at the City College of New York. Three years later came the Beta chapter at Columbia University and in 1903 the Gamma chapter at New York University. The expansion of the fraternity finally led to a chapter at Massachusetts Institute of Technology and later to one at McGill University in Montreal. There are now fifty chapters in colleges and universities throughout the United States.

The Beta Theta chapter originated from a society of senior engineers which was called Sigma Iota about ten years ago when first organized. The growth of the group led to a change in name. It became known as the Phi Delta Pi society. A house was first used in 1926, then in 1929 they obtained the present house on Delaware Avenue. It then grew rapidly and petitioning to Delta Sigma Phi began. Late in 1931 their petition was granted and the installation followed early in 1932. Distinguished members of Delta Sigma Phi include the Hon. James J. Davis, of former President Coolidge's cabinet.

DELTA TAU DELTA was founded at Bethany College, West Virginia, by R. H. Alfred, A. C. Earle, E. Tarr, and J. C. Johnson. In the spring of 1858 an informal initiation was held, with the adoption of the motto, badge, and constitution following in February of 1859. After establishing several chapters, the parent chapter ceased to exist due to the confusion of the Civil War. In 1885 a combination was effected with the Rainbow of the W. W. W. Fraternity at the University of Mississippi and with this a new era was ushered in.

At first the fraternity was administered through the parent chapter, but in 1883 the system was abolished, and an executive committee was appointed, which is now known as the Arch Chapter. There are now seventy-five active chapters with alumni clubs in most of the leading cities.

The Pi chapter was instituted at Lehigh in 1874 only to have its charter revoked ten years later. After four years of inactivity the chapter was revived as the Beta Lambda by St. John Cox, W. B. Brady, W. T. Frederick, J. A. Beaver, Wm. Griffith, and S. M. Bines. The University Club's building was Beta Lambda's first home. In 1914 the present house on the campus was erected as a result of generous subscriptions of the alumni. This was the second house to be built on the campus.

IN 1834 a society was founded at William College known as the Social Fraternity which was destined to become the first chapter of Delta Upsilon. The new society grew to a membership of eighty-two, about two-thirds of the student body; so that in 1838 it was recognized as a power in the college. The attitude of the members thought as being "anti-secret" had slowly changed and in 1881 they expressed their attitude by the term "non-secret." The incorporation of the fraternity followed in 1909 and at present there are fifty-seven chapters.

At the fiftieth annual convention of Delta Upsilon it was decided to place a chapter at Lehigh University. An installation committee, whose chairman was Charles Evans Hughes, Brown, '81, established the Lehigh Chapter at the American Hotel in Allentown on October 10, 1885. The chapter members were George A. Ruddle, William A. Lyndon, Robert Lee Whitehead, Charles Pope Pollack, Otway A. Torrell, John M. Howard, Luther R. Zollinger, Harlon S. Millner, Harvey S. Morrow, and Charles S. Parker.

At first the chapter quarters were but two rooms in the old Kananss' Building. Two years later, the chapter rented a floor at Fourth and Wyandotte Streets and later moved to a house on Cherokee Street. Delta Upsilon was the first fraternity to build on the Lehigh Campus. The present house was erected in 1909.

THE KAPPA ALPHA society was the first secret brotherhood in American Colleges. The new secret society of a literary and social order was formed by nine men as a result of a breakup of a society for exercise and drill at Union College in 1825. Its growth was rapid in spite of opposition from the college and faculty because of its secrecy.

The Alpha chapter of Kappa Alpha in Pennsylvania was founded in 1894. The charter was obtained by the hard work of three members of the class of 1895, James E. Brooks, Henry E. Kip, and Charles F. Maurice. Six original petitioners were initiated January 2, 1894, in the Masonic Temple, New York City. Three more were initiated the following February.

The chapter first rented a small house on Cherokee Street, but the growth of the chapter caused a move to better and larger quarters. In 1916, as a result of a sale of their first house, they moved to Seneca Street and two years later to a house on Broadway. The present chapter house at Fourth and Seneca Streets was purchased in the summer of 1922.

ΚΣ

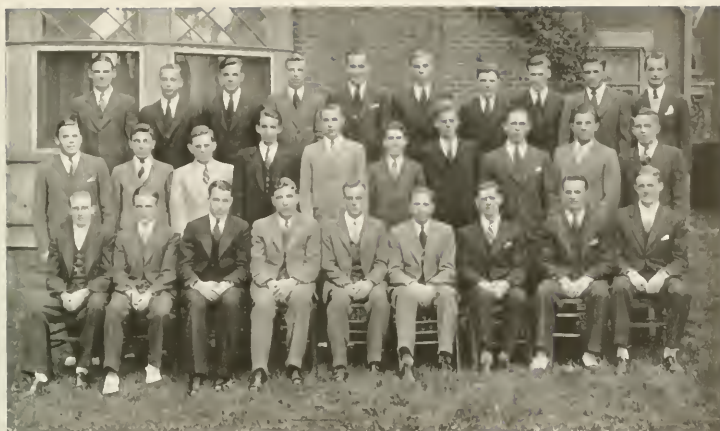

THE KAPPA SIGMA fraternity was founded at the University of Virginia on December 10, 1869, by five men who, because of their personal friendship with each other, desired to further this friendship in the common bonds of a fraternity. These men have always been known in the literature and tradition of the fraternity as the "five friends and brothers." The fraternity has 108 active chapters located at the best colleges and universities in the United States, and there are organized alumni chapters in the principal cities. The chapters are now grouped into 21 districts, with a district grand master at the head of each district.

In 1900, a group of eleven prominent undergraduates at Lehigh who desired connection with a national fraternity, petitioned and were accepted into the Kappa Sigma fraternity. The group was installed as the Beta Iota chapter on November 19 of that year during a conclave of the national fraternity.

With the spirit of personal friendship in view, Beta Iota began its activities and was soon very active in campus affairs. The first house was located on Delaware Avenue and the chapter flourished there until an unfortunate fire forced moving to the Chapman house at Church and High Streets. The chapter next moved to the old home of E. P. Wilbur on Delaware Avenue and later to the present Knights of Columbus Hall on Fourth Street. The present chapter house was established in 1926, in the former residence of Archibald Johnson, at 24 East Church Street.

ΛΧΑ

THE LAMBDA CHI ALPHA fraternity originated at Boston University in 1909 and has spread so rapidly that it now numbers over eighty chapters located throughout the country. Each chapter is known as a Zeta.

In 1922, a local fraternity, Delta Theta, was founded at Lehigh University. Having seen a few copies of the Lambda Chi Alpha publication and also having visited the Rutgers College chapter, the men of Delta Theta became interested in Lambda Chi Alpha. They informally petitioned the national fraternity late in 1923 and in 1925 their formal petition was filed. The petition was accepted the following spring and on November 13, 1926, thirty men were initiated and Gamma Psi Zeta was established as the Lehigh chapter of Lambda Chi Alpha.

The original quarters of Delta Theta were on Packer Avenue, but because of the rapid increase in membership it soon became necessary to obtain a larger house so the fraternity moved to a house on Montclair Avenue. In 1927, Lambda Chi Alpha changed to their present house on Delaware Avenue. Since its establishment the chapter has had an enviable position in campus affairs and it has every hope of increased success in the future.

ΦΔΘ

PHI DELTA THETA was founded at Miami University, Oxford, Ohio, in 1848. The bond of the Phi Delta Theta, a statement of the principles upon which the fraternity was founded, was written by two of the founders and has never been altered. Expansion was slow until after the Civil War, after which numerous southern and eastern chapters were installed. The policy of the national chapter is one of conservative expansion. At present there are 104 active chapters.

In 1882, a charter was granted to a group of students at Lehigh, who were initiated by the chapter then in existence at Princeton. However, the chapter was short lived, having had difficulties with the university authorities. In 1887, the Pennsylvania Eta chapter of Phi Delta Theta revived its chapter and the members were initiated by the Lafayette chapter. The charter members were: R. P. Barnard, E. H. Beazell, C. Burkhart, F. R. Coates, M. H. Fehnel, J. J. Lincoln, C. H. Miller, T. F. Newby, T. A. Straub, and A. T. Throop.

With the aid of the alumni, especially F. T. Townsend, the present house on the campus was built and opened in 1917. It is an interesting fact that the house is built entirely of stone from South Mountain on which it stands.

ΦΓΔ

IN 1885 Major Frank Keck of the Columbia chapter, conceived the idea of a chapter of Phi Gamma Delta at Lehigh. The national fraternity, which was founded in 1848 at Jefferson College, had just begun a movement of expansion among the better colleges and universities in the country. Major Keck in conjunction with William French of his chapter communicated with Pierce, McFadden, Domenech, and Butler who were students at Lehigh.

These four men petitioned the national fraternity, and the petition, endorsed by the Lafayette chapter and the new defunct Muhlenberg chapter was granted January 12, 1886. However, installation of the chapter could not be made public until its membership reached ten.

On the morning of January 15, 1886, Major Keck and all other Fijis from the Columbia chapter, installed the Lehigh chapter. Seven new men were initiated and the chapter became firmly established at the University.

Beta Chi's first house was on Market Street, but the rapid growth of the chapter made it necessary to move to larger quarters. A house was obtained on Cherokee Street, and this was occupied until 1922, when a home was built on the campus.

PHI SIGMA KAPPA fraternity was founded at the Massachusetts Agricultural College, March 15, 1873. During the first five years of its existence it had no Greek name, but was generally known as the "Three T's." The organization became national in 1888 through the activity of alumni members who had gone to the Albany Medical College for graduate study. The fraternity now has forty-nine chapters, and is governed by a constitution, much of which is non-secret, quite similar to the constitution of the United States.

The Lehigh chapter, Nu, was founded by Charles Murray, William Landis, Robert Throughgood, Henry Walters and Frederick Downes, in 1901. These men had petitioned several other national fraternities previous to their being granted a chapter by Phi Sigma Kappa.

The first chapter house was at 511 Seneca Street, but was soon moved to Packer Avenue. During the war period so small a number of brothers were left in the chapter that those remaining had to live in one house with another fraternity group. When the house was again able to function independently, a house on Wyandotte Street was obtained. Ten years later, however, the chapter outgrew this house and moved to its present home at 437 West Third Street.

PI KAPPA ALPHA was founded at the University of Virginia, March 1, 1868. Due to the unsettled condition of the South after the Civil War, the fraternity led a precarious existence for the first few years. A convention at Hampton-Sydney in 1889 gave new vigor to the fraternity and since then under the leadership of Robert A. Smythe it has expanded to the enviable position it now holds in fraternal circles. In 1889 expansion was limited to the Southern states, but the ban was partially removed in 1904, allowing the acquisition of chapters in the South-West, and in 1909 all geographical restrictions were removed.

The local chapter, Gamma Lambda, came into existence in December, 1924, and was at that time known as the "Seal Club," which name was soon dropped in favor of the "Lehigh Ivy Club." At this time the club was located at 15 East Packer Avenue and under the leadership of Arthur W. Chamney, '27, the first president of the club. In September, 1926, the club moved to 308 West Packer Avenue and in March of that year the club was reorganized as the Zeta Chi Fraternity, the constitution being accepted by the faculty in May. In September, 1927, the Fraternity moved to 535 Montclair Avenue, where it was installed as Gamma Lambda of Pi Kappa Alpha, December 6, 1929. The house is now situated at 306 Wyandotte Street.

ΠΛΦ

THE LAMBDA Chapter of Pi Lambda Phi was founded in 1915 with 11 charter members. The local chapter is a branch of a fraternity created at Yale for the purpose of eliminating sectarianism in the colleges of America.

Since its establishment at Lehigh, the chapter, after overcoming the usual obstacles that face the new fraternity, took rapid strides. In 1924-25 Lambda won the Phi Sigma Kappa scholarship cup for the fraternity with the highest scholastic average. Again in 1929-30 the same cup was awarded to the chapter, along with the Trustee's cup given for the same reason. The average with which these honors were won was 2.776, the highest average any group has ever had at Lehigh University.

Pi Lambda Phi has been a member of the Inter-Fraternity Council since 1917.

ΨΥ

IN 1833 the Psi Upsilon fraternity was founded at Union College as the outgrowth of a local society which had been formed for election purposes. The organization was so well founded that only one chapter has dropped from its ranks, the Alpha at Harvard University.

The Lehigh chapter was granted to a local fraternity Phi Theta Psi, which had been built up at Lehigh through the efforts of G. F. Dreck, H. V. Cooke, J. W. Leithead, R. G. Cooke, and W. R. Pinckney. This group came through the first rushing season with twenty undergraduate students. Two members of the Lehigh faculty, E. H. Williams, Jr. and Henry Clark Johnson, interested these men in petitioning the Psi Upsilon convention of 1883 and a charter was granted them the following year.

Since scholarship was the chief criterion for selection of upper-classmen for membership to the fraternity, there were in the first group valedictorians of two classes, oratorical prize winners and Wilbur Scholars.

The first chapter house was located on East Market Street. The house which the chapter now occupies was erected in 1909 from plans of T. C. Visscher, '99. An addition was built in the summer of 1931.

ΣΑΜ

IN the spring of 1923 the Sigma Kappa Chapter of Sigma Alpha Mu was founded at Lehigh. This chapter was an outgrowth of the national organization which had its founding at the College of the City of New York. The object of the fraternity was "to form a close social and fraternal union of Jewish students of the various universities, colleges and professional schools in America."

The first chapter house was located at 5 Broadway; then a move was made in 1925 to a new house on Wyandotte Street. This was the home of Sigma Alpha Mu until 1926, when the undergraduates, with the support of their alumni, purchased the present home at 507 West Third Street.

ΣΧ

THE SIGMA CHI Fraternity originated after the refusal of six members of the Delta Kappa Epsilon chapter at Miami University to vote for a fraternity brother for a campus office. These six men: Thomas C. Bell, James P. Caldwell, Daniel W. Cooper, Isaac M. Jordan, Benjamin P. Runkle, and Franklin H. Scooby voluntarily withdrew from the chapter, associated themselves with William L. Lockwood, and established a new secret society.

They assumed the name of Sigma Phi, apparently unaware of the existence of another organization of the same name in the East. Early in the succeeding year, rivals stole the ritual and the constitution, and new ones were drawn up with the name changed to Sigma Chi. A second chapter started the same year, and since then expansion has been constant.

During the Civil War, with many universities closed, seven Sigs kept alive the fraternity spark by organizing a chapter in the Confederate Army, which they termed the Constantine Chapter. This unique organization of Sigma Chi held regular meetings and conducted two initiations throughout the Civil War.

The forerunner of the Alpha Rho chapter at Lehigh was the Crimson Halberd Society which successfully petitioned the national fraternity in 1886 and again in 1893 after three years of inactivity. Although planning a campus site, the fraternity is now situated in a fine home at 240 East Broad Street.

IN 1868, the Sigma Nu fraternity was founded as the Legion of Honor at the Virginia Military Institute in Lexington. Sigma Nu, the Greek name, was adopted the following year. It was essentially a southern fraternity until its large growth extended through the better colleges in the North.

The trials and difficulties of the founding of the Pi chapter in 1885, is written by one of the founders in the first chapter letter:

"Although somewhat isolated, we feel united by the bonds of Sigma Nu. There were many obstacles in our way, and now, since we have overcome them, we have not only strengthened the fraternal feeling existing between us, but have the gratification of knowing that each contributed to the successful establishment of Pi. Our work is not yet finished, but we have no fears for its fortunate completion."

Charles D. Marshall and Howard R. McClintic, two charter members, began a friendship in their undergraduate days that developed into a great business partnership known as the McClintic Marshall Corporation which is one of the largest construction companies in the world.

THE SIGMA PHI Society was founded at Union College in 1827, being the second oldest of the college social fraternities and a member of the Union Triad. During the years following the founding of the Society it expanded, but never upon a large scale, and is now composed of ten active chapters.

The Alpha of Pennsylvania was installed at Lehigh in 1887 upon the granting of a petition for a charter to a local organization known as the Beta Beta Club. This was composed of a group of students who, dissatisfied with conditions in a social fraternity to which they belonged, had resigned and formed this new club with the distinct purpose of applying for a charter from a national fraternity. Twenty-six men were initiated at the installation ceremonies, among them being several of the chapter's prominent alumni.

The present place was built in 1888 soon after the founding of the chapter and was formally dedicated the next year at a reception attended by alumni and friends of the chapter residing in Bethlehem and elsewhere.

ΣΦΕ

IN the year 1903, Sigma Phi Epsilon was founded as a national fraternity at the University of Richmond. A heartshaped badge was adopted and several members were students of theology which gave cause for the members of the fraternity being called "Sacredhearts." The fraternity was governed by the parent chapter until it was recognized as a national fraternity.

Pennsylvania Epsilon obtained its charter at the 1908 National Conclave of the fraternity. There were sixteen initiates in the original chapter which was then known as Omega Pi Alpha. Before 1907, it was a local society called Delta Epsilon. The local chapter has grown as has the national fraternity which now has sixty-seven active chapters throughout the country.

A house on West Fourth Street was the first house used by the chapter, but a larger membership necessitated a move to a house at Fourth and Wyandotte Streets. In 1923 they occupied their present house at 61 West Market Street. There are now plans for a new and larger house in the near future.

ΤΔΦ

TAU DELTA PHI fraternity was founded on June 22, 1910, at the City College of New York. A group of undergraduates there, motivated by the closer bonds of friendship and harmony embodied in a fraternity, joined themselves together into a brotherhood. At the outset, Tau Delta Phi was intended as a purely local organization, and this policy was characterized the first four years of its life. In 1914, however, a chapter was founded in New York University, and in 1916, the two sister chapters decided to adopt a policy of cautious and conservative expansion. Since then the size of the fraternity has rapidly increased.

The Tau chapter of Tau Delta Phi was granted a charter at Lehigh University in June, 1926. A local fraternity, Upsilon Kappa, had been founded the year before and had its chapter house at 240 West Packer Avenue. At the time of its reception into Tau Delta Phi, Upsilon Kappa had nine members and nine pledges. The actives became charter members. They were: Charles P. Berman, Nathaniel Goldblatt, J. Holtz, Daniel Jatlow, Leon Lewis, Manuel Schult, and David Troderman.

In the four years since its having become a national fraternity, Tau chapter has had three homes. The first was on Packer Avenue, but lack of room made the transfer to 527 Montclair Avenue imperative. Two years ago the spacious house at 618 Delaware Avenue was acquired, and is now the present home of the chapter.

ΘΔΧ

ON October 31, 1847, at Union College, the Theta Delta Chi Fraternity held its first meeting. Its growth has been conservative and Nu Deuteron was one of the last charges to be added to the small enrollment. Theta Delta Chi inaugurated the use of the pledge button, a fraternity flag, a fraternity magazine, and the Grand Lodge form of government.

Nu Deuteron charge was the fifth fraternity to be installed at Lehigh. It was founded on June 14, 1884, by Charles Luchenbach, Thomas Luchenbach, Mason Pratt, John Spengler, Charles Thomas, and Edward Van Kirk.

There are many locally prominent graduates of the charge. Some of them are: Eugene Grace, President of the Bethlehem Steel Company, Walter R. Okeson, Alumni Secretary and Treasurer of the University, Professor Ullman, head of the Chemistry Department, Archibald Johnson, President of the Bethlehem Bank, and Alfred Glancy, Vice-President of General Motors and President of the Lehigh Alumni Association.

ΘΚΦ

DURING the year 1916, a group of Lehigh students found themselves thrown together quite frequently in one of Bethlehem's "chop houses." Recognizing the mutual congeniality of the group, certain of them set a movement on foot in order to bring about a more certain and binding group. Whether it was to result in an eating club or a fraternity was never discovered, for the war disbanded the group. Various members entered the service; and the rest, left without leaders, lost interest.

Some months after the close of the war, however, the organization of the group began anew; this time their efforts meeting with success. Under the leadership of August Concilio, who had returned from overseas to complete his senior year, and with the capable guidance and sound advice of Msgr. McGarvey, then pastor of the Holy Infancy church, the residence at 454 Vine Street was secured and furnished. With faculty recognition, the local fraternity Theta Kappa Phi, became a reality.

An amalgamation with a prominent local fraternity at Pennsylvania State College, Kappa Theta, was accomplished in 1922, thus beginning the expansion of Theta Kappa Phi. Since then the fraternity has placed chapters in eight prominent colleges in the east and middle west.

THETA XI fraternity was formally founded on April 29, 1864, at Rensselaer Polytechnic Institute. Developments of the fraternity resulted from two factions which then existed in Sigma Delta fraternity, a local club formed at Rensselaer in 1859. The group of eight who were the dissenters withdrew from Sigma Delta and formed a new society with the full intention of making it national in scope. The eight founders took the oath and signed the constitution.

The charter to Eta chapter was granted to a local organization then known as the Lehigh Herman club which had existed on campus since the middle nineties. Fourteen charter members received the initiation on December 3, 1903. To date, Eta has initiated two hundred and fifty-nine men into Theta Xi fraternity.

The original chapter house stood at 431 Cherokee Street, but about 1908 the chapter moved to 541 Seneca Street where it stayed until the time of the war. For some time during the war the fraternity had no house but held meetings at the Five Points. Immediately after the war a house was secured on North New Street and when larger quarters were needed the fraternity moved on East Church Street. In September, 1928, the present quarters were secured at 407 Delaware Avenue. In approximately twenty-five years of existence, Eta chapter has held meetings in seven different houses.

SUMMARY OF THE 1932 SEASON

Despite the general disappointment of the 1932 season, there were several redeeming features. The brightest point of the year was the 25-6 victory over Muhlenberg; Lafayette had previously defeated the Mules by only 6-0. Another consolation was the fight exhibited in the Princeton game. The Princeton coach, "Fritz" Crisler, in a talk made to the team at a banquet given by the Rotary Club of Bethlehem, in speaking of

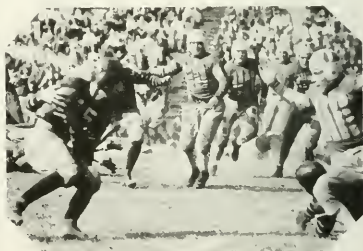

the Princeton game, said that in spite of the impossible odds, every man kept fighting until the final whistle.

In the middle of November, the team lost the valued service of "Chick" Halsted, captain and one of the most outstanding players on the team. His running mate, Paul Short, was chosen as acting captain. Short, a consistent thorn in the sides of the opposition all season, was elected captain for the 1933 season.

LEHIGH—13, DREXEL—13

Using a clever passing attack, Drexel earned a tie with Lehigh in the first game of the season for the Brown and White. The running attack of both teams was faulty; despite this, Lehigh managed to score one touchdown in the second quarter because of a blocked punt deep in Drexel's territory. This, the only touchdown of the game for the Tatemen, was made by Ock, the sophomore back.

Matt Suvalsky, veteran right guard, accounted for seven points with two perfectly placed field goals and a point after the touchdown.

GREENE

Drexel scored in the first and fourth quarters by passes. The point after touchdown kick was blocked by Morse, Lehigh left guard, tying the score.

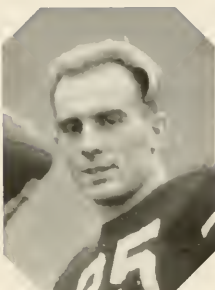

Both the Penn and Lafayette squads attended the game at the invitation of Coach Tate.

COLUMBIA—41, LEHIGH—6

The two interesting points of this game were Captain Halsted's kicking and the fighting spirit of the Lehigh team. The Columbia team made 21 points in the second period, while in the third and fourth, a fighting Brown and White eleven held them to two touchdowns.

The sole Lehigh touchdown came in the last period, when quarterback Polk took advantage of a Columbia miscue and passed to Fortman.

Had it not been for the excellent punting of Halsted, the score might have been much worse. The Lehigh star made his most spectacular kick in the third quarter, when he punted from his own goal line to the Columbia five yard line. The ball traveled 69 yards in the air, and continued by bouncing practically to the enemy goal.

SHORT

KIGLIO

The sole counter made by Lehigh was of some consolation, in view of the fact that it amounted to one-fourth of the total score made against the Columbia eleven last year.

SUVALSKY

POLK

ORRIEN

LEHIGH—7, P. M. C.—0

Although outplayed in every department of the game except punting and passing, the Brown and White managed to hold a plugging Cader eleven scoreless. P. M. C. made their strongest scoring threat in the last quarter; penalties, however, checked them considerably.

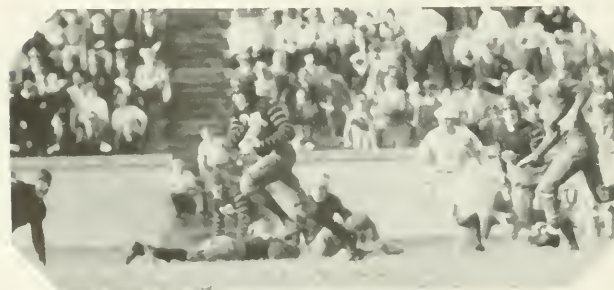

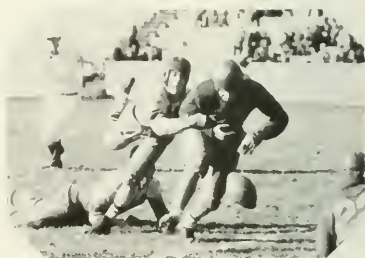

Lehigh's lone score was made in the first few minutes of the first period after a very good exhibition of fast and accurate passing. Two long heaves, Halsted to Ock and Short, brought the ball to the ten yard stripe, where Lehigh had little difficulty in making the touchdown. The kick after touchdown, made by Suvalsky, was good. Kight and Morse, left end and left guard, did excellent work on the defensive, while Halsted's kicking was again a big assistance to

Lehigh's defense.

JOHNS HOPKINS—12, LEHIGH—6

Despite the fact that they were outplayed the whole game, Johns Hopkins managed to score 12 points to Lehigh's six at Homewood field in Baltimore. With the exception of two short passing and running attacks, the Blue Jay's offensive drives were smothered all afternoon. The Hopkins team made the final counter in the last quarter, preceded by a long pass and a 66 yard run.

Lehigh opened the game in a rush, and before the Baltimore team could recover, two passes from Halsted to short netted a touchdown. The Jays retaliated in the second period and tied the score six-all. Their final six points were made in the last quarter.

1933 EPITOME

BAKER

PENNSYLVANIA—33, LEHIGH—6

Penn, expecting the Lehigh game to be a "breathing spell," was sadly disappointed. The Quaker first string, however, was forced to play most of the game to hold a fighting and unexpected opposition. Even though Penn won by a good score, they failed to produce anything that even approached the spectacular.

The most spectacular part of the game was a 49 yard run by Paul Short, Lehigh quarterback. Short took the ball on the 49 yard line and eluded the whole Penn team to make a touchdown, the first Lehigh touchdown to be made against Penn since 1929.

LEHIGH—25, MUHLENBERG—6

Captain Halsted and his Brown and White eleven ran up a 25-6 score against a fighting Muhlenberg team in the 22nd game between these two schools. Halsted and Short, recently changed to halfback, accounted for three of Lehigh's four touchdowns; Reidy took care of the fourth.

After a mediocre first quarter, the Lehigh line settled down to some good playing. Late in the first half, Short made the first counter on a pass from Halsted. Later, Halsted ran 65 yards and Short ran 55 yards for touchdowns. The Mules threatened in the third quarter, was repulsed, and then brought the ball down for their only score of the game.

PRINCETON—53, LEHIGH—0

The Princeton tiger was out to avenge itself this year, and seemed to have very little trouble doing so. The Princeton first string played about one quarter; then the second and third teams were given their chance, and they made the best of it.

FURMAN

A. ROM

Ock

DEMAREST

E. ROBB

In less than two minutes after the start of the game, Paul Short was helped from the field, a victim of the viciousness of the Princeton defense.

The only threat made by Lehigh came in the second period. By passing, the ball was brought from the 44 to the 12 yard stripe, only to be passed into the end zone.

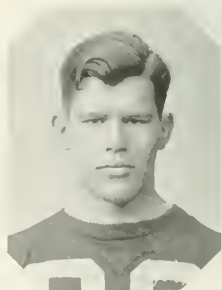

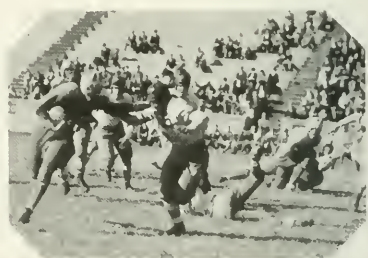

Lehigh will not meet Princeton in the 1933 season, because the Princeton authorities have requested that they may break that engagement in order to play Dartmouth on the same date. A game, however, has been scheduled for the 1934 season.

RUTGERS - 37, LEHIGH - 6

Hampered by the loss of Captain Halsted and Paul Short, the crippled Brown and White attack was powerless until late in the fourth quarter, when Reidy and Goodrich staged a passing exhibition.

The first period of the game was closely fought throughout. The Lehigh line held well and repulsed every Rutgers thrust. The Lehigh attack carried the ball to the 15 yard line where it was lost by a long pass over the goal line.

The Rutgers offense made a burst of power in the third period which resulted in three counters in rapid succession. Lehigh did not score until the last quarter, when three passes, Reidy to Goodrich, netted a total of 70 yards, bringing the ball to the Rutgers two yard line. Reidy went through right guard on the next play for the Engineers only score.

NRELLY

1918 EPITOME

LAFAYETTE—25, LEHIGH—6

In the sixty-sixth game between these two schools, the Maroon team splashed and skidded its way to a 25-6 victory over Lehigh. Despite the rainy field, the Lafayette backs hit the Lehigh line with surprising speed. Lehigh's captain, Paul Short, although he had a decided limp as a result of an injury received during the Princeton game, played all the four quarters. His dashes proved as dangerous to opposing tacklers as ever, in spite of the mud and his knee injury.

Lafayette scored early in the first period, when Stabley took a punt and splashed 60 yards through the entire Lehigh team. The Brown and White eleven had only one chance to score—in the second period. Wolcott blocked Irwin's punt on the Maroon 20 yard line, and Wildman, Lehigh right end, recovered the ball on the 13 yard stripe. Short then took the ball and managed to fight and slide his way through Lafayette's right tackle for Lehigh's only score of the game. Although Short ran the ball over for the point after touchdown, the referee ruled that his knee had touched the ground and the point was not allowed.

CLAUSS

KUGLER

The most astounding part of the game was the punting. With so much mud and water, this department of the game was expected to be far from the usual form, but to everybody's surprise, the punts were very good. The stellar performers of this field were Polk and Short of Lehigh, and Irwin and Maass of Lafayette.

Review of the Season

LEHIGH continued its supremacy in the collegiate wrestling ranks in the 1933 season. The Brown and White team was undefeated in the dual meets, winning seven consecutive meets. This is Lehigh's fifth championship in six years.

Dalling and Captain Peck retained their titles in the 120 and 165 pound classes respectively. In addition to these titles Lehigh gained three second places when Cel Peck, Ben Bishop, and George Wolcott won honors in the 135 pound, 155 pound, and unlimited classes respectively.

Coach Billy Sheridan was elected president of the National Collegiate Wrestling Coaches Association. He succeeded Coach E. C. Gallagher of Oklahoma Agricultural and Mechanical college.

Captain Pete Peck, Ben Bishop, Milo Meixell, and Bob Dalling were undefeated in the dual meets. Meixell was high scorer of the team, registering six falls and one decision.

The Brown and White started the season with a 21-11 triumph over Harvard. Meixell, Bishop, and Captain Peck won by falls while Case and Cel Peck won on time advantages. Captain Pat Johnson of Harvard won a decision over Johnny Beidler. Frismuth lost on a time decision, and Bauman was thrown by Barrows.

The Engineers overwhelmed Syracuse in the second meet of the season, 24-6. Johnny Beidler scored a spectacular fall when he threw Lavigne with the split scissors. Bishop and Meixell also registered falls. Roy Case and Captain Peck won on time advantages while Loux and Kremer lost in their first starts of the season.

Coach Sheridan's men scored an even more impressive victory over Yale, 27-5. Beidler sustained an injury in this match which kept him out of the line-up until the Eastern Intercollegiates. Captain Peck threw his man twice in winning.

LEHIGH met the sternest competition of the season when Cornell held the matmen to a 19-11 victory. The score being 6-6 at the end of the 145 pound bout, Ben Bishop and Gus Kremer saved the day for Lehigh by scoring falls in rapid succession, followed by Pete Peck's decision over the eccentric Bancroft. Cornell's only fall was scored when Spellman threw Loux. Roy Case suffered his first loss this season in this meet.

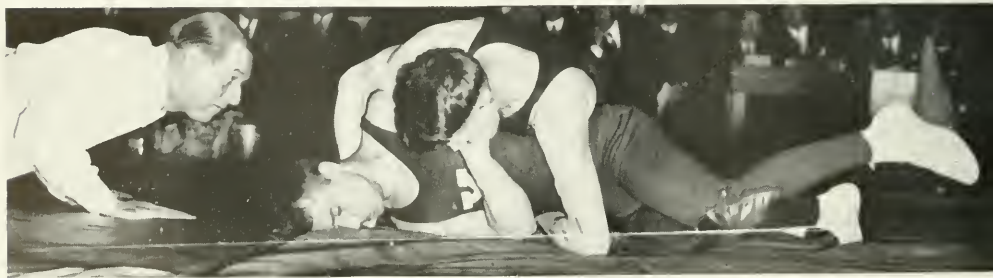

Two falls, four decisions, and one draw enable Lehigh's matmen to score a $23\frac{1}{2}$ - $4\frac{1}{2}$ triumph over the Princeton grapplers. Meixell and Wolcott scored falls, while Dalling, Bishop, Peck, and Kremer turned into time advantages. Day, in the 145 pound class, was held to a draw by Gregory. George Wolcott, wrestling in his first varsity meet of the year, tossed Constable of the Tigers.

Coach Billy Sheridan's men avenged the defeat by Navy of the preceeding year by scoring a 16-12 victory over the "Middies". Lehigh and the Navy won four bouts a piece, but two of the Brown and White victories were scored by falls to prove the margin of victory.

The Brown and White matmen concluded an undefeated season by crushing Penn 31-3. Day scored an unusual fall when he threw Jameson with a keylock. Meixell, Dalling, Pete Peck, and Wolcott also won on falls. Cel Peck and Ben Bishop registered time advantages. Kremer ceded the only bout lost to Lee on a slight time advantage.

Not satisfied with merely an undefeated season, the Lehigh grapplers sought more coveted honors and captured the Eastern Intercollegiate title. The Brown and White team scored 30 points; Princeton was the nearest competitor with 22 points. Dalling and Pete Peck won individual championships. In the biggest upset of the season, Hooker of Princeton beat Ben Bishop in two extra periods by a very slight time advantage.

As a fitting windup Lehigh was host to what is believed by some to be the largest and best National Collegiate Championships. There was a total of 98 wrestlers from all parts of the country representing thirty-one colleges and universities entered in these championships.

R. H. DALLING
126 Pound
Intercollegiate Champion

B. L. BISHOP
Captain-Elect

THE preliminaries were held Friday, March 24, at 2 P.M. and 7:30 P.M. Three Lehigh men were eliminated in the first afternoon. Goodrich and Wolcott were thrown by Hess and Teague; Fismser was the other loser.

Friday evening presented the wrestling enthusiasts with some of the best wrestling of the tournament. Meixell threw Gallit of St. Lawrence in his first bout. Dalling was then thrown by Emmons, who later placed second. In the 145 pound division Ben Bishop conquered Harman of Iowa State Teachers College. Kremer and Pete Peck each threw their opponents.

In the semi-finals, Puerta of Illinois won over Meixell by a large time advantage. Kelly defeated Bishop. Kremer alone reached the finals by defeating Brown of Indiana. Pete Peck was thrown by Martin of Iowa State.

Rex Peery of Oklahoma A. & M. won the 118 pound championship from Puerta of Illinois in the first of the final bouts. Flood, also of Oklahoma A. & M., won the 126 pound division from Emmons of Illinois. Devine of Indiana defeated Johnson of Harvard for the 135 pound title. Kelly of Oklahoma A. & M. threw Stout of Southwestern State Teachers College in an extra period.

Gus Kremer lost to Frevert of Iowa State; Martin of Iowa State won in the 165 pound division; Hess, also of Iowa State, defended his 175 pound title. In the unlimited class Teague of Southwestern State Teachers College conquered Jones of Indiana.

Following the matches, Alan Kelly of Oklahoma A. & M. was awarded the trophy as the most outstanding wrestler of the tournament. "Pat" Johnson of Harvard was selected as the second best.

At the annual wrestling banquet, Ben Bishop, A.A.U. wrestling champion, was elected captain of the 1934 team.

Review of the 1932 Season

HANDICAPPED by the return of only three letter men of the 1931 aggregation, the Lehigh coaches were forced to field an inexperienced team. This fact was mainly responsible for the decisive losses in the earlier part of the season and the winning of but one of the eight scheduled games. Despite the lack of material, however, Charlie Lattig managed to develop a fairly strong aggregation.

The lone victory by the Lehigh team was scored over the last Lafayette lacrosse team. Lafayette has since dropped the sport.

"Buffy" Britton, Wildman, and Jacobi played consistantly well on the offense for Lehigh. Captain Schier, Captain-elect Kolyer, and Duke were outstanding on the defense.

The Brown and White team was decisively defeated in their initial game of the season by a strong Princeton team by the score of 15—1. E. Schwab scored four of Princeton's fifteen goals, while Wildman registered Lehigh's only tally. Rutgers, runner-up in Olympic lacrosse competition, completely wiped out the Lehigh team. The score was 25—0, with Julian and Latimer scoring heavily for Rutgers.

In their third start of the season, the Brown and White team lost to a far superior Navy team by the tune of 24—0. "Sammy" Moncure scored seven goals for Navy. The house-party week-end game resulted in another loss for the Lehigh squad at the hands of Swarthmore. The Brown and White team held a 2—1 advantage after twenty minutes of play, but the Garnet and White team soon began to click. The final score was 16—2 in Swarthmore's favor.

Led by Buffy Britton, the Lehigh team scored their only victory of the season over a bewildered Lafayette squad. The smooth working attack of the Brown and White was too strong for the Fighting Marquis and the final score showed Lehigh victorious 5—1.

In a hard-fought game, the Washington College team managed to nose out the Lehigh team 3—1. The strong attack of the Stevens team was too great for the Brown and White and resulted in a 7—1 defeat for Lehigh. In the final game of the season, the Brown and White lost to N.Y.U. 7—0. Lehigh threatened throughout the contest, but was unable to score.

Review of the 1932 Season

SEVEN victories; eight defeats.

Certainly the record of the Lehigh baseball team of 1932 presented a decided improvement over the disastrous season of 1931 when only two out of sixteen games were won.

The University of Vermont nine were the opening day guests at Taylor stadium. At the end of nine innings the Green Mountain boys were declared winners by a 9-7 margin. A powerhouse attack by the Green and White nine of Manhattan lay the South Mountaineers low in the second game of the schedule. The score of this one-sided game was 13-3.

Captain Al Ware pitched six innings of the Swarthmore game and though he allowed but eight hits the Garnet emerged victor by a score of 12-7.

Behind Jack Layton's superb pitching the Lehigh nine defeated Princeton, 4-3. In seven frames the Tiger attack netted only two hits. For its second consecutive victory, Lehigh traveled to New Brunswick to defeat Rutgers, 5-2. Ursinus was the next victim of Bob Adams' fast traveling Brown and White nine. Four hurlers failed to stem the home team attack which hammered out a 16-12 victory.

To amuse the house-party guests, the Lehigh aggregation again defeated Rutgers diamond hopes, 24-17.

Vilanova cracked the Lehigh winning streak with a 7-6 ten inning victory. Lafayette, with excellent chances for a championship team, took advantage of Lehigh errors to win, 7-3. In their next start the Adams men drubbed Delaware by a 15-3 score. Two homers by Halsted featured the sixteen-hit attack of Lehigh. Elmer Glick turned in a fine pitching assignment when he humbled the high-powered Lafayette team at Taylor stadium, 5-1.

Scoring nine runs in the first three innings, the Muhlenberg team easily defeated Lehigh, 12-2. This loss was quickly counter-balanced by an 8-4 win over the Moravian outfit.

This losing streak was carried over to the post-exam section of the schedule when Lafayette nosed out the Brown and White, 3-2, and the season was brought to a close with another ignominious defeat at the hands of the in-and-out Mules. The score of the latter game was 13-4.

Review of the 1933 Season

THE record of this quintet represents an improvement over that of other Lehigh basketball teams. Coach Bartlett, in his first attempt at coaching varsity basketball, ran his team through a "suicide" schedule to hang up nine victories and seven defeats. The brilliant defense play and capable leadership of Moe Strausberg makes his the finest individual effort of the season.

In the opening contests, West Chester and Ursinus were both routed to the tune of 45-25, and 52-37, respectively. The next game saw a strong Princeton team outlast the Brown and White by a 34-28 score. Lehigh came back to rout Haverford on the Brown and White court, 33-16, and then took Stevens Tech basketeers into camp, 25-19.

After leading Army for one half, the Brown and White faltered, and the cadets won, 37-30. The fray at the new Rutgers gym presented another second-half tragedy. The scoreboard finally read, 42-33. Muhlenberg, closing with a sweeping drive, overpowered a tired Lehigh team in the closing minutes by a 39-33 score. P.M.C. came to Taylor Gym with expectations of prolonging their string of victories, but the invaders came out second best, 40-37.

In an extra period game at Dickison, the home team outscored the tired visitors and captured the battle by a 41-37 score. The following night Navy played host to a trail-weary Brown and White quintet. The Midshipmen opened up a wide gap in the first half, but the Bartlett-coached men finished with a rush, failing however to overcome a great Navy lead. The score of this contest was 50-39.

Muhlenberg furnished the opposition next at our home court. The first half presented the usual Lehigh lead; the third quarter presented the usual comeback of the opposition. Nevertheless, Captain Strausberg's teammates had enough left to eke out a victory, 36-32. Traveling to Easton for the last trek of the season, Coach Bartlett's squad next took a mediocre Lafayette team into camp by a 33-30 margin.

Intent upon keeping their undefeated home-game record intact, the Brown and White basketeers managed to stave off the last period rush of a battling Swarthmore team and nose out a victory, 33-27. Lafayette, overcoming a great first-half lead, swept by a tired Lehigh team in the closing minutes to capture the contest, 38-30.

The following week the Brown and White quintet defeated a fair Moravian team rather handily. The game, which was played for the benefit of a local charity, took place at the Liberty High gym and ended in a 34-25 score.

Review of the 1932 Season

THE record of this veteran Lehigh soccer team presented an unparalleled picture. Five of the seven contests were overtime affairs; three of these ended as deadlocks, and the other two were lost by one-point margins. As their first match in their quest for championship honors the Lehigh squad met the Red and Blue of the University of Pennsylvania at Philadelphia. In the third quarter with the score tied Lew Byers, Lehigh's All-American fullback, fractured his leg. This untimely accident was the undoing of the Brown and White team, for the game ended in a three-all tie. Penn scored the deciding goal in the extra period.

Cornell was entertained at Steel field in the next game on the schedule. The final score which an extra period failed to alter was 1—1. In the second home game the Lehigh team did their best to break the Haverford jinx, but after a terrific struggle the Brown and White booters lost the extra period contest, 2—1.

Coach Carpenter's men then traveled to Hoboken to engage the Stevens Tech hooters. Clicking perfectly the South mountaineers overwhelmed the home team, 10—2.

Bent on avenging the 2—0 defeat administered them on their last visit to Bethlehem, the Midshipmen from the United States Naval Academy steamed up to Steel field for the fifth game on the Lehigh schedule. At the start of the third quarter the Navy team had scored their third goal, and Lehigh hopes began to fade. However the Brown and White staged a comeback and the game ended with a tie score, 3—3. After four scoreless extra periods, the game was called on account of darkness.

The Lehigh contingent traveled to Swarthmore for their next contest. Efforts to avenge the defeat of the previous season failed as the game ended in a scoreless tie after a long extra period battle.

In a driving downpour the Brown and White team met the Maroon-clad Lafayette men at Easton, and as is usual in this series the Lehigh men were victorious, 2—1.

Bud Earich, veteran left fullback who replaced Lew Byers, was elected to captain the 1933 squad.

Review of the 1932 Season

THE Lehigh track team opened the season by taking nine out of thirteen possible first places in defeating Haverford, 71—55. Fuller, Jurden, and Chandler were the stars of this meet each taking one or more first places. L. Gold broke the college record in the javelin throw, but it was not officially recognized because of the high wind.

In the meet with Swarthmore another record went by the board when Les Gold officially broke the javelin record with a throw of 178 feet 10 inches. Charlie Fuller again starred by scoring 17 points in the field events and hurdles. Lehigh took ten first places and the meet, 73—53.

Lehigh entered the Penn Relay carnival with little chance of winning. The five men chosen for the quarter-mile relay were: Riviere, Kennedy, Warren, Weldon, and Chandler. Fuller entered the pole vault and high jump and Gold threw the javelin. Lehigh failed to make a place showing in any of the events.

In the dual meets Lehigh continued in the winning column by defeating Muhlenberg by a score of 81—45. Six dual meet records were broken. Geiger, Welsh, and Majerick starred for the Mules, while Fuller of Lehigh scored 12 points and Gold broke the dual meet record for the javelin throw. Lehigh made a clean sweep in both the high jump and the javelin throw.

Again in the Rutgers meet Lehigh showed its greatest strength in the field events by collecting 71 points out of a total of 126. Charley Fuller amassed 15 points scoring firsts in the pole vault and the high hurdles, and tying for first in the high jump. At the same time Captain Chandler bettered the Lehigh record for the 440 yard dash by more than a second.

Scoring heavily in ten events a well-balanced Manhattan college team won the annual Middle Atlantic States Collegiate Athletic Association championship with a total of 59½ points. Lehigh was second with 23½ points, and Rutgers was third with 22 points. Fuller placed in five events and scored nine points.

Lehigh emerged victorious over Lafayette with a margin of two points with the score of 64—62. At the conclusion of the season Fuller was elected captain for the 1933 season.

Review of the 1933 Season

IN the first meet of the season, Lehigh lost to Rutgers 26 to 42. Lehigh jumped into the lead at the start when Jackson and Holler scored the first two places in the 50-yard dash. The Lehigh swimmers continued to lead until the last few events, when Rutgers scored heavily.

The feature of the meet was the breaking of the National Intercollegiate 100-yard free style record by Walter Spence, of Rutgers. The winning time was 51.6.

With the Tigers taking all eight first and four second places, Lehigh lost the second meet of the season to Princeton 57 to 14. Lehigh's three second places were made by Captain Harry Walker in the 220-yard breast stroke, Ed Robb in the 150-yard back stroke, and Walt Jackson in the 50-yard dash. Thirds were made by Wisner in the 220 and 440-yard free style, Polk in the fancy diving, and Kennedy in the 100-yard free style.

Lehigh avenged its defeat in the hands of Lafayette last year by a 33 to 26 victory this year. Ed Wisner, in the 440-yard free style event, made an exceptionally fast time of 5:29 2-5, thus clipping 21 seconds from the record set by Brennessholtz, former Lehigh swimmer, two years ago. Frank Kennedy, in the 100-yard dash, tied the pool record of 58.4 seconds. Fritz, also of Lehigh, placed third in the same event.

In the final meet of the season, Lehigh defeated the University of Delaware swimming team by a score of 37 to 22. When Kennedy and Fritz won the first two places in the 100-yard dash, they cinched the meet. Ed Wisner again broke the Lehigh 440-yard free style record which he had made in the Lafayette meet two weeks before. His time in this meet was 5:28 4-5.

In the Eastern Intercollegiate, Lehigh placed fifth. Ed Robb was the outstanding performer for Lehigh, swimming in the 150-yard backstroke event. Walker, Holler, Wisner and Kennedy also made credible showings for themselves in their respective events. Rutgers won the meet, with the University of Pittsburgh, Franklin and Marshall, C.C.N.Y., Lehigh, New York University, Manhattan, Lafayette, and Cornell following in order.

Review of the 1932 Season

THE Tennis situation last spring was unique in the history of this sport at Lehigh. The squad had probably never lost so many men as it lost last year. Captain Gadd, the only man of last year's squad to return, played number six man. Despite this disadvantage, they won four and lost three games. The W. and L. and Gettysburg games were cancelled at the request of various officials. The game with Dartmouth was rained out.

Hollister, number three man, and Garrett, number four man, were tied for the best individual record; each man lost three and won five matches. Charles and Garrett were the most satisfactory doubles combination.

The opening match with Villanova was lost, 2-7. Garrett only winning in the singles matches. Haff and Bomhoff were the only winners for Lehigh in the doubles.

In the closest meet of the season, the Lehigh netmen won from Cornell 5-4. The upset of the day came when Don Haff defeated Cornell's number one man, Vaughn. Bomhoff and Charles, in the doubles, defeated Cornell's number one team in a close match. Next came an easy 9-0 win from Muhlenberg. Soon after this, however, Swarthmore unexpectedly won a close match 6-3. Bomhoff and Charles, off form, lost in the singles. Bomhoff and Hollister, in the doubles, soundly trounced the Garnet's number one team.

Coach Carother's men again upset the dope by easily defeating Haverford 6-3. Haff and Bomhoff both played fine tennis and had little trouble winning their matches.

The Dartmouth game was cancelled because of rain, and a 5-4 victory over Rutgers came next. The play of Bob Garrett and Bill Charles in both the singles and the doubles turned the tide to Lehigh.

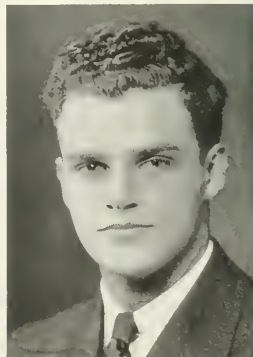

The season ended in two defeats, the first of which was administered by Army. This defeat, 8-1, was the most disastrous of the season. Lehigh lost all of the singles matches. In the doubles, Bomhoff and Hollister defeated Reynolds and Schull 7-5, 6-4. The second defeat came from Lafayette. The team showed the result of the tiring trip to West Point, and only Garrett won in the singles. In the doubles, however, Lehigh picked up to win two of the three matches.

Review of the 1932 Season

THE Lehigh harriers began their 1932 season with a very promising outlook, and finished without losing a dual meet. Only Chandler, last year's captain was lost through graduation; consequently, much seasoned material was available. Captain Bill Jurden and Chandler coached the team during the early part of the season when Coach Kanaly was ill. In the early fall the squad was dealt quite a blow when it was discovered that Jurden would be unable to participate in the meets because of a foot injury.

The harriers opened the dual meet season by defeating Ursinus on a one-point margin with a score of 28—27. The race was run over a four-mile Camel's hump course, and the winning time was 22 minutes and 23 seconds. Two Ursinus runners tied for first place, but Lehigh took the next four places and the ninth to win the meet.

MacPhee and Gordon of Lehigh tied for first place in the Haverford meet with a time of 22 minutes and 37 seconds. The performance of the team was excellent, six of the seven runners finished in less than 24 minutes. The score stood at 31—24. The winning time was 13 seconds better than that of the first Lehigh man to finish against Ursinus. Haverford had previously defeated Franklin and Marshall and had lost to Lafayette.

The team ended an undefeated dual season when it amassed a five-point lead over Lafayette, 30—25. Lafayette took first place while MacPhee and Gordon of Lehigh tied for second.

In the annual Middle Atlantic States meet, held in Van Cortland park New York city, the Lehigh runners finished fourth. Manhattan college won the meet with nearly a perfect score. Union college of Schenectady was second, with Alfred third and Lehigh fourth. Lehigh finished ahead of Rutgers and Lafayette.

At the conclusion of the season Joseph Hugh MacPhee of Arlington, Mass., was elected captain for 1933. MacPhee was never lower than second in any of the dual meets this season.

PUBLICATIONS

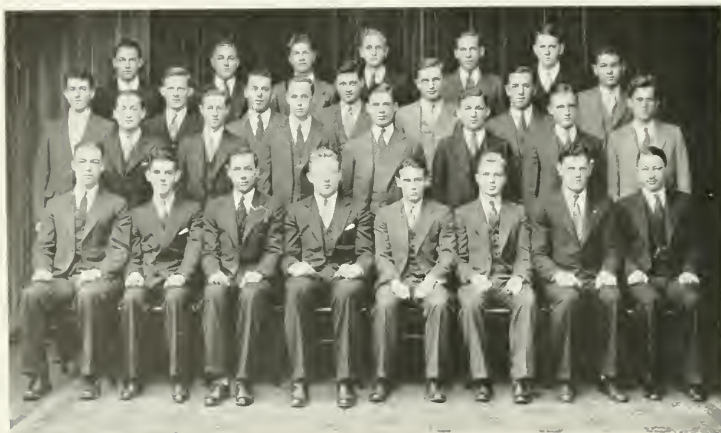

The Lehigh Brown and White

SINCE 1894 the Brown and White has been publishing "All the Lehigh news—First" twice every week. The work is arduous and the men—approximately 100—who write and edit the news and manage the business affairs of the paper, devote a very large portion of their time in an effort to carry out the editorial, news and business policies of the Brown and White.

The paper has been most active editorially. Making a sincere effort to improve conditions which were in need of such improvement, the editors did not always deal kindly with persons they believed to be retarding the progress of Lehigh. The opening of the browsing room, the abolition of the board of control, the revision of the athletic system, the securing of several nationally prominent speakers, and the breaking up of the blazer racket are among the major accomplishments of the Brown and White.

Naturally, by being involved in campaigns of this sort, the Brown and White has not created a universal feeling of friendship. However, it has made a real attempt to bolster student interests and has persevered despite strong opposition. Outspoken and liberal, it has become a real factor in the undergraduate life and, by the maintenance of its present vigorous policy, it promises to develop even further.

The Lehigh Burr

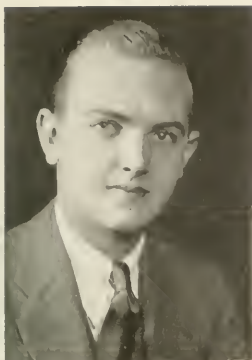

THE first issue of the *Lehigh Burr* was offered to the students of Lehigh in October of 1881. At the time of its appearance it was strictly a monthly bulletin news and student opinion. As the years went by, however, changes were made until it became the student comic publication that we have today. Like all other college periodicals, the *Burr* has had its ups and downs; but since it has maintained its present successful status for some years, its permanence as a student publication seems to be assured.

The *Burr* boasts of having had on its editorial staff such men as Richard Harding Davis, Charles Belmont Davis, M. A. DeWolfe Howe, G. Edwin LeFevre, and John J. Gibson.

Catherine Drinker Bowan gives an interesting account of the *Burr* in her history of Lehigh. "The *Burr* was so successful in the early days that in 1887 it became a bi-monthly, and 1891, the editors, desiring to make the paper more eminently a college newspaper, began bringing it out every ten days. In 1895 the *Burr* made the mistake that proved its downfall. The editors stated that the paper was henceforth to be a strictly literary magazine. In three years the *Burr* was dead, and the editors learned that being "strictly literary" was at best a dangerous business. In 1904 the *Burr* was revived again, and, with the exception of several periods of probation, has been in a flourishing condition."

The Lehigh Review

MAKING the greatest strides forward since its inception in the Spring of 1927, the Lehigh Review this year abandoned many of the stilted ideas usually associated with a campus literary magazine, and came forth in a new garb, with a new appeal, and at the lowest price ever offered in its history.

In order to acquaint the student body and the faculty with its new ideas, and its new set-up, 1,500 copies of the first issue were distributed without charge to the entire student body and faculty. Reaction was immediate. The largest paid circulation ever acquired by the Lehigh Review was subscribed for in advance of the second issue by both students and faculty.

The new form appealed not only to readers, but to advertisers also. The advertising revenue of the Lehigh Review was increased at least 200 per cent over that of any preceding year. This made possible the low price of ten cents (It had sold for 50 cents in other years).

Perhaps the most outstanding change was accomplished in the editorial policy of the publication. Current topics of campus interest, written by students and faculty members in the spotlight of university fame, were featured; instead of essays of only literary value. Literary standards, however, were maintained by a discreet use of poetry and short stories.

The new form contains at least sixteen pages, fourteen by eighteen inches, with the featured article running on the cover page. Illustrations and action-shots play a prominent part in the magazine.

Pi Mu Epsilon

THE Pennsylvania Gamma chapter of Pi Mu Epsilon was installed at the University in the spring of 1929 with the awarding of a charter to the Lehigh University Mathematics Club. The fraternity honors the successful student in mathematics by making him a member, and strives in every way to stimulate and encourage interest in scholarship, particularly in mathematics, throughout the University.

During the past year the members of Pi Mu Epsilon in accordance with the usual procedure have discussed in some detail the problem of complex variable. As a climax to the year's activities the society was able to procure Professor Dresden, head of the department of mathematics at Swathmore and President of the Mathematics Association of America for a public lecture. Professor Dresden gave a very interesting lecture on the validity of our mathematics, and discussed to some length the assumptions and the logic involved.

Mustard and Cheese

MUSTARD AND CHEESE, The dramatic association of the University, was founded in 1885 by Richard Harding Davis, who was at that time an undergraduate at Lehigh. The club's unique name comes from its equally unique origin which was brought about in a tavern. According to reports, the favored place was "Rennigs" where the undergraduates repaired on Saturday nights for beer, oysters, and brown bread with mustard and cheese. Actors who were then starring in town were often guests at these parties. When Charles Belmont Davis, a brother of the Club's founder, suggested that these weekly gatherings become a regular custom, the "Mustard and Cheese" came into existence.

In its forty-six years of organization, the Club has presented all types of shows, and every year since its founding, with the exception of 1918, some worth while presentation has been given. Prior to 1928, musical comedies were presented, the last five being, "Her Knight Out", "Panchita", "Russian Around," "Coll-Egypt" and "Mercy Sakes", all of which were written by undergraduates and produced with great success. In 1928 the annual offering was "The Creaking Chair", a three act mystery melodrama, while the one of 1929 was a three act comedy called "The Bad Man". In the last year the Club has changed its policy somewhat and now presents at least two productions a year.

CHARLES I. LATTIG	<i>Coach</i>
EDWARD HELLER {	<i>Assistant Managers</i>
MORRIS FOLKNER {	

EARLY in February, President Richard's athletic committee eliminated Lacrosse from among Lehigh's ten sports. A movement was set on foot immediately to look into the possibility and practicability of organizing the game without University sponsorship. On March 18, the petition for the organization of the Lehigh University Lacrosse Club was granted by the Student Activities Committee.

The purpose of the organization is four-fold: first, to show the amount of interest in Lacrosse; second, to bring Lacrosse back to Lehigh as a recognized sport; third, to demonstrate economical operation; fourth, to show that the pleasure and physical benefits justify the continuance of the game.

The University has given the Club the use of all the equipment on hand; the Arcadia has kindly donated a sum for the purchase of additional equipment. Because of these donations and the charge of a nominal membership fee, the following schedule has been made possible:

April 8 Princeton	at Princeton	April 29 Lafayette	at Bethlehem
April 15 Navy	at Annapolis	May 6 Lafayette	Pending
April 22 Stevens	at Hoboken	May 13 N. Y. U.	Pending

A squad of 45, comparable to any previous Lacrosse squad, turned out early in the week of March 21. The National wrestling meet delayed the beginning of practice and after only two weeks of practice the Club journeyed to Princeton to be defeated 8-1, by a strong Princeton team. Axel Robb, Bunny Kolyer, Gene Wildman, Logan Hill, and Paul Short starred for the Club, having been amply supported by the rest of their teammates.

More than to anyone else, the Club is indebted to Charlie Lattig who donated his services to the Club.

One Faculty Adviser
writes :

"As to your service and workmanship on our book, we are certainly pleased, for the inserts and border, as well as the other color sections, are quite up to our expectations, while the printing is done in an excellent manner."

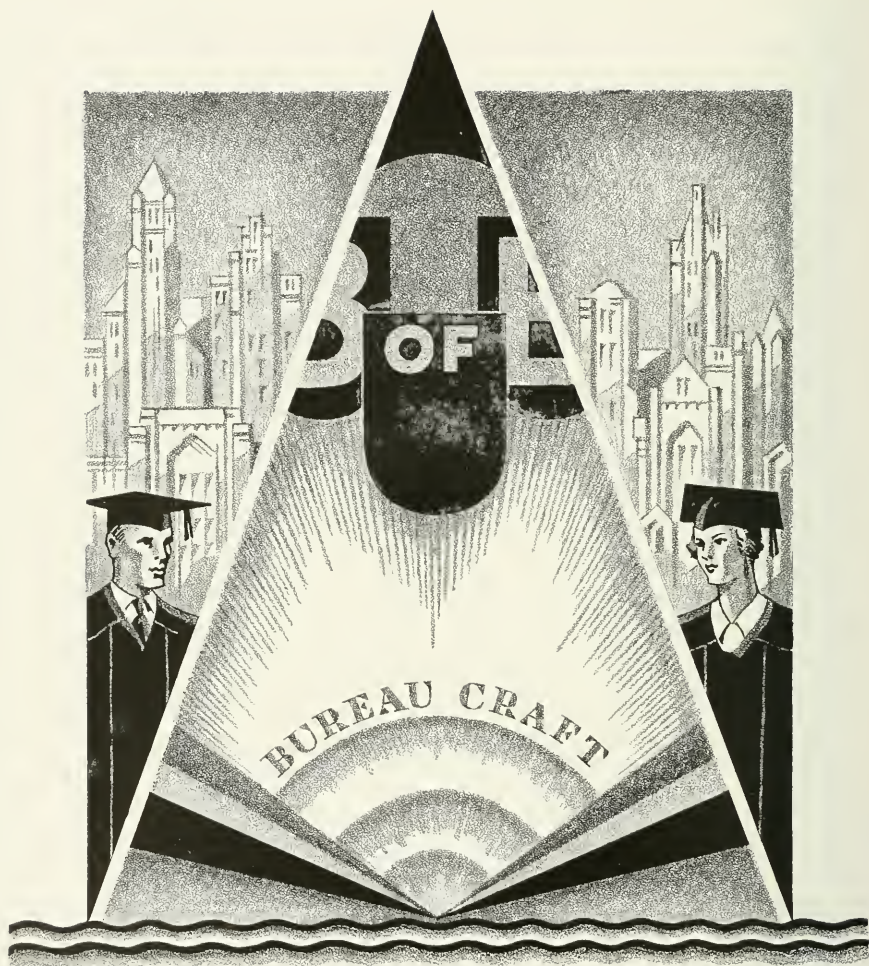

Another Appreciated
Missive :

"I hesitated until now to write our commendation of the exquisite book you produced for us. It has won wide acclaim from the student-faculty bodies, and several newspapers from this end of the State have gone into great detail pointing out its merit. We are proud of our 1932 'Pioneer'."
